ECARA DESIGN

Architect | Interior Design & Visualization
Ece Dilara Germiyanlioğlu

ABOUT US

Ecara Design is a creative and solution-oriented design studio that adopts a holistic approach to architecture and interior design. We aim to bring a unique identity to each project by delivering innovative solutions that strike a perfect balance between aesthetics and functionality.

With extensive expertise and experience in both architecture and interior design, we have successfully completed a diverse range of projects—from luxury residences and commercial buildings to cultural spaces and office interiors. In every project, client satisfaction is our top priority, and we are committed to providing tailored, sustainable, and high-quality design solutions.

Our advanced skills in 3D modeling, high-end visualization, and animation enable us to present architectural concepts in the most realistic and compelling way. We believe that the visualization process plays a crucial role in communicating design accurately and effectively, and we ensure a seamless integration of visual language, technical detail, and aesthetic value in every presentation.

In interior design, we create refined and character-rich spaces by harmonizing functionality with aesthetics. From concept development and material selection to lighting and custom furniture design, we pay close attention to every detail to enhance the user experience and deliver spaces that are both original and thoughtfully designed.

At Ecara Design, we stay at the forefront of emerging technologies and industry trends, constantly evolving our approach to infuse each project with a distinctive vision. With a strong commitment to excellence, we elevate the artistic expression of architecture by emphasizing design's aesthetic and emotional impact.

TABLE OF CONTENTS

EDI OFFICE PROJECT **01**

This project focuses on the interior design and visualization of a 7-story office building accommodating three different companies.

TAGLIAFERRI HOUSE **02**

The Tagliaferri Project, created by our team in the captivating city of Florence, combines modern living with elegance and functionality in both of its apartments.

LIGHTING PRODUCT DESIGN **03**

In this project, three distinct products were designed with a focus on user experience and aesthetic values: a wall sconce, a coffee table, and a table lamp.

ES HOUSE **04**

This project embodies a contemporary and minimalist interior design approach, thoughtfully crafted to meet the needs of modern living.

BODRUM HOUSE BEDROOM **05**

This design presents a serene and nature-inspired living space that reflects the calm elegance of Bodrum.

OYAK RENAULT R&D OFFICE **06**

This project encompasses comprehensive interior design solutions for the meeting room, cafeteria, and open office areas within the Oyak Renault R&D Office Building.

HUAWEI OFFICE **07**

The Huawei office design project was developed with a holistic approach that prioritizes user experience, spatial efficiency, and brand identity.

CR PENTHOUSE **08**

This project presents a sophisticated penthouse design located in the United States, seamlessly blending contemporary living with luxurious detail.

BUNGALOW HOUSE **09**

This interior design project is conceptualized as a mountain retreat that blends modern comfort with a nature-integrated living experience.

WUPPERTAL PROJECT **10**

Wuppertal Residential Project is a housing design located in the city of Wuppertal, Germany. The project consists of three individual apartments.

KALKAVAN MANSION **11**

Kalkavan Mansion is a residence that seamlessly blends refined aesthetics with functionality, offering a sophisticated living experience tailored to modern needs.

DG KITCHEN **12**

This kitchen design emphasizes simplicity and functionality. A refined balance is achieved through the use of crisp white tones paired with deep anthracite, creating a clean and contemporary atmosphere.

IBRADI PUBLIC LIBRARY **13**

ocated in the Ibradi district of Antalya, this library project was designed as a multifunctional facility to support access to knowledge for all age groups—from infants to adults.

INNOVATIVE HAIR LABORATORY **14**

This hair laboratory unit is designed to accommodate all types of hair-related procedures, offering a comprehensive and functional workspace for salon professionals.

PD HOUSE **15**

This two-story, 200 m² modern home design seamlessly blends functionality with understated elegance.

THE VALLEY **16**

The Valley Hotel is a wellness-focused hospitality project nestled in the unique natural landscape of Bodrum.

EDI PROJECT

This project focuses on the interior design and visualization of a 7-story office building accommodating three different companies. Each company occupies a designated floor, with every office level designed around a unique spatial and visual concept tailored to the brand identity and functional needs of its respective tenant.

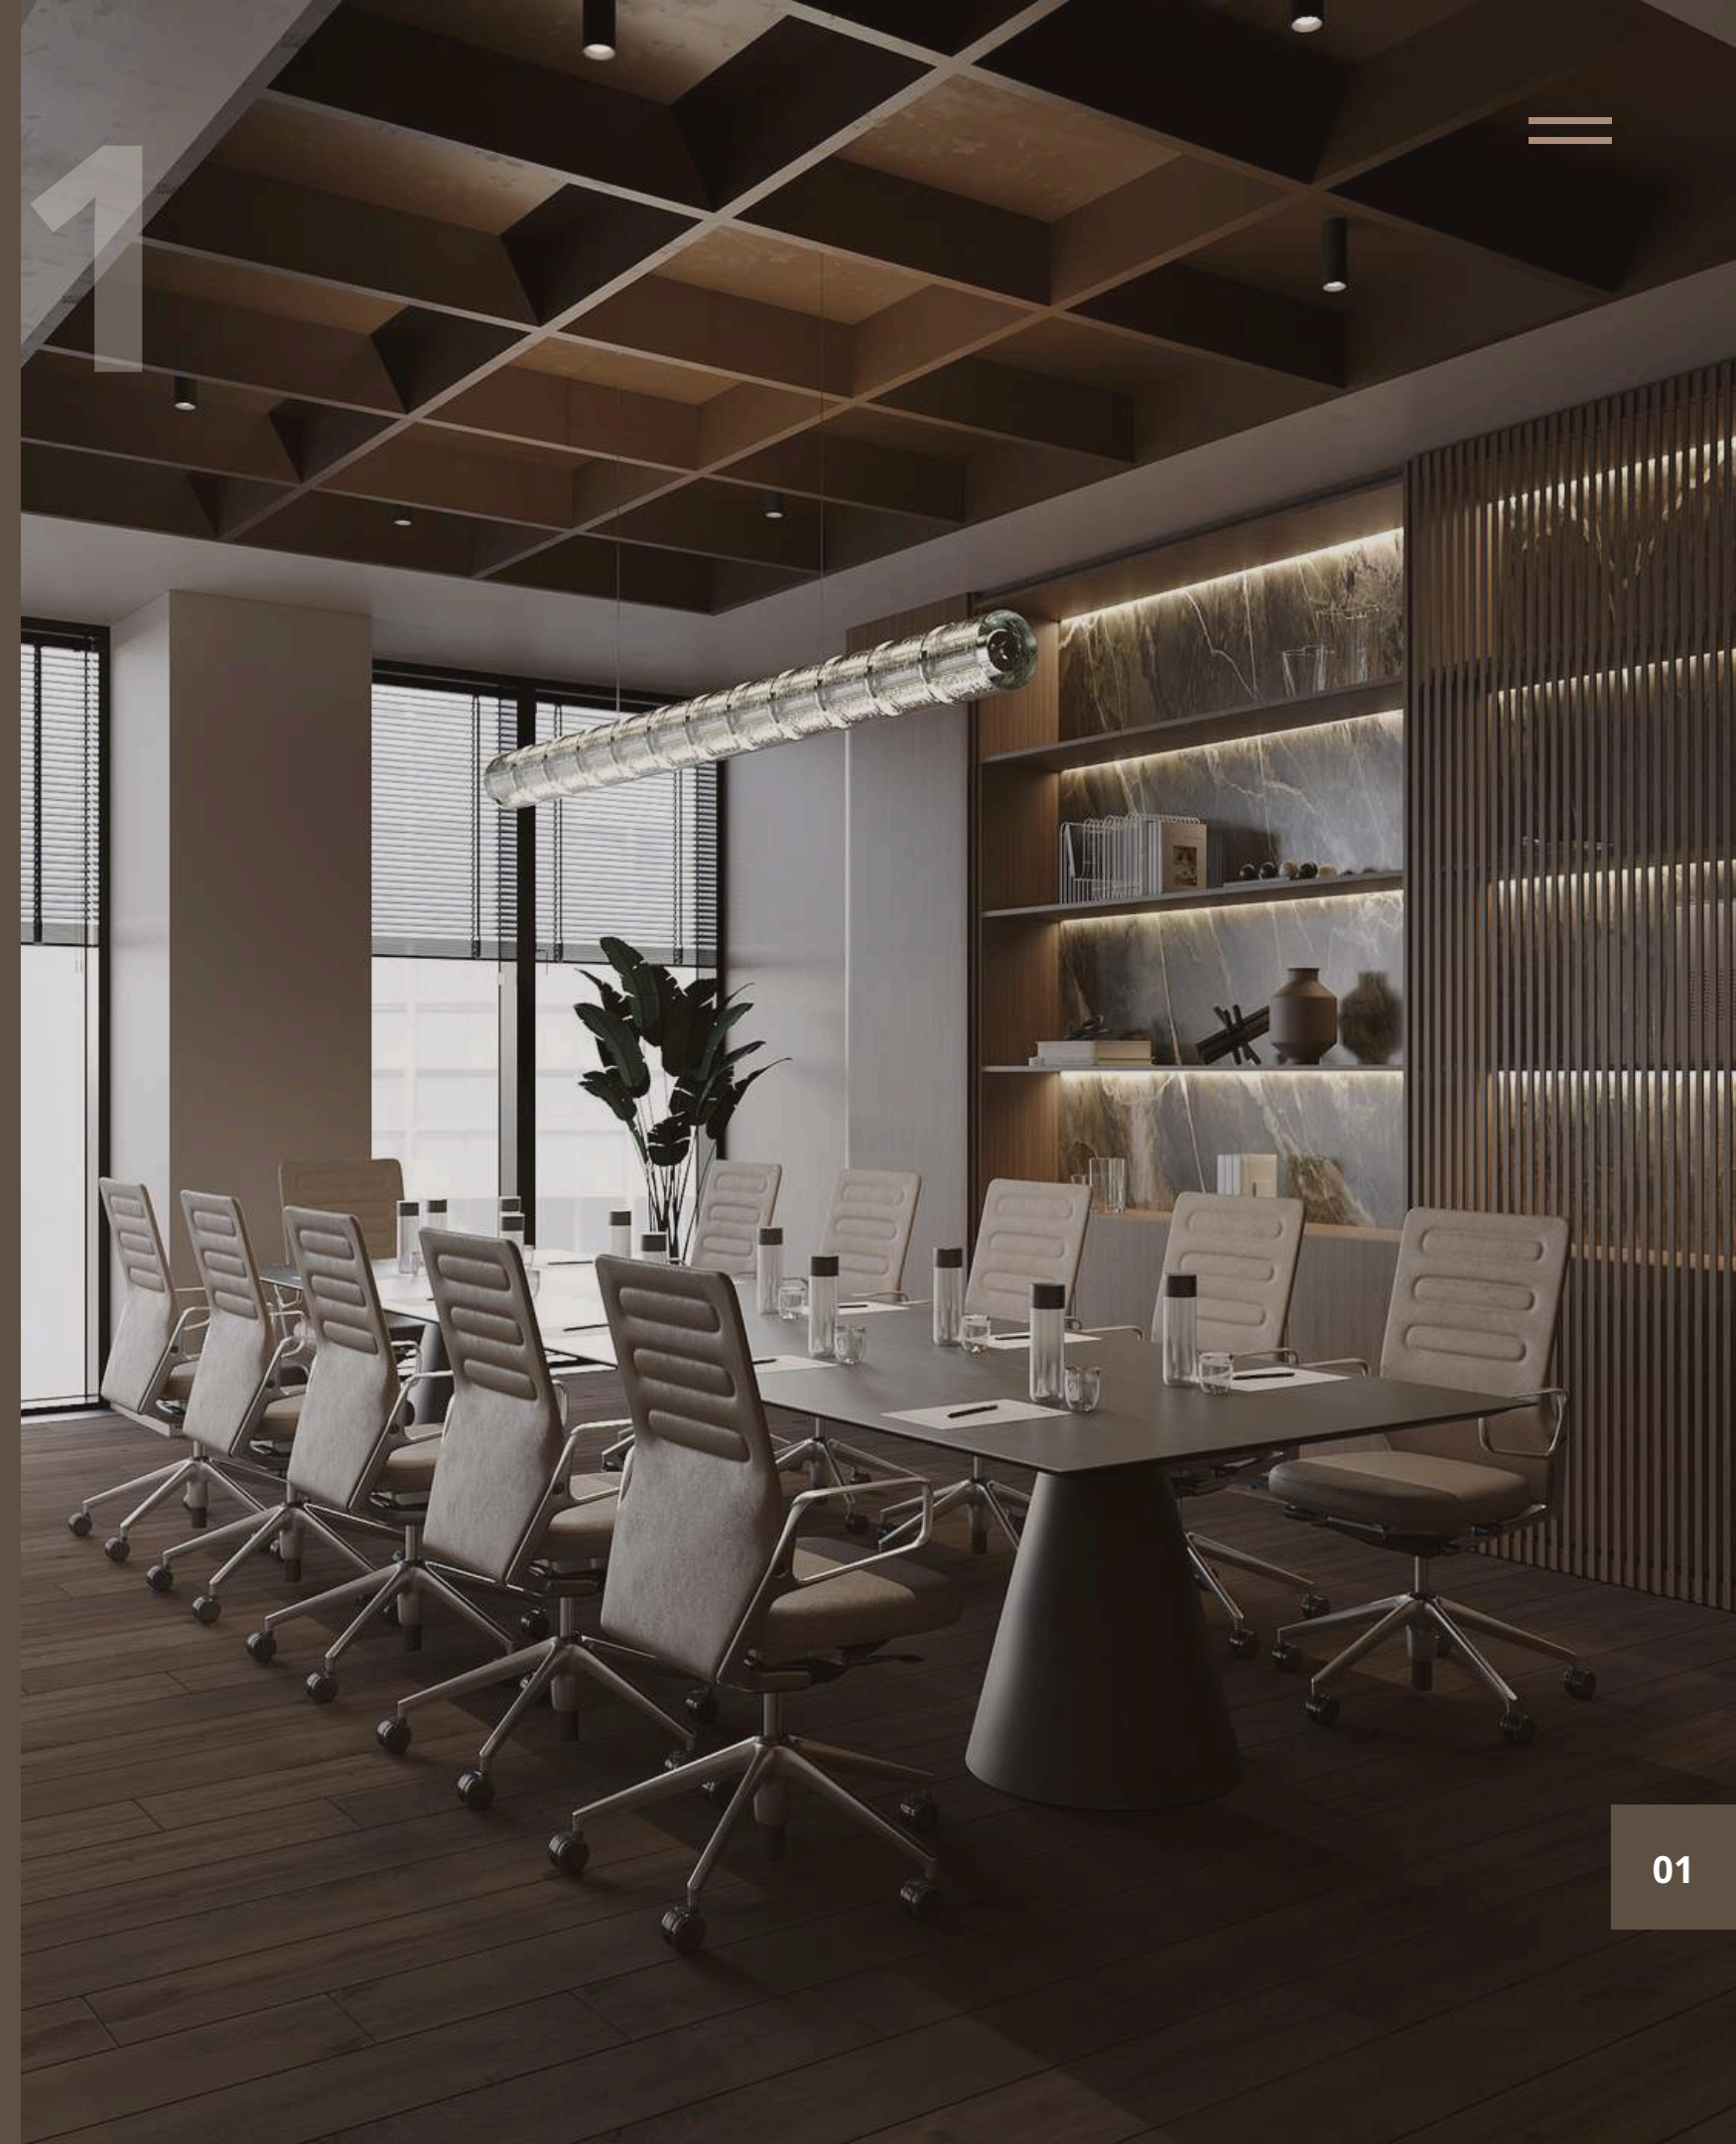

In addition to the private office floors, the building features a shared amenity floor and a cafeteria level, both designed to encourage interaction, comfort, and productivity among users. The scope of the project includes the complete interior visualization of all functional zones, offering a cohesive design language that balances individuality with unity across the building.

Executive offices, meeting rooms, waiting areas, social spaces, technical units, and the accounting department—each with distinct functions—have been carefully designed in line with both aesthetic and functional criteria. Enriched with solutions aimed at enhancing employee comfort, the project has been approached with a holistic design perspective that reflects the corporate identity.

The project emphasizes conceptual diversity, functional planning, and visual storytelling, aiming to deliver a dynamic and engaging workplace environment.

EDI PROJECT - EKOTEKS

GENERAL MANAGER’S OFFICE

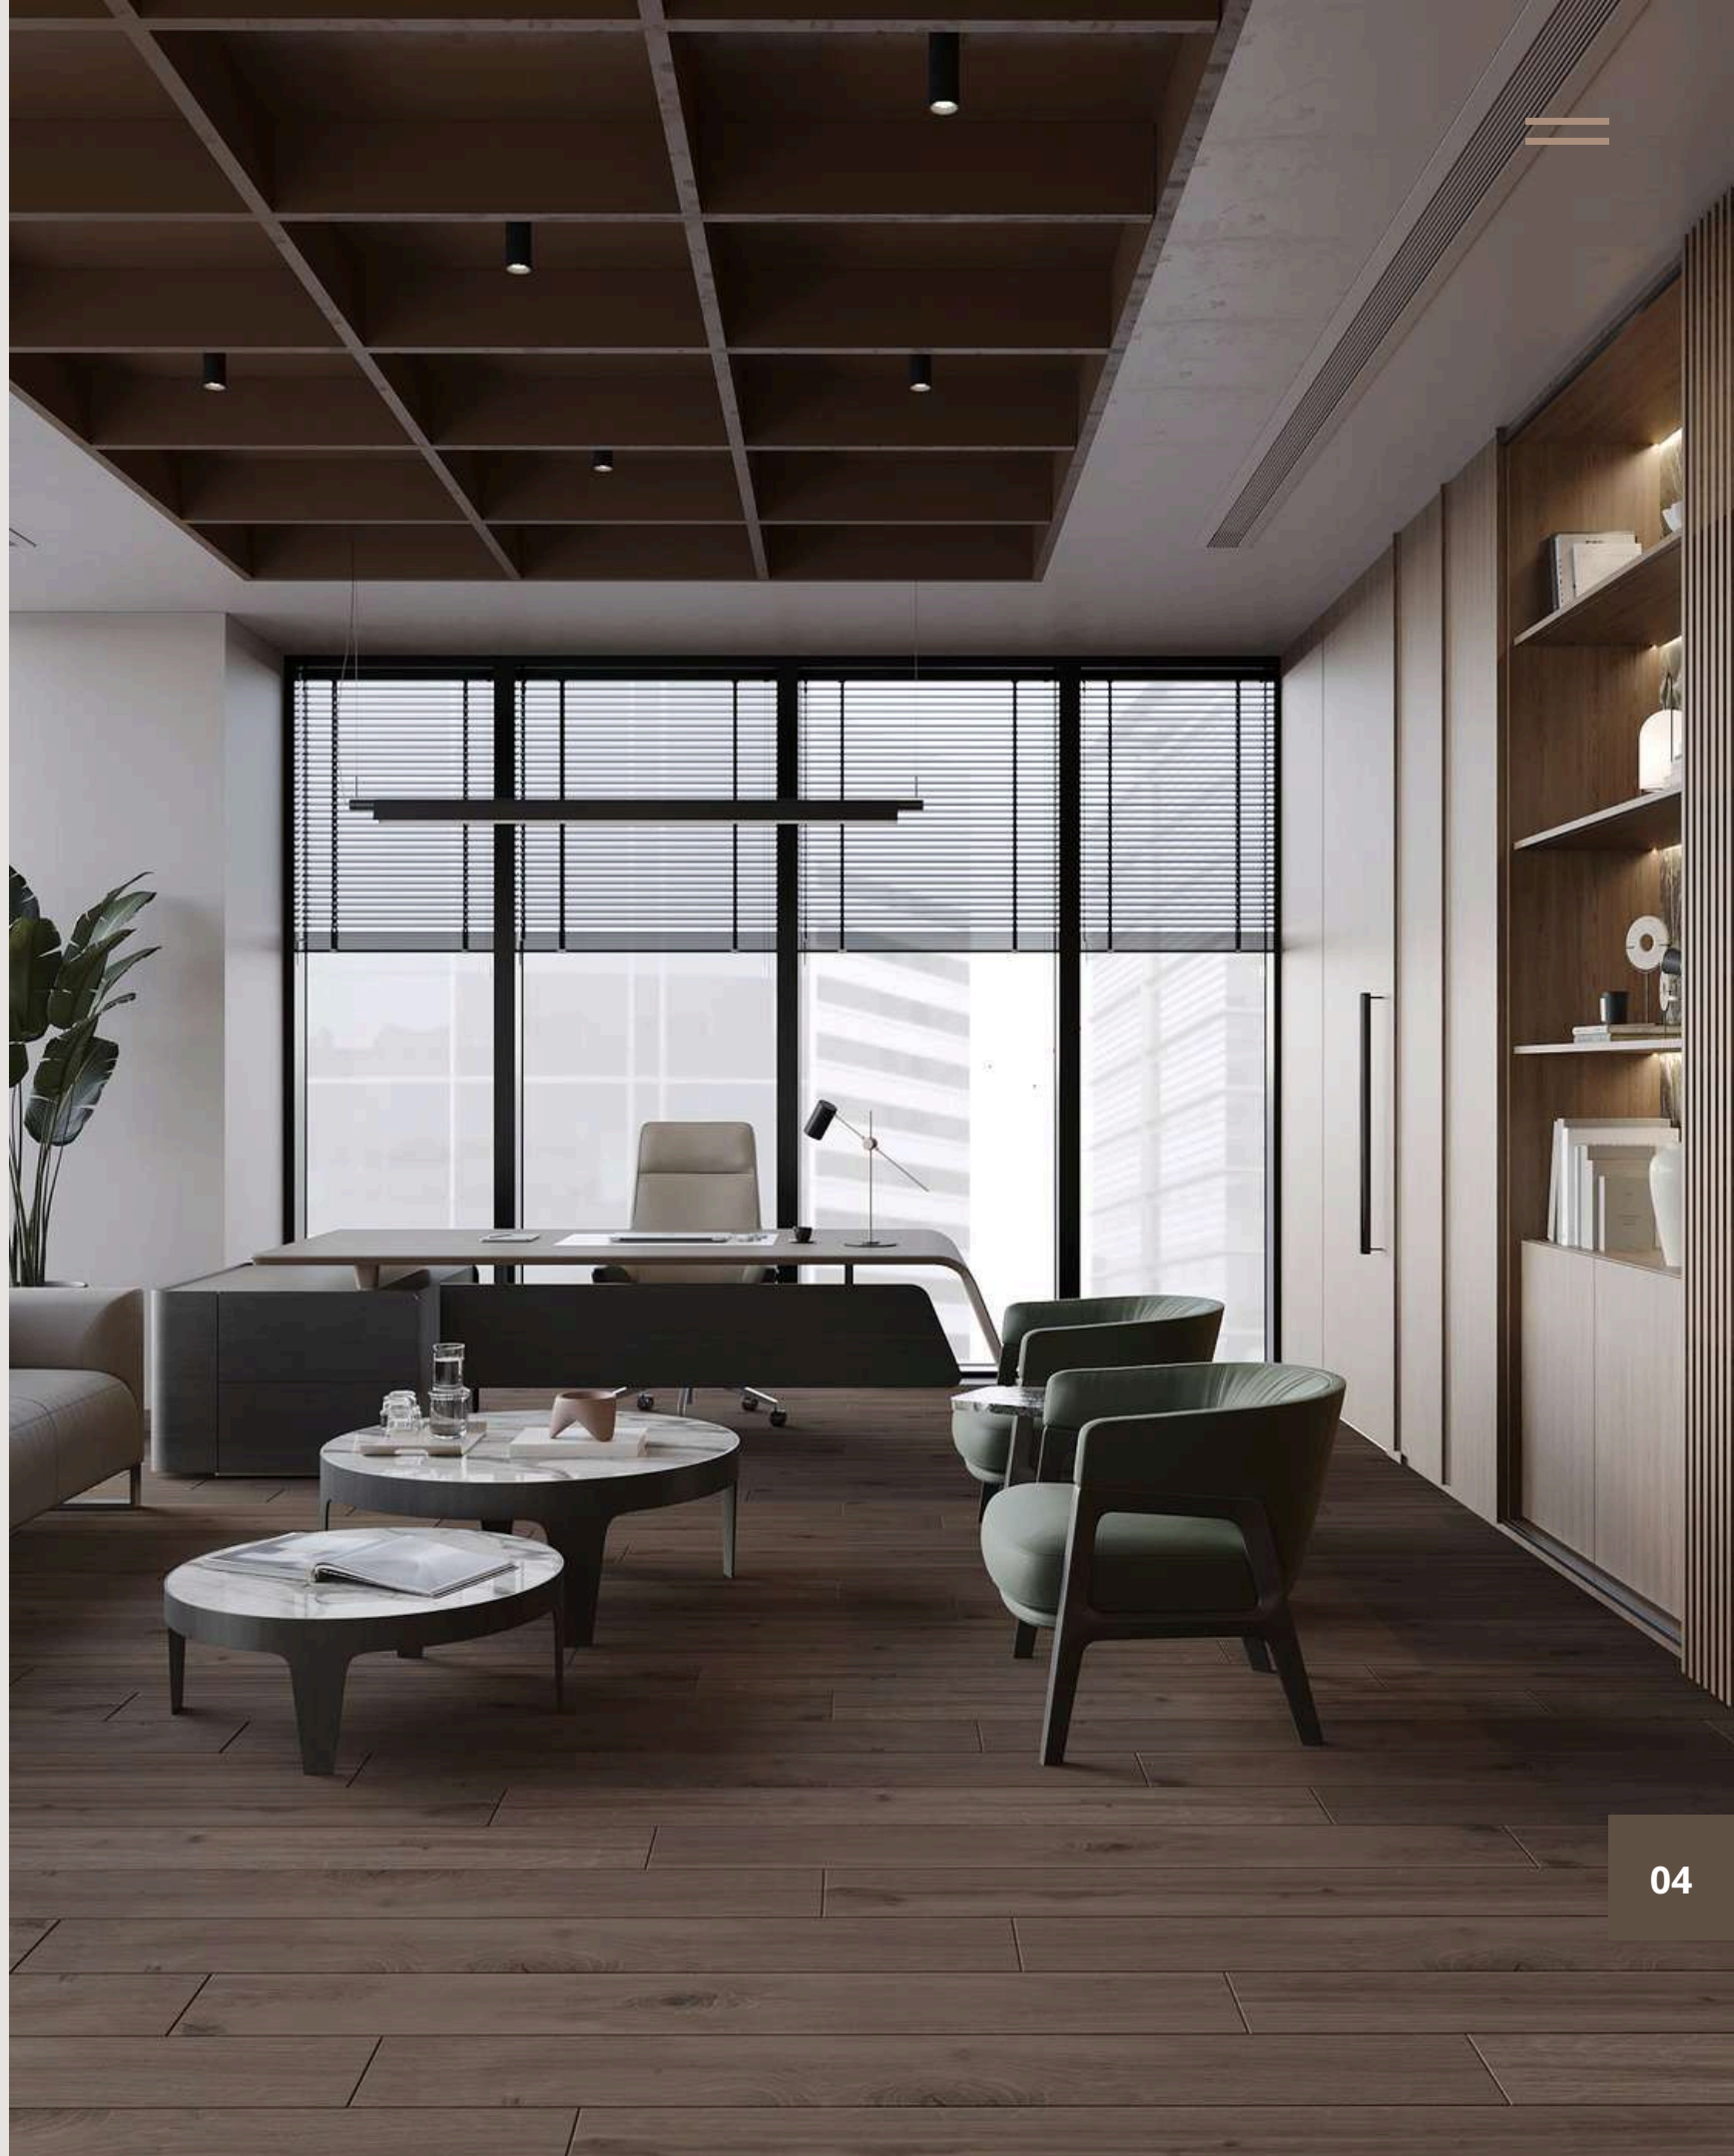

The general manager's office within the EDI project has been designed elegantly and functionally to meet the needs of the modern business world. At the center of the room is a spacious and refined general manager's desk, notable for its minimalist and sleek lines.

Complementing the desk is a high-backed, luxurious office chair that offers both comfort and prestige. In front of the desk, the area designated for hosting guests is thoughtfully arranged to create a spacious environment.

Light brown wooden panels on the walls enhance the room's warmth and create a sophisticated ambiance. These panels seamlessly integrate with well-placed storage solutions, highlighting functionality; both open shelves and closed compartments allow for the organized storage of documents and personal items.

Another striking feature of the room is the use of marble details. The marble surfaces on the walls introduce a luxurious touch to the space. The cool and elegant appearance of the marble establishes a perfect balance with the wooden panels, creating a refined contrast.

Every detail of this space combines professionalism with aesthetics, presenting an impressive and effective workspace.

EDI PROJECT - EKOTEKS

GENERAL MANAGER’S MEETING ROOM

The general manager’s meeting room in the EDI project is located right next to the general manager's office, seamlessly integrating functionality and aesthetics. These two spaces share a harmonious design, creating a cohesive work environment.

The meeting room features a spacious table that accommodates 12 people. The sleek black color of the table adds a modern touch to the overall atmosphere, while the surrounding light-colored leather chairs provide both comfort and aesthetic balance. This combination not only creates a professional appearance but also offers a pleasant setting for guests.

The use of light-colored wood accents on the walls adds a natural warmth and harmonizes beautifully with the room’s modern lines, fostering a welcoming atmosphere.

The space is equipped with both open and closed storage options. The green-toned marble details in the storage areas add a sophisticated touch to the overall design. This aesthetic element combines functionality and visual appeal, transforming the meeting room into an inspiring environment rather than just a workspace.

In conclusion, the meeting room in the EDI project effectively combines elegance, functionality, and harmony, providing an impressive working environment.

EDI PROJECT - EKOTEKS

EXECUTIVE BOARDROOM

The executive boardroom in the EDI project features a sophisticated and elegant interior design that meets the needs of the modern business world. The center of the room is defined by a large executive desk, which not only provides a spacious workspace but also serves as a refined focal point that elevates the room's prestige. The arrangement of the furniture around the desk reflects a balanced use of space, ensuring that every corner of the room is utilized efficiently.

For hosting guests, a large brown leather sofa has been placed, enhancing the room's sophisticated atmosphere. The leather material symbolizes both comfort and luxury, while also offering durability for long-term use. The brown and complementary tones of the furniture blend harmoniously with the room's overall color palette, creating a warm and inviting ambiance.

The storage areas in the room, both open and closed, are designed for functionality and are enriched with marble detailing. The elegant texture of the marble enhances the room's sophisticated ambiance and creates a visually striking effect. The beige-toned storage units complement the modern design, helping to maintain a sense of balance throughout the space.

Black wood wall panels provide a striking contrast while also adding a touch of warmth to the room. The wood's natural texture harmonizes with the room's overall luxurious feel, lending character to the space. The use of black signals a refined, serious work environment, but the natural appearance of the wood balances the colder undertones, adding depth and warmth.

This design not only meets the requirements of a professional executive boardroom but also creates a refined and contemporary atmosphere. Every detail is carefully crafted to blend style and functionality, offering its users a comfortable and prestigious experience.

EDI PROJECT - EKOTEKS

EXECUTIVE BOARDROOM'S MEETING ROOM

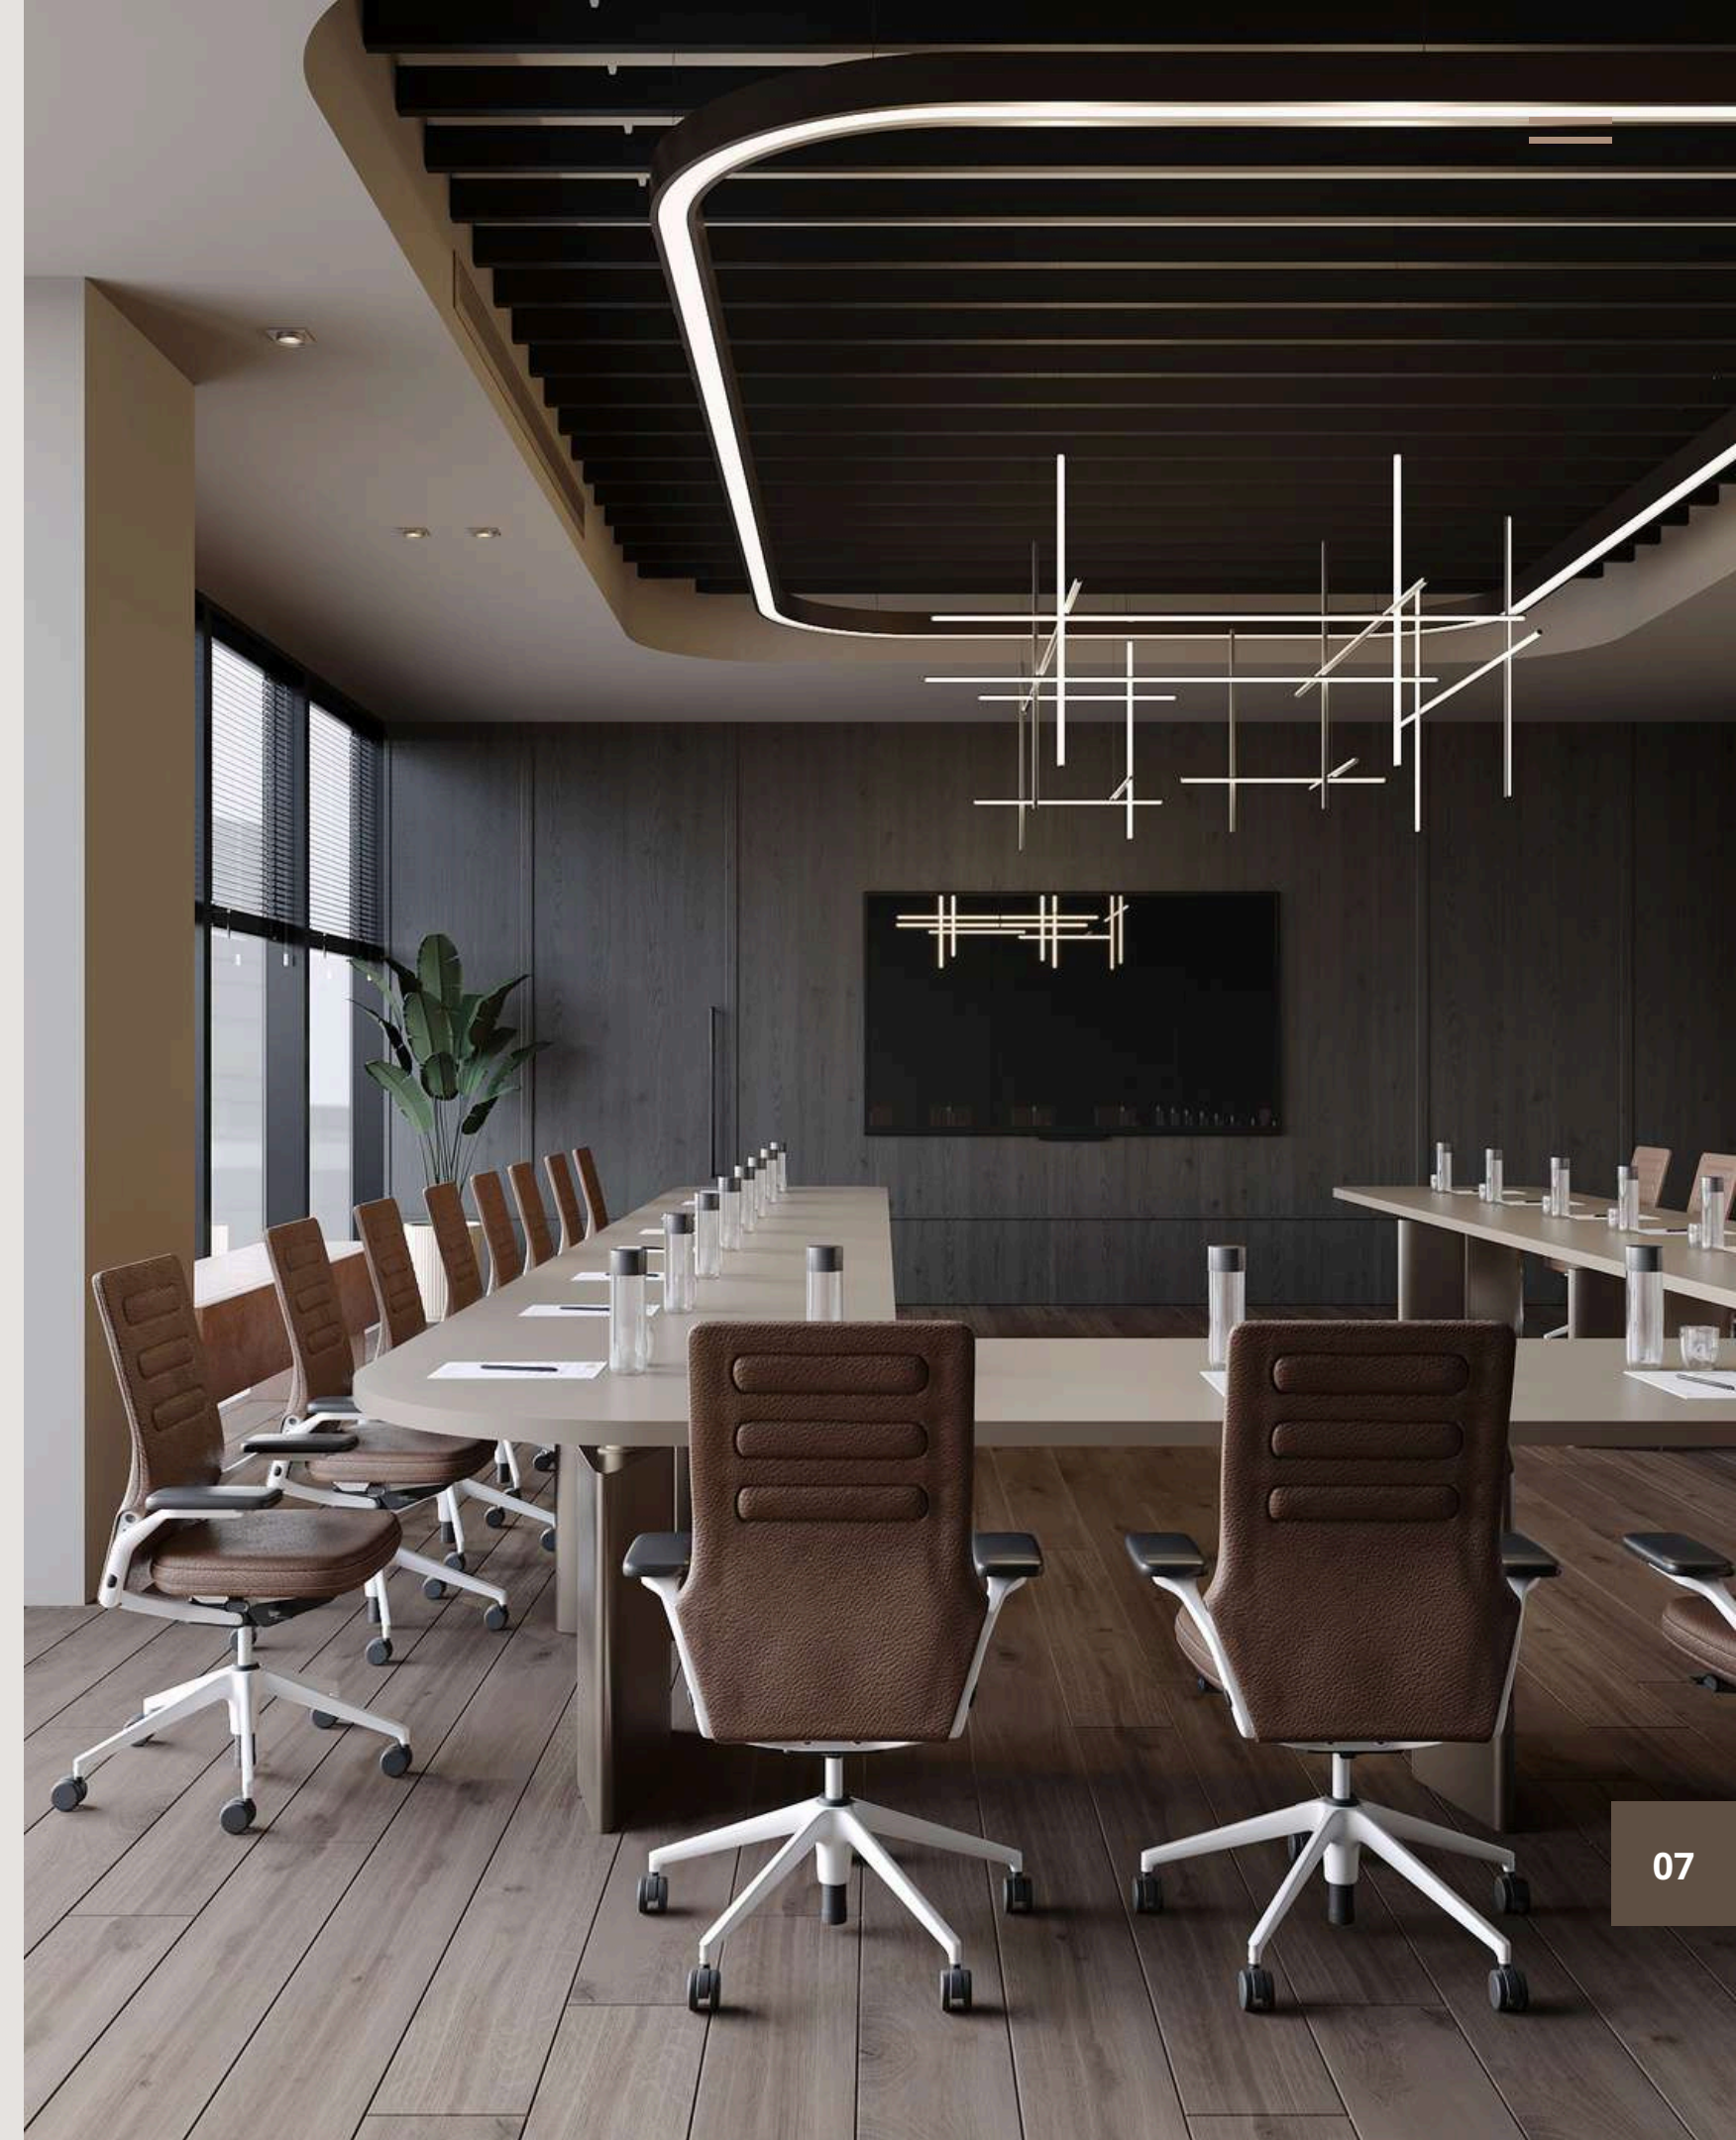

The spacious, well-lit executive boardroom's meeting room in the EDI project creates an atmosphere that embodies the dynamics of modern business life.

The centerpiece of the room is a large U-shaped table surrounded by ergonomically designed chairs. The brown leather chairs around the table provide comfortable seating and add an elegant touch to the environment.

The walls feature black wood panels that enhance the modern and sophisticated look of the room. These panels stand out as an aesthetic element while also serving a sound-dampening function.

The ceiling is equipped with acoustic panels that minimize unwanted echoes during meetings, creating a clearer and more efficient communication environment.

The color palette is highly harmonious, with warm browns blending seamlessly with black and natural wood textures to create a balanced whole. This design prioritizes not only functionality but also aesthetic beauty, providing an inspiring environment for participants.

EDI PROJECT - EKOTEKS

QUALITY UNIT ROOM

The design of the quality unit room in the EDI Project has been carefully planned to enhance efficiency and collaboration.

At the center of the room is a 4-person workspace, ideal for team members to work together. The separators on either side of the desk provide privacy while maintaining an open and inviting atmosphere.

The room is equipped with both open and closed storage solutions. Open shelves allow for easy access to frequently used materials, while closed cabinets provide a way to keep documents and equipment organized and secure. The cabinets are designed with a modern aesthetic, thoughtfully chosen to complement the overall ambiance of the room.

This design merges functionality with aesthetics, aiming to streamline the daily workflow of quality unit employees. It creates an environment conducive to creative thinking and encourages collaboration, thereby providing an ideal foundation for enhancing team performance.

EDI PROJECT - EKOTEKS

TECHNICAL MANAGER’S OFFICE

The technical manager’s office in the EDI project features a modern design that seamlessly blends functionality and aesthetics. The use of light color tones throughout the space helps create a sense of openness and airiness, making the room feel more spacious. These light tones allow daylight to flood the space, rather than blocking it, contributing to a bright and welcoming atmosphere.

At the center of the room, a sleek and functional desk serves as the technical manager’s workspace. The desk design is modern and minimalist, characterized by clean lines that stand out. Surrounding the desk, ergonomically placed armchairs provide a comfortable setting for receiving guests or holding meetings. These chairs not only offer a pleasant seating experience but are also designed to maintain the overall aesthetic harmony of the room.

To enhance the functionality of the space, there are closed storage areas strategically integrated into the design. These storage units are arranged in a minimalist style, simple yet elegant, ensuring that the room remains organized and everything is neatly stored without compromising on style.

Overall, the room is designed not only to meet the technical manager’s functional needs but also to create a calm and professional atmosphere. The room’s bright ambiance, stylish details, and well-organized layout work together to achieve a balanced and efficient work environment.

EDI PROJECT - EKOTEKS

TECHNICAL MANAGER'S ASSISTANT OFFICE

The design of the technical manager's assistant office in the EDI Project flawlessly combines functionality and aesthetics, creating a productive and comfortable work environment. This space strikes a perfect balance between professionalism and relaxation, optimized through thoughtfully planned details.

At the heart of the room, two individual desks are thoughtfully positioned to cater to the needs of each person, ensuring an efficient and focused workspace. The plant partition between the desks not only acts as a natural visual divider but also nurtures a connection with nature, fostering a serene and refreshing atmosphere. This green element enhances the room's sense of openness and tranquility.

The light green design panels on the wall behind the desks add visual dynamism to the space, while also providing a calming effect. The green tones create a focused and relaxing environment, while the sleek design of the panels reinforces the modern aesthetic of the room.

With its modern lines, natural elements, and a carefully selected color palette, this design creates the ideal environment for employees to concentrate and work effectively. Thoughtful functional arrangements ensure that the space is both professional and comfortable, perfectly balancing productivity and well-being.

EDI PROJECT - EKOTEKS

ACCOUNTING MANAGER'S OFFICE

This design adopts a modern approach that prioritizes both elegance and functionality. In the accounting manager's office of the EDI project, the interior design emphasizes minimalism and practicality, creating a sophisticated and efficient workspace.

The choice of light tones throughout the room contributes to a bright, airy atmosphere, with a carefully considered color palette that ensures harmony across all elements. Subtle, natural hues like soft beige and warm coffee tones dominate the space, fostering a calming and serene environment.

The plant wall adds an aesthetic touch and reinforces the room's connection to nature. The lush greenery brings freshness and tranquility to the space, while highlighting the thoughtful integration of natural elements within the interior.

This office strikes a perfect balance between functionality and visual appeal. The design seamlessly blends minimalism with natural elements, creating a space that is both professional and inviting. The harmonious color scheme, carefully selected materials, and the plant wall transform the accounting manager's office into more than just a workspace—it becomes a calm, welcoming environment conducive to both productivity and relaxation.

EDI PROJECT - EKOTEKS

ACCOUNTING DEPARTMENT OFFICE

The accounting department office in the EDI project has been designed to provide a functional and stylish working environment. The room features a workspace for six individuals, with dividers placed between each workstation to create personal areas. This arrangement promotes focus and productivity for each employee. The use of dividers not only provides a visual boundary but also ensures privacy, allowing everyone to work more comfortably and efficiently.

One of the most notable features of the office is its spacious, enclosed storage area. This storage solution offers an organized and discreet space for the accounting department's documents and materials. The storage area is strategically placed so that it does not interfere with the other activities within the room, ensuring ease of use.

The color palette of the office is dominated by beige and coffee tones. These colors create a warm atmosphere while maintaining a professional and calm ambiance. The beige tones contribute to a sense of openness and lightness throughout the room, while the coffee tones add warmth and depth. This harmonious color scheme enhances the overall aesthetic, giving the room a sophisticated and balanced appearance.

In conclusion, the accounting office successfully combines functionality and aesthetics in its design. The choice of materials and the color palette work in harmony to create a professional environment that supports both comfort and efficiency.

EDI PROJECT - EKOTEKS

KITCHEN - SOCIAL AREA

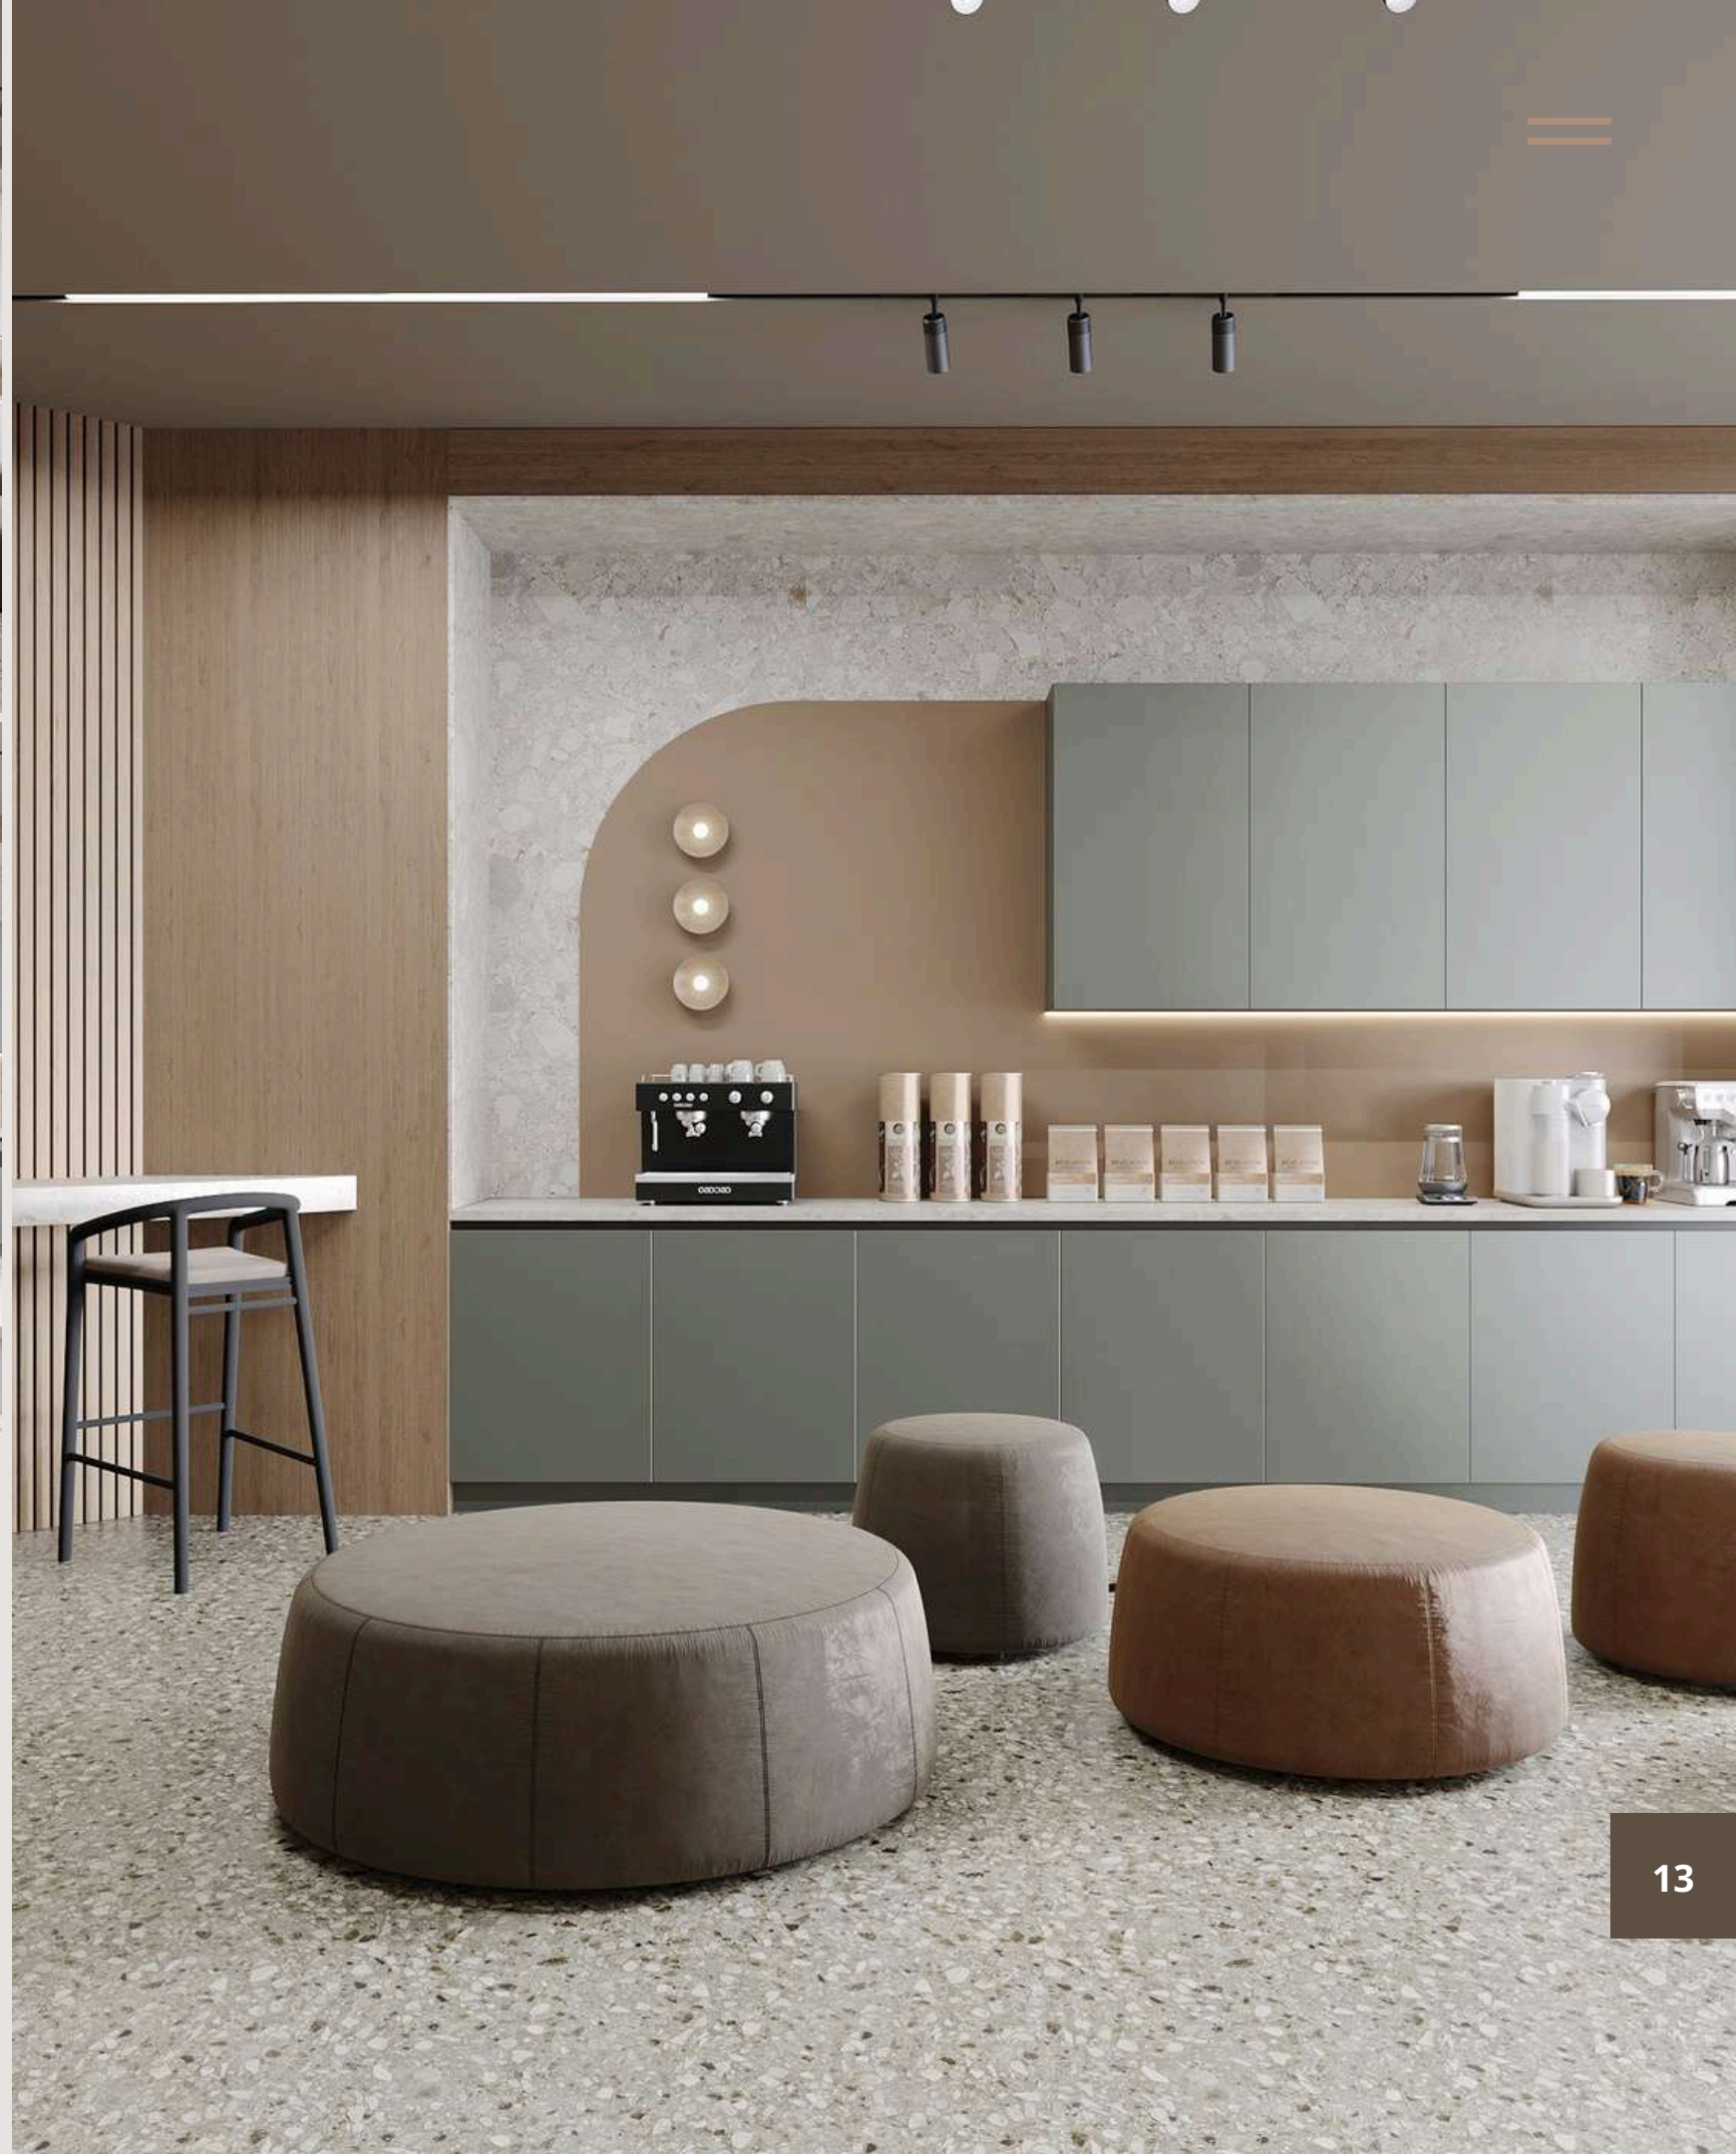

The social area of the EDI project is designed to create a warm and inviting atmosphere. The combination of natural materials and soft colors creates a calming environment that welcomes users in a relaxing manner. The use of wooden elements and pastel tones establishes a peaceful balance within the space.

The seating poufs in the central area provide visitors with the opportunity to socialize and interact comfortably, while also offering flexible use of space. This arrangement fosters a dynamic environment that encourages social interaction.

Another notable feature is the plant wall, which brings a refreshing touch of nature to the space and offers an organic element. The wooden panels not only add visual warmth but also contribute a modern aesthetic, creating depth and elegance when combined with the other elements.

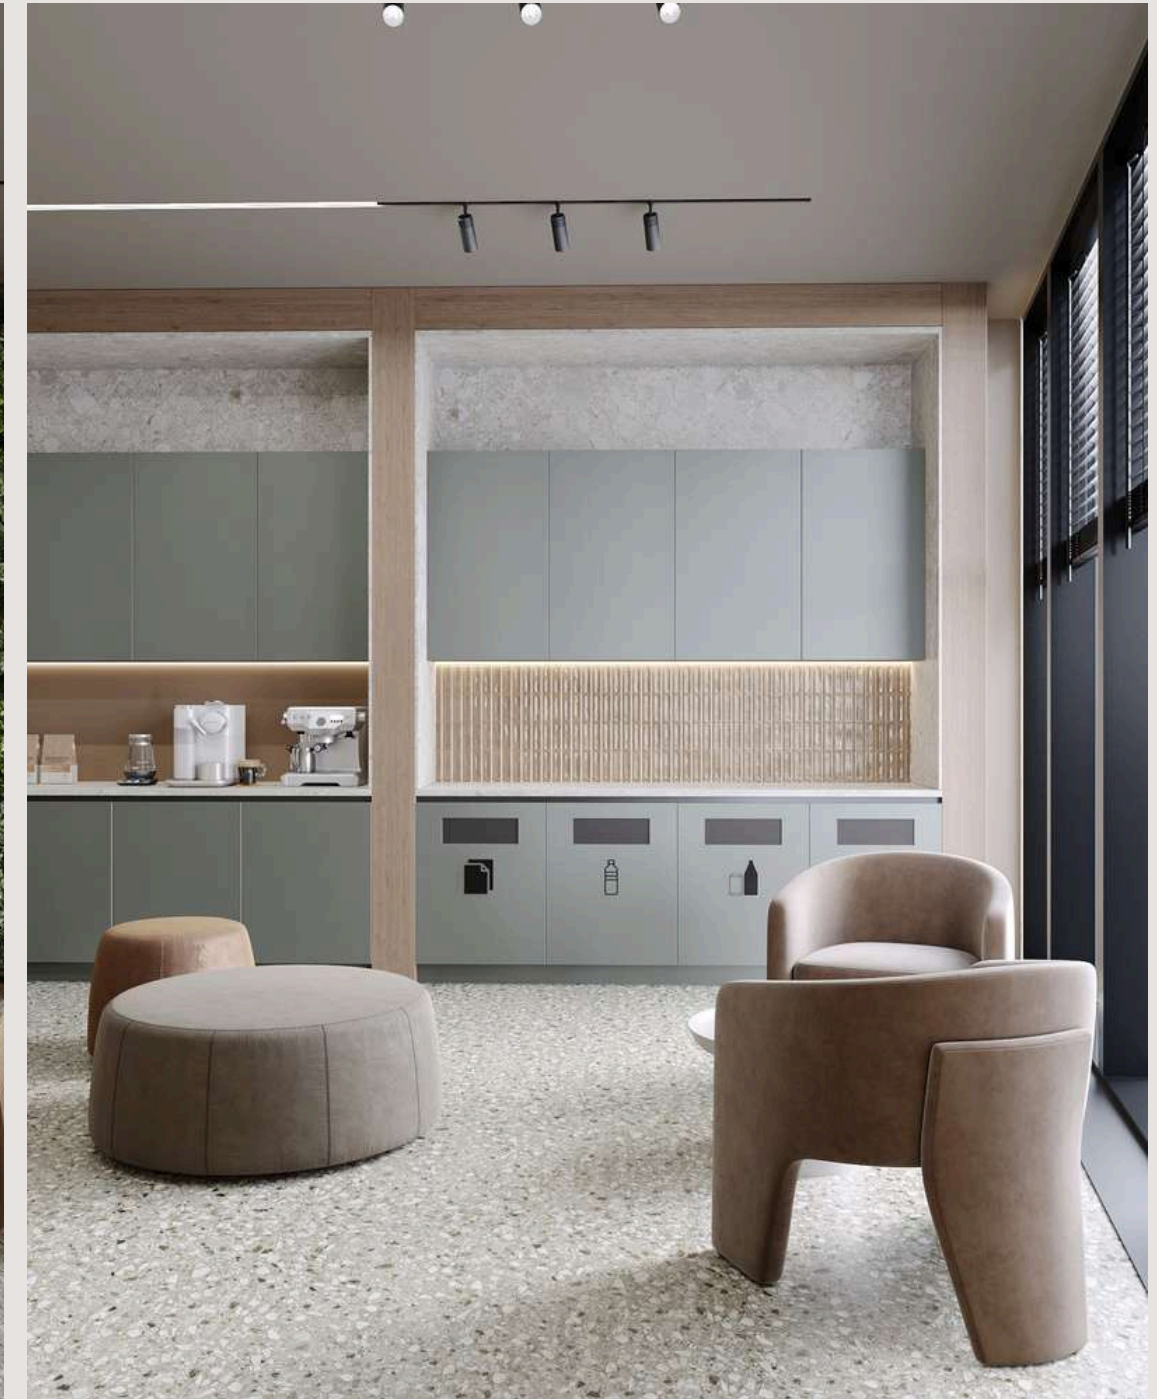

The oval-shaped seating area ensures a fluid and soft flow within the space. This design fosters a cozy and intimate atmosphere, allowing users to feel at ease in a tranquil setting.

The use of wooden materials and eco-friendly features emphasizes the concept of sustainable living. The soft color palette complements these natural elements, creating visual harmony. Overall, the design aims to create a soothing and peaceful environment that prioritizes social interaction and relaxation.

EDI PROJECT - EKOTEKS

KITCHEN - SOCIAL AREA

EDI PROJECT - EKOTEKS

CIRCULATION AREA

The circulation area of the EDI project has been designed to allow users to move through the building with ease. To achieve a more organic flow, sharp lines have been avoided and oval glass forms have been incorporated into the design. These curved elements contribute to a softer, more inviting atmosphere while visually enhancing the sense of spaciousness within the space.

Plants play a key role in bringing nature into the interior, creating an environment that encourages users to enjoy their surroundings. These natural elements have been thoughtfully integrated to not only maintain visual harmony but also provide a more peaceful and healthy ambiance. The plants soften the modern lines of the architecture, adding a natural touch to the circulation area.

Design panels are strategically used to animate the walls and surfaces, serving both aesthetic and functional purposes. The materials and colors of the panels reinforce the modernity of the space while adding dynamism. The panel designs are visually engaging and contribute to the overall functionality of the interior.

In this design, the combination of elegant lines, organic forms, and natural elements ensures that the space is both visually appealing and user-friendly. Additionally, the fusion of modern functional arrangements and aesthetic details creates an environment that is not only conducive to work but also visually satisfying.

EDI PROJECT - EKOTEKS

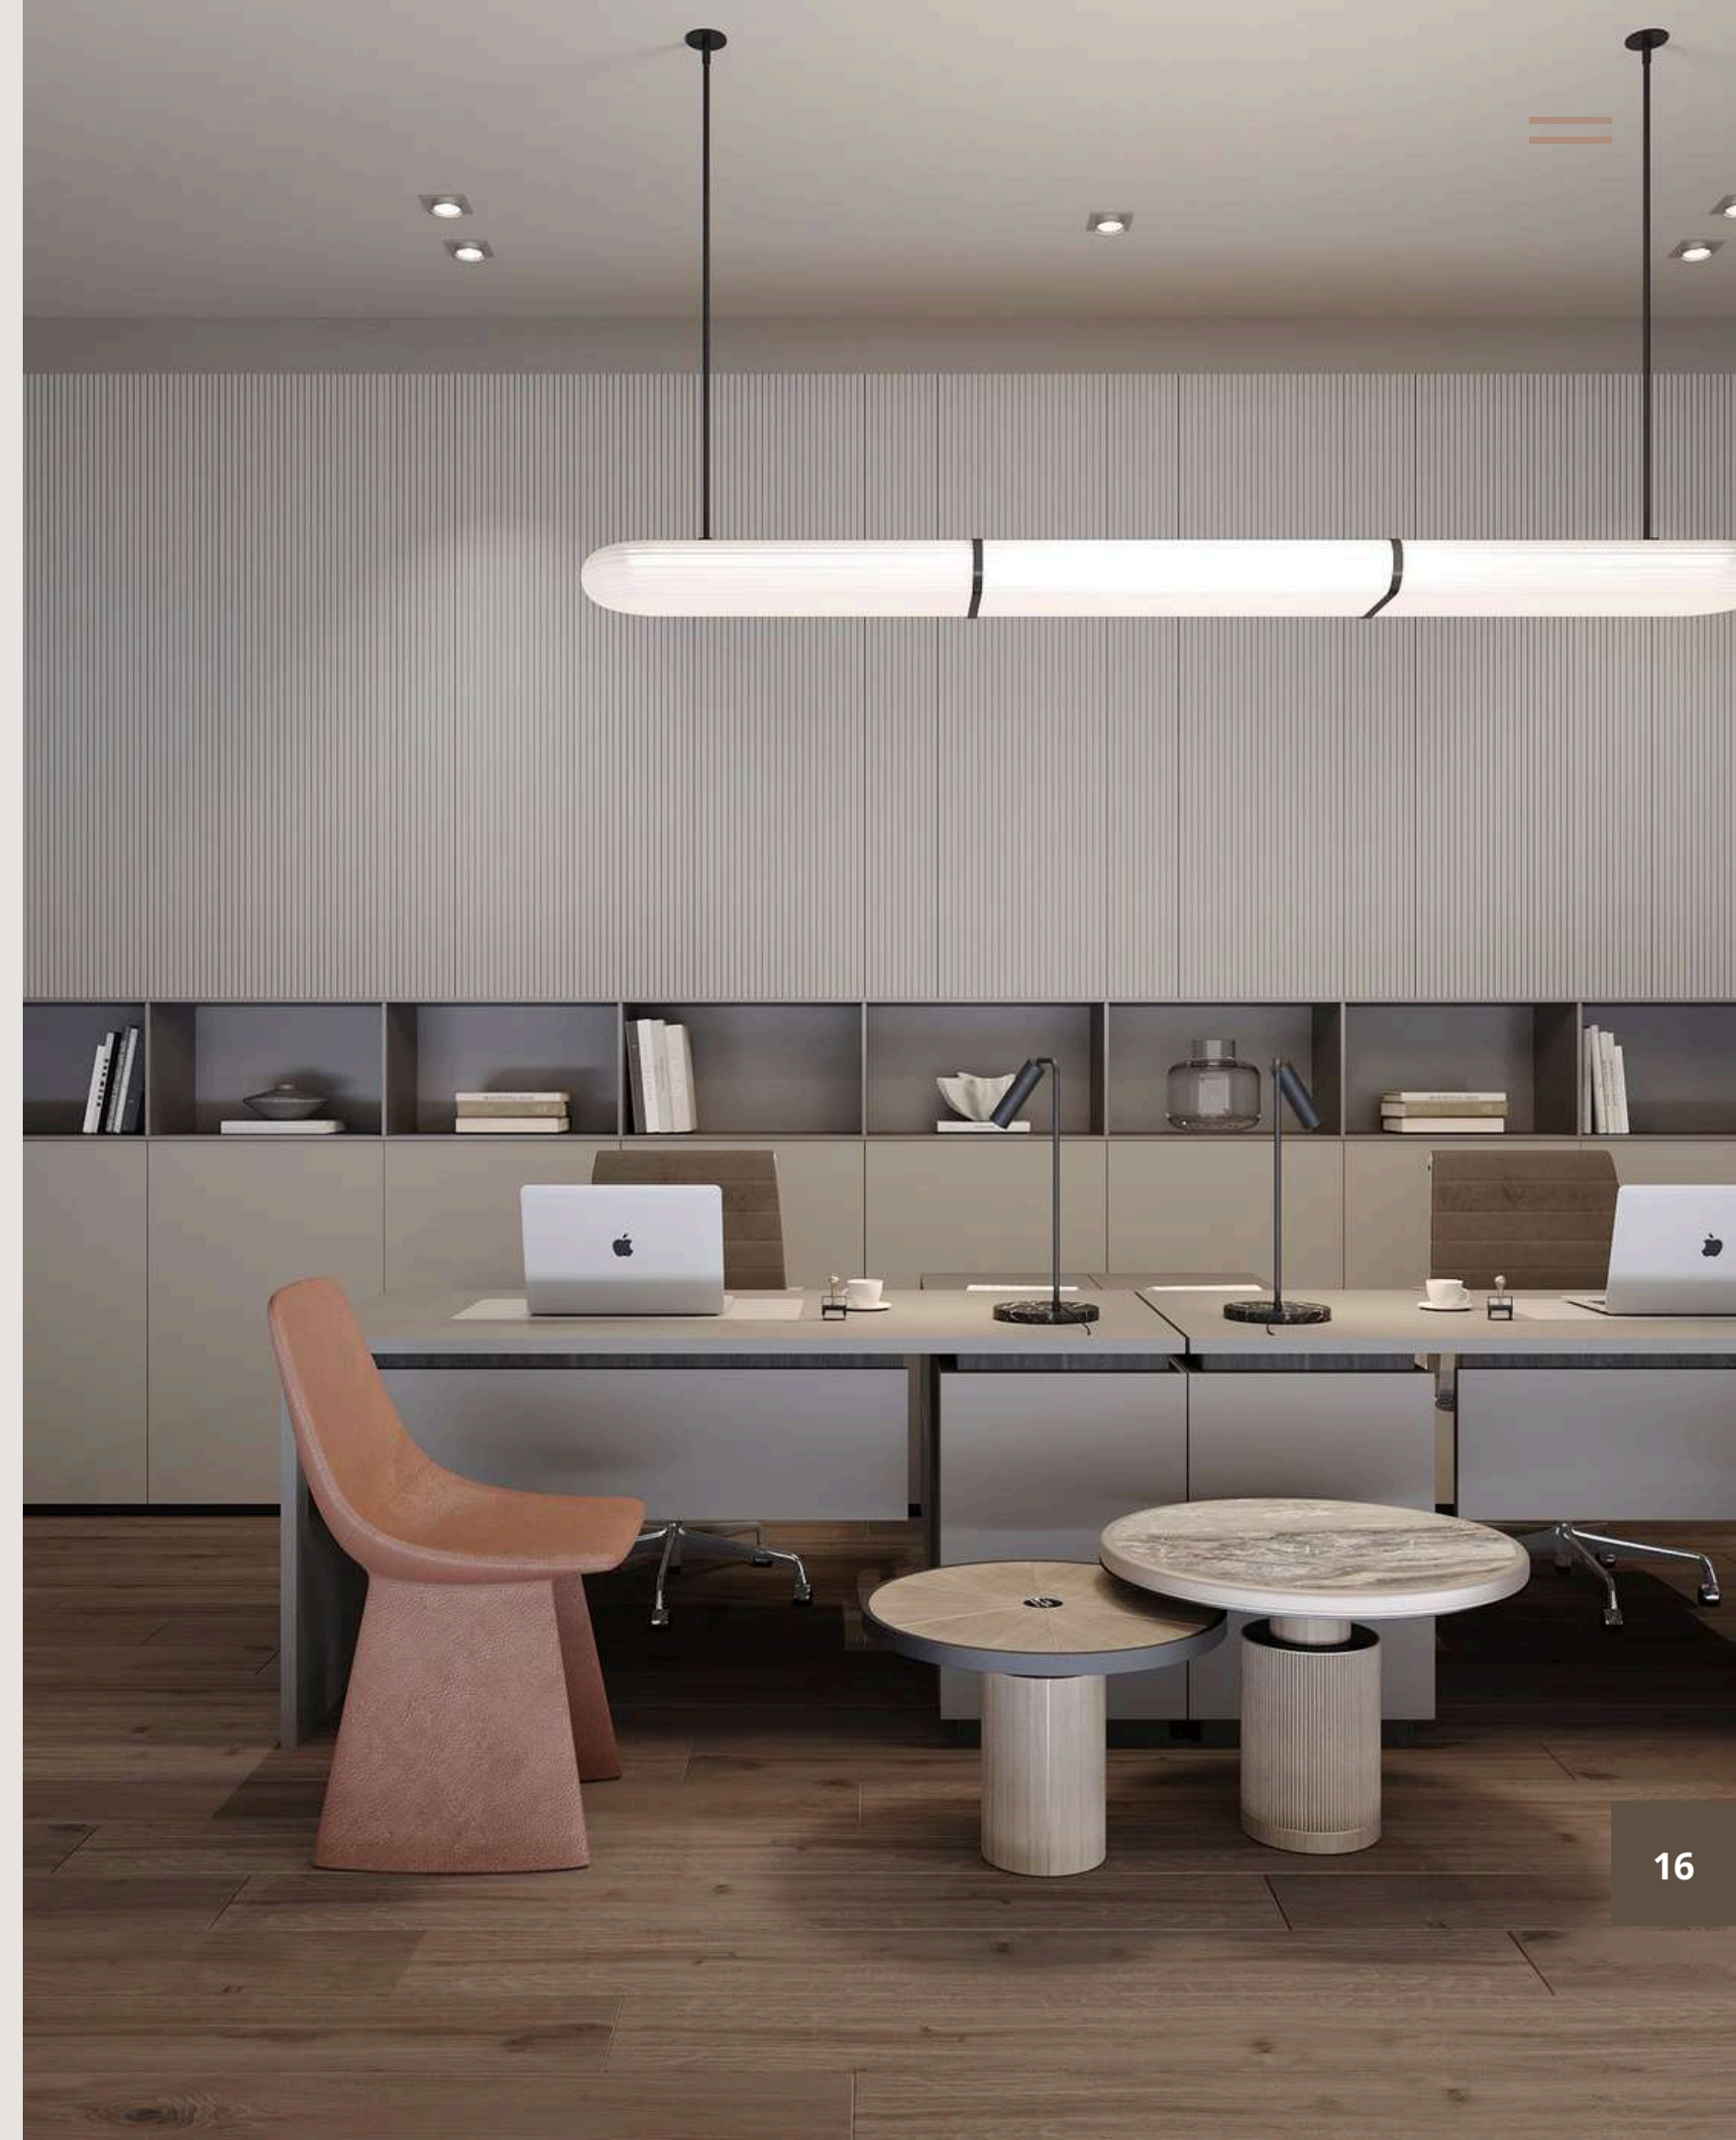

HUMAN RESOURCES SECTION

The Human Resources section of the EDI project offers a spacious and functional area where two people can work comfortably. Every detail in the design has been thoughtfully considered, creating a user-friendly environment.

Ample storage solutions maintain order within the workspace, ensuring that tasks are always completed in an organized and efficient manner.

The color tones in the room harmonize with each other, creating a peaceful and serene atmosphere in every corner.

This stylish and functional design serves as an excellent source of inspiration for those seeking both aesthetics and productivity in office spaces.

EDI PROJECT - DDM

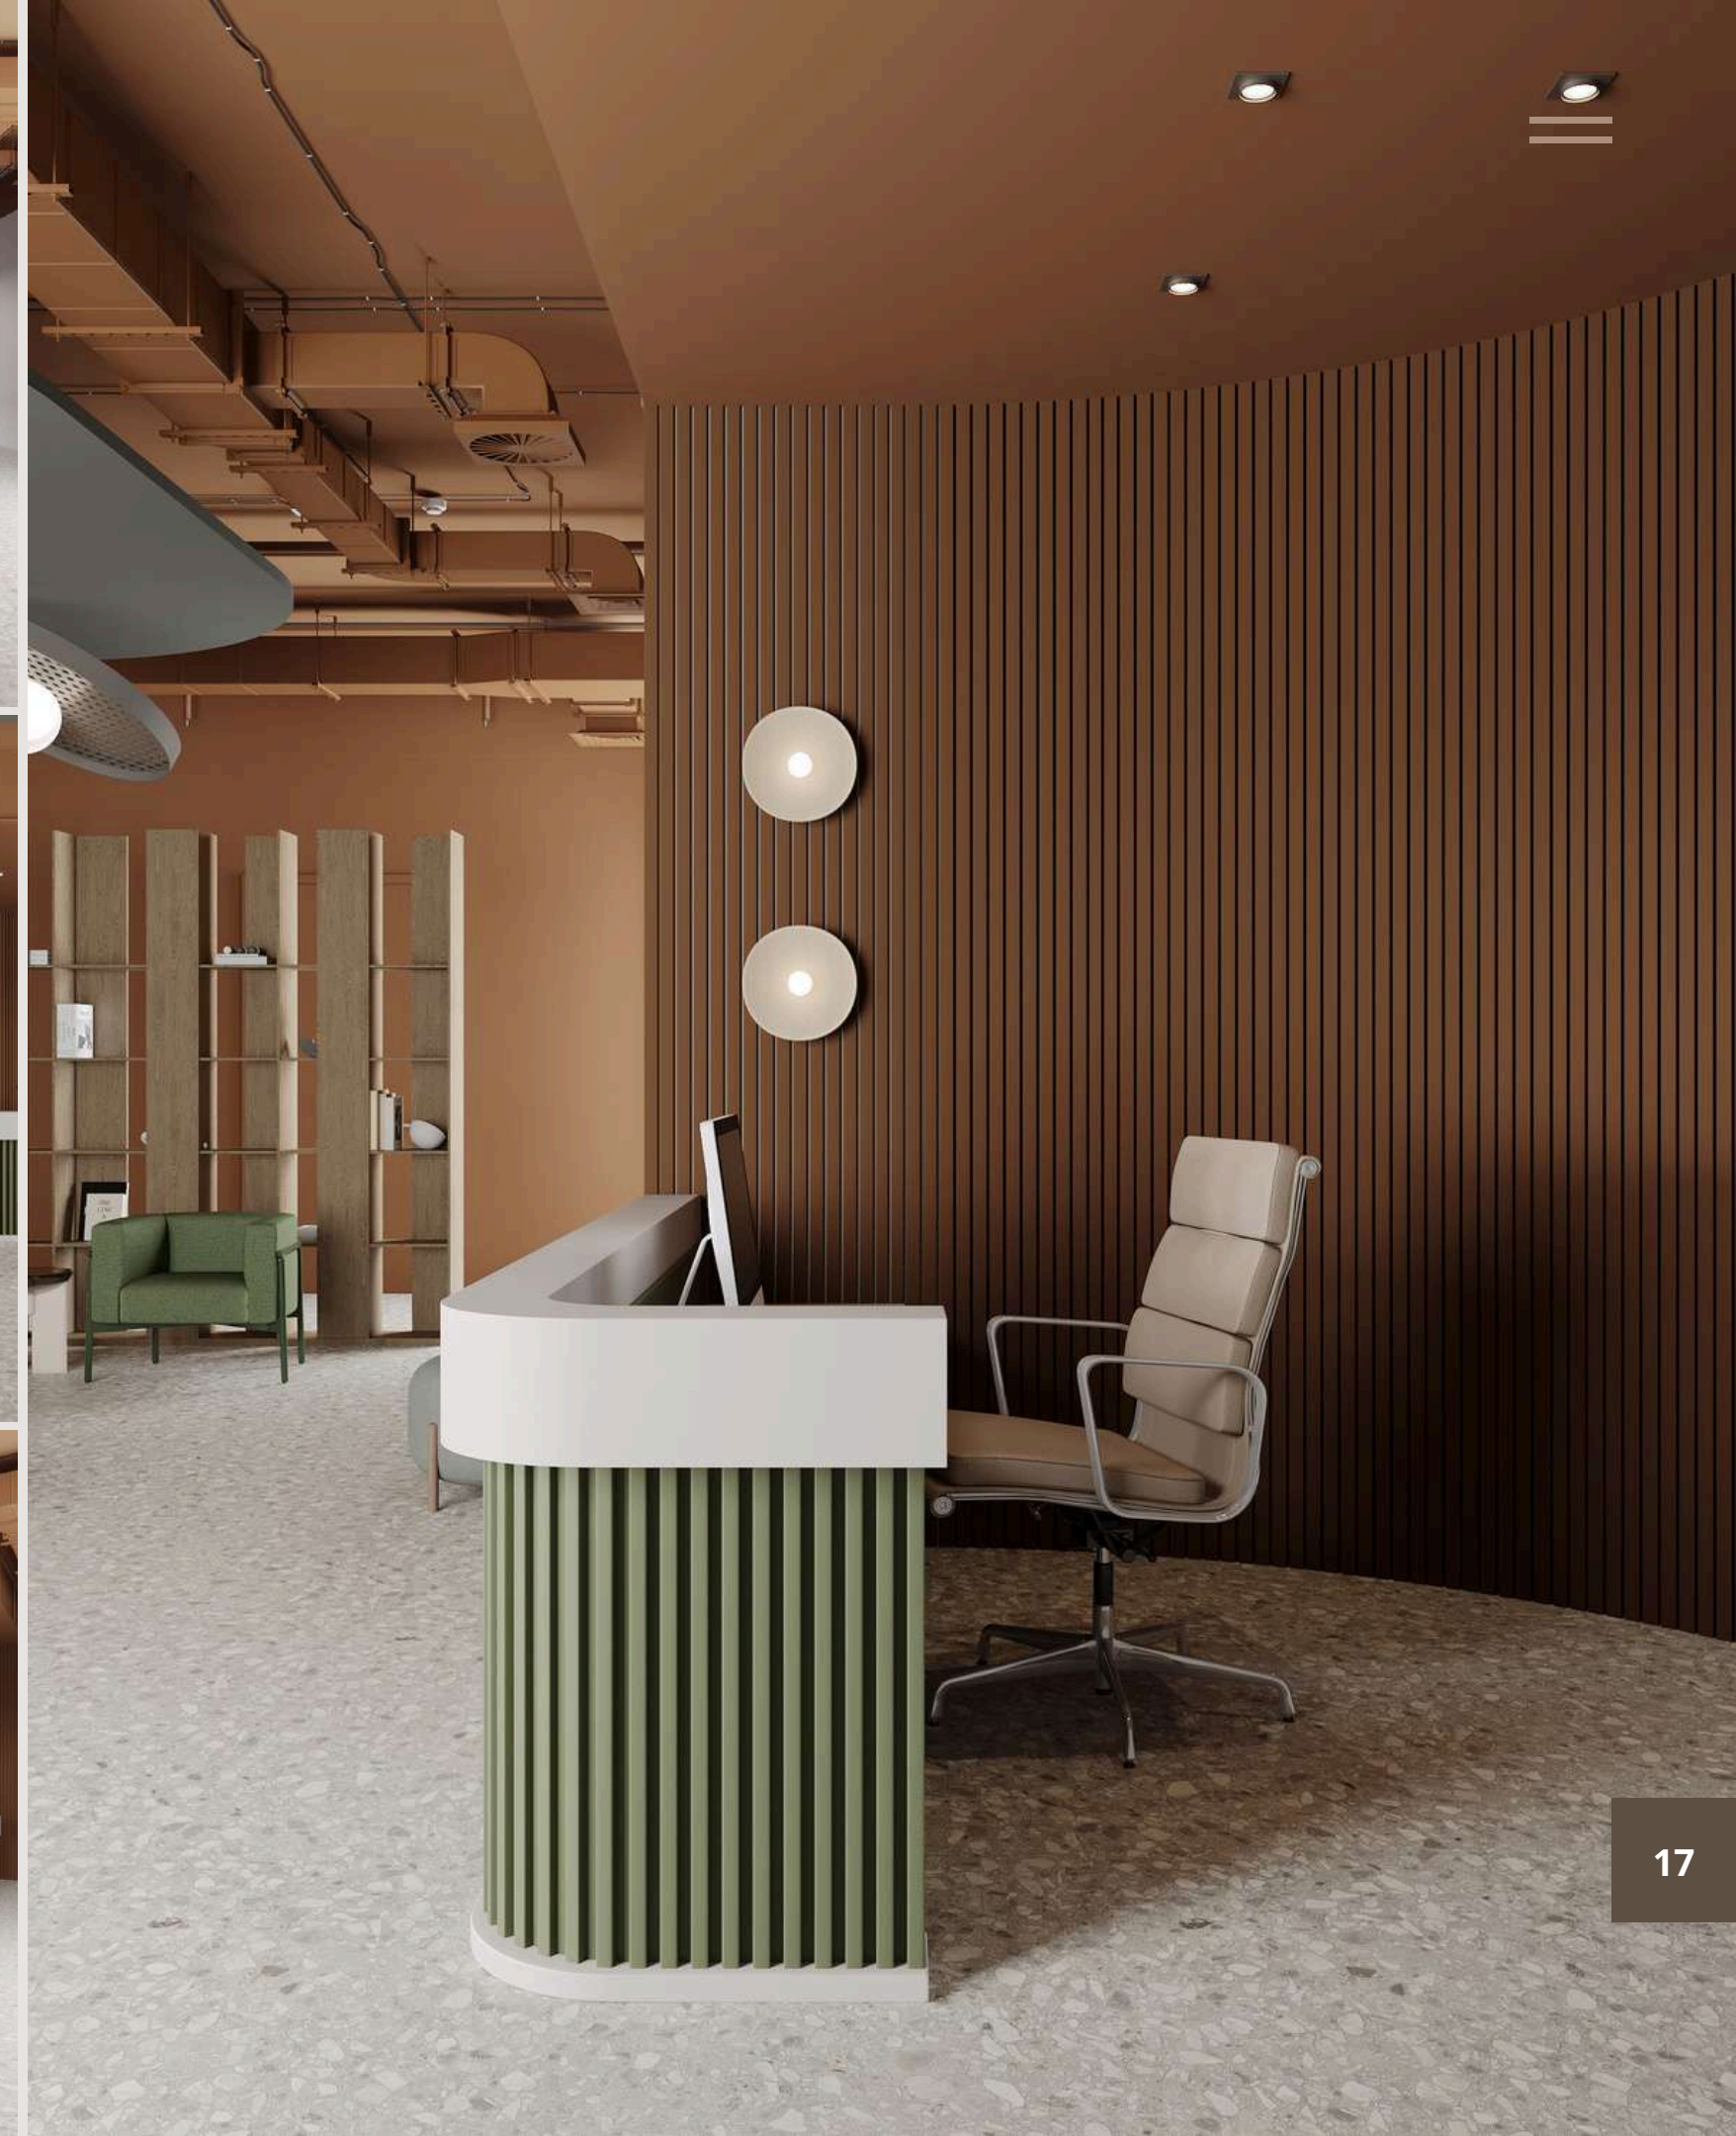

RECEPTION AREA - 01

This project features a reception area inspired by the energetic and creative atmosphere of contemporary office environments. Designed not only as a welcoming point but also as an experiential space that reflects the brand's identity and corporate culture, the area aims to make a lasting impression from the very first moment.

The use of soft oval forms brings a sense of fluidity and smooth transition throughout the space, while vibrant touches of orange highlight the dynamic character of the design. These energetic elements are harmoniously balanced by the calming presence of green, creating an atmosphere that feels both lively and serene. This thoughtful color palette contributes to an environment that is not only visually appealing but also psychologically balanced.

Comfortable poufs in the waiting area offer visitors a cozy and relaxing seating experience, while inspirational wall art reinforces a sense of creativity and openness. These design details not only enhance the comfort of the space but also communicate the vision and values of the brand.

From the moment one steps into the office, the space radiates a dynamic energy that encourages the free flow of creative thinking. This reception area has been thoughtfully designed to address the functional and aesthetic needs of a modern workplace, reflecting a user-centric approach that supports both productivity and well-being.

EDI PROJECT - DDM

WAITING AREA

The office's waiting area stands out with its spacious and open layout, while the ceiling's striking lighting and acoustic details add depth and elegance to the space. Not only functional but also visually captivating, the ceiling becomes the most prominent feature of the room.

The stylish partitioning shelf, combined with wooden accents and a harmonious mix of green, orange, and anthracite tones, creates a modern and soothing atmosphere.

EDI PROJECT - DDM

SEATING AREA

The seating area in the circulation space, designed with the energetic combination of blue and orange, inspires employees for both relaxation and productive meetings.

The specially designed capsules in the seating area prioritize comfort while enlivening the space with the dynamic energy of the colors.

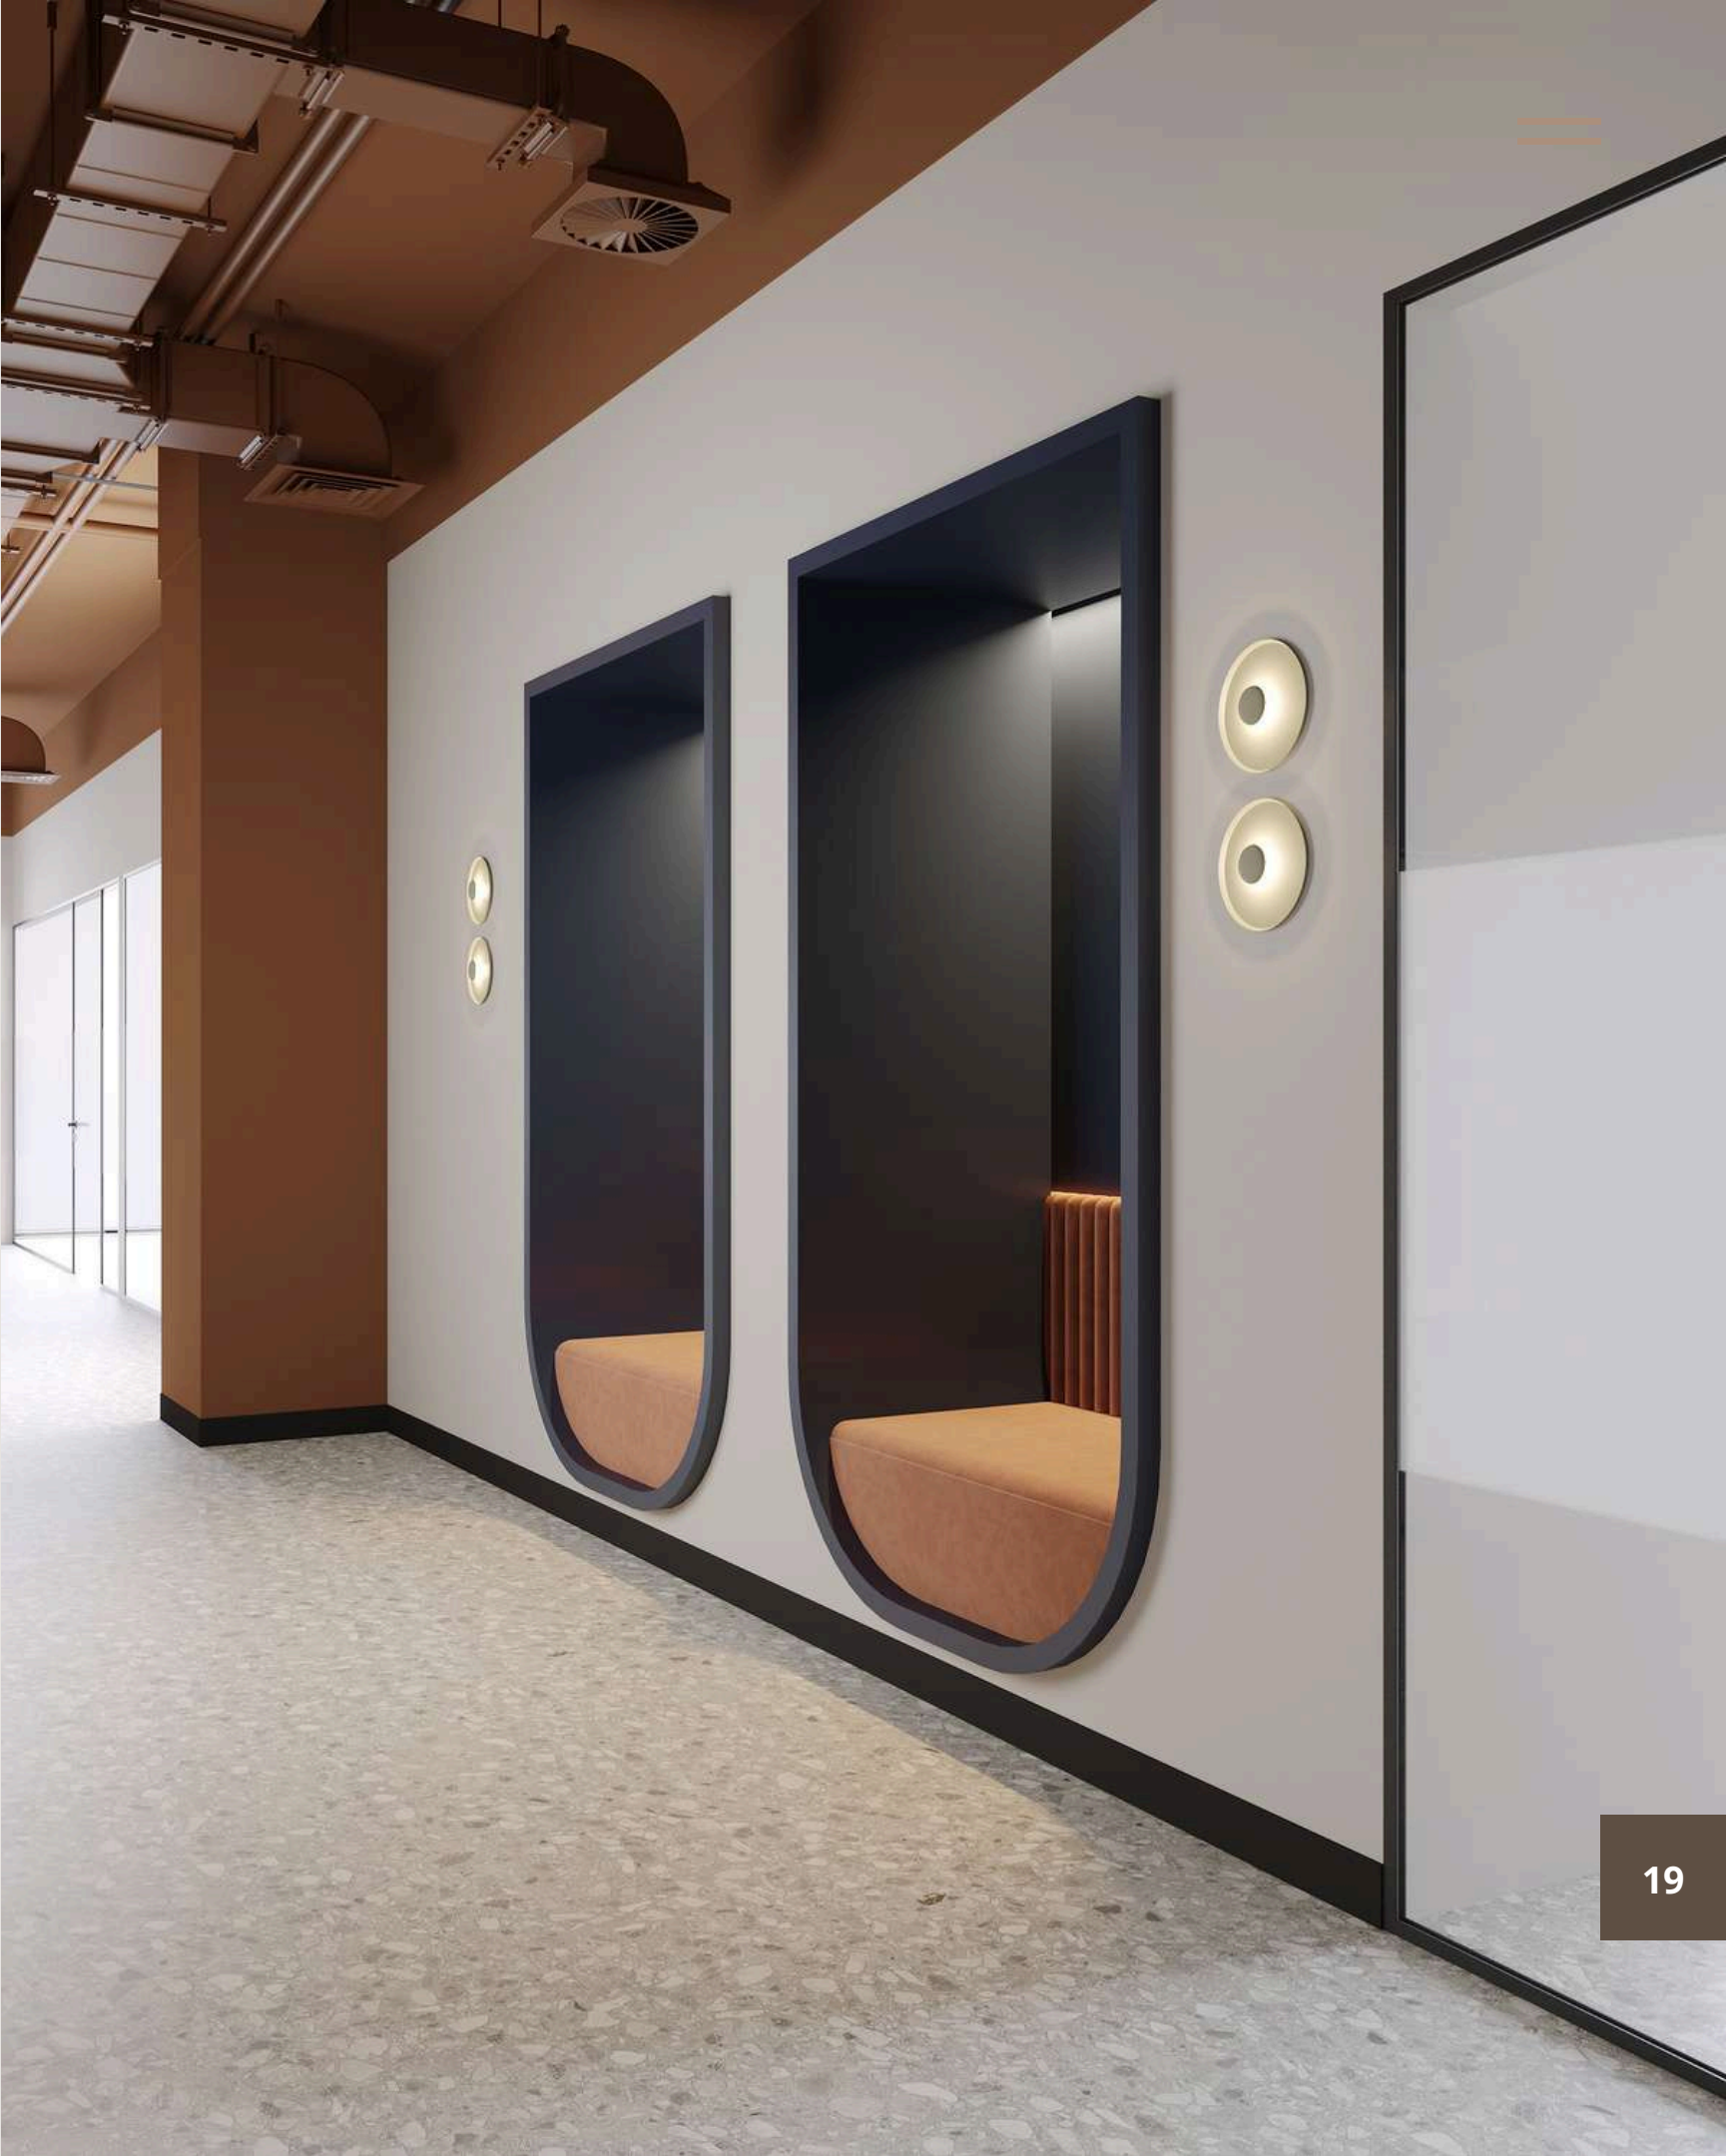

Thoughtful use of color in common areas contributes to enhanced work efficiency.

INDIVIDUAL CONVERSATION AREA

In the circulation area of the office floor, there is a stylish and functional corner designed specifically for individual meetings. The walls are painted in a warm orange tone, infusing the space with a dynamic and energetic atmosphere. One of the defining features of the area is the minimalist wall-mounted sconce.

This elegant light source not only provides adequate illumination but also stands out as a sophisticated detail that enhances the overall aesthetic harmony of the space.

The design strikes a perfect balance between functionality and visual appeal, effectively reflecting a contemporary office concept.

EDI PROJECT - DDM

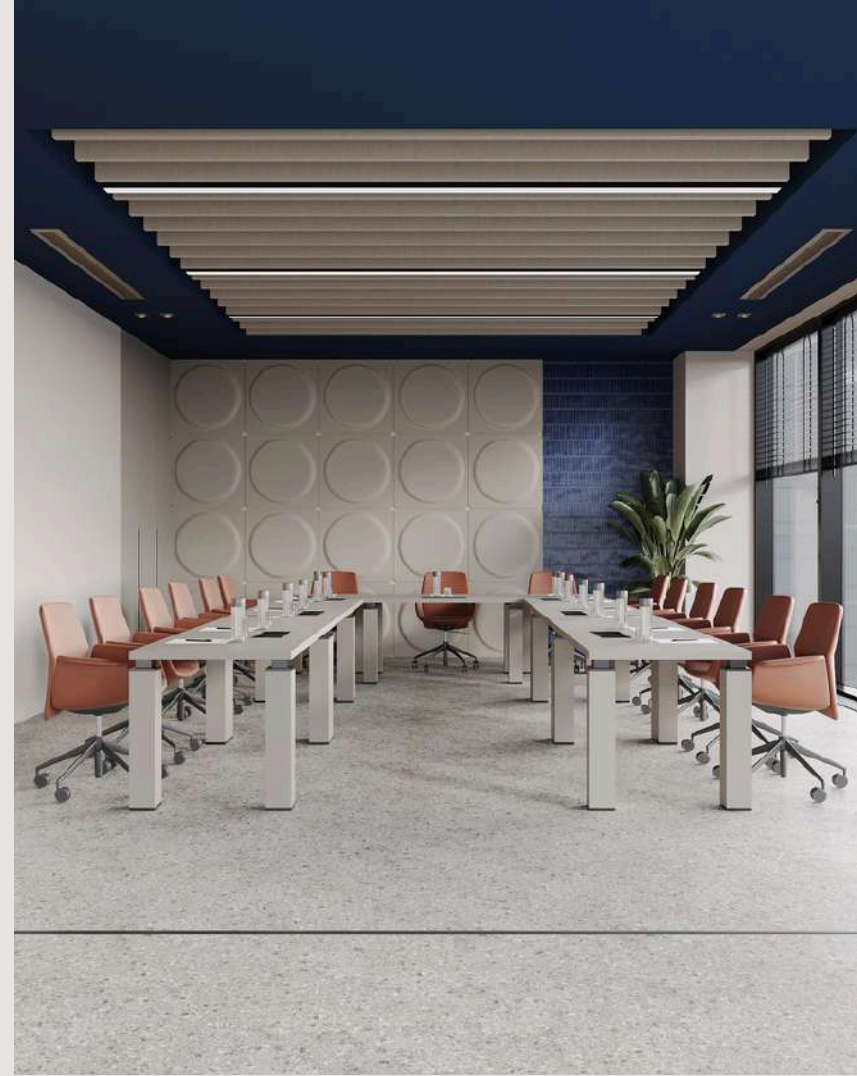

MEETING ROOM - 01

In our meeting room, modern design meets functionality, where the energy of blue and orange tones blends seamlessly with the warmth of natural wood textures.

The U-shaped meeting table enhances interaction among participants, while the movable wooden partition allows the space to be easily reconfigured — creating a flexible, multi-purpose environment.

Acoustic panels on the ceiling not only add a refined visual touch but also ensure a comfortable and clear sound experience.

Where functionality meets aesthetics.

EDI PROJECT - DDM

MEETING ROOM - 02

We present a modern and elegant meeting room design where every detail has been carefully crafted to blend aesthetics and functionality. The gracefully suspended ceiling lights enrich the space both functionally and visually. These lights soften the atmosphere, creating a warm and inviting ambiance. The seamless transition of soft colors and the perfect harmony of lighting add elegance and energy to the meeting room. Each element of the design not only supports productive meetings but also offers a visually stunning experience.

MEETING ROOM - 03

The meeting room stands out with its modern and elegant design. An oval glass partition separates the room from the circulation area. The transparency of the glass allows the space to feel open and spacious, while maintaining privacy without disrupting the interaction between the two areas. This glass partition features a sleek, minimal design, with soft curves that add an aesthetic harmony to the space. It offers a professional yet comfortable environment for meetings.

MEETING ROOM - 04

The meeting room is designed with soothing green tones, creating a peaceful atmosphere that promotes focus. Modern furniture and ergonomic designs prioritize comfort, ensuring relaxation even during long meetings. The design enhances concentration, providing an environment conducive to productive and efficient meetings.

EDI PROJECT - DDM

WORKING AREA

This spacious and thoughtfully designed work area accommodates 12 people, offering a modern and inspiring environment where functionality meets aesthetics. A harmonious blend of beige, blue, and orange tones creates a warm yet dynamic atmosphere that supports focus, creativity, and collaboration.

The space is defined by the use of two distinct flooring materials, subtly dividing the area into functional zones without interrupting the visual flow. This material differentiation adds both texture and clarity to the spatial organization.

Abundant natural light fills the space throughout the day, enhancing comfort and boosting productivity. The bright and airy ambiance contributes to a sense of well-being and keeps the work environment vibrant and uplifting.

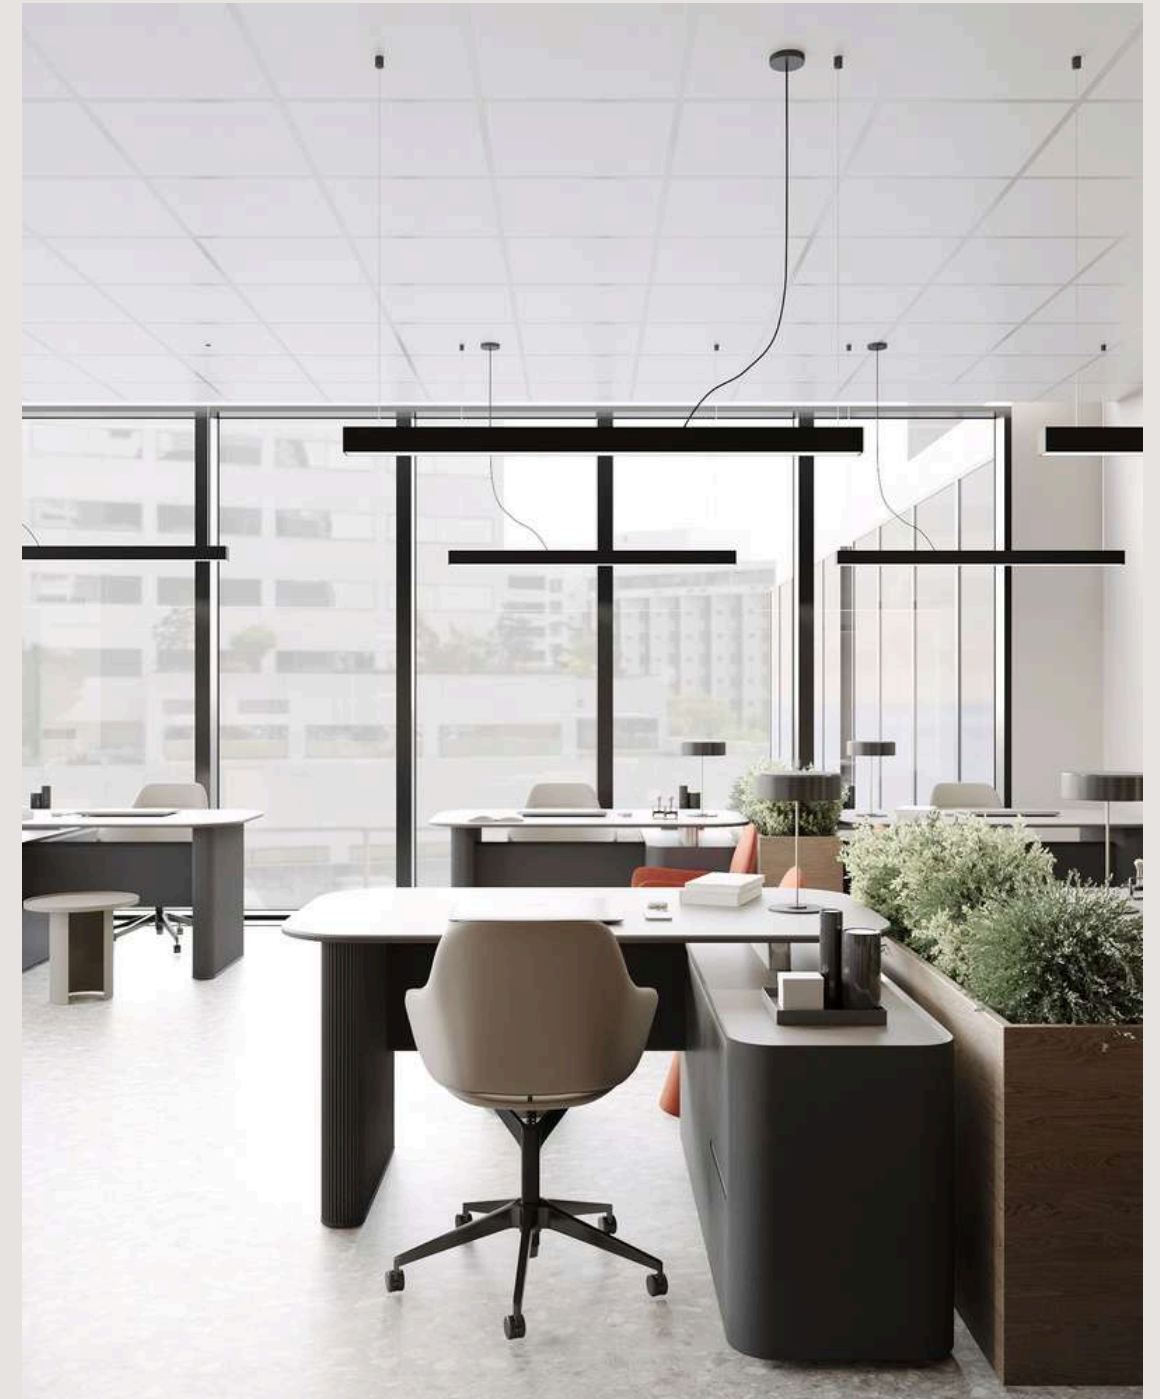

Both open and closed storage units are strategically placed to ensure easy access to essentials while maintaining a clean and organized workspace. Circular acoustic wall panels serve a dual purpose—elevating the visual design while significantly improving sound insulation and acoustic quality.

Every detail has been carefully considered to deliver a workspace that is not only practical but also aesthetically refined, embodying the balance between modern office needs and employee well-being.

EDI PROJECT - DDM

WORKING AREA

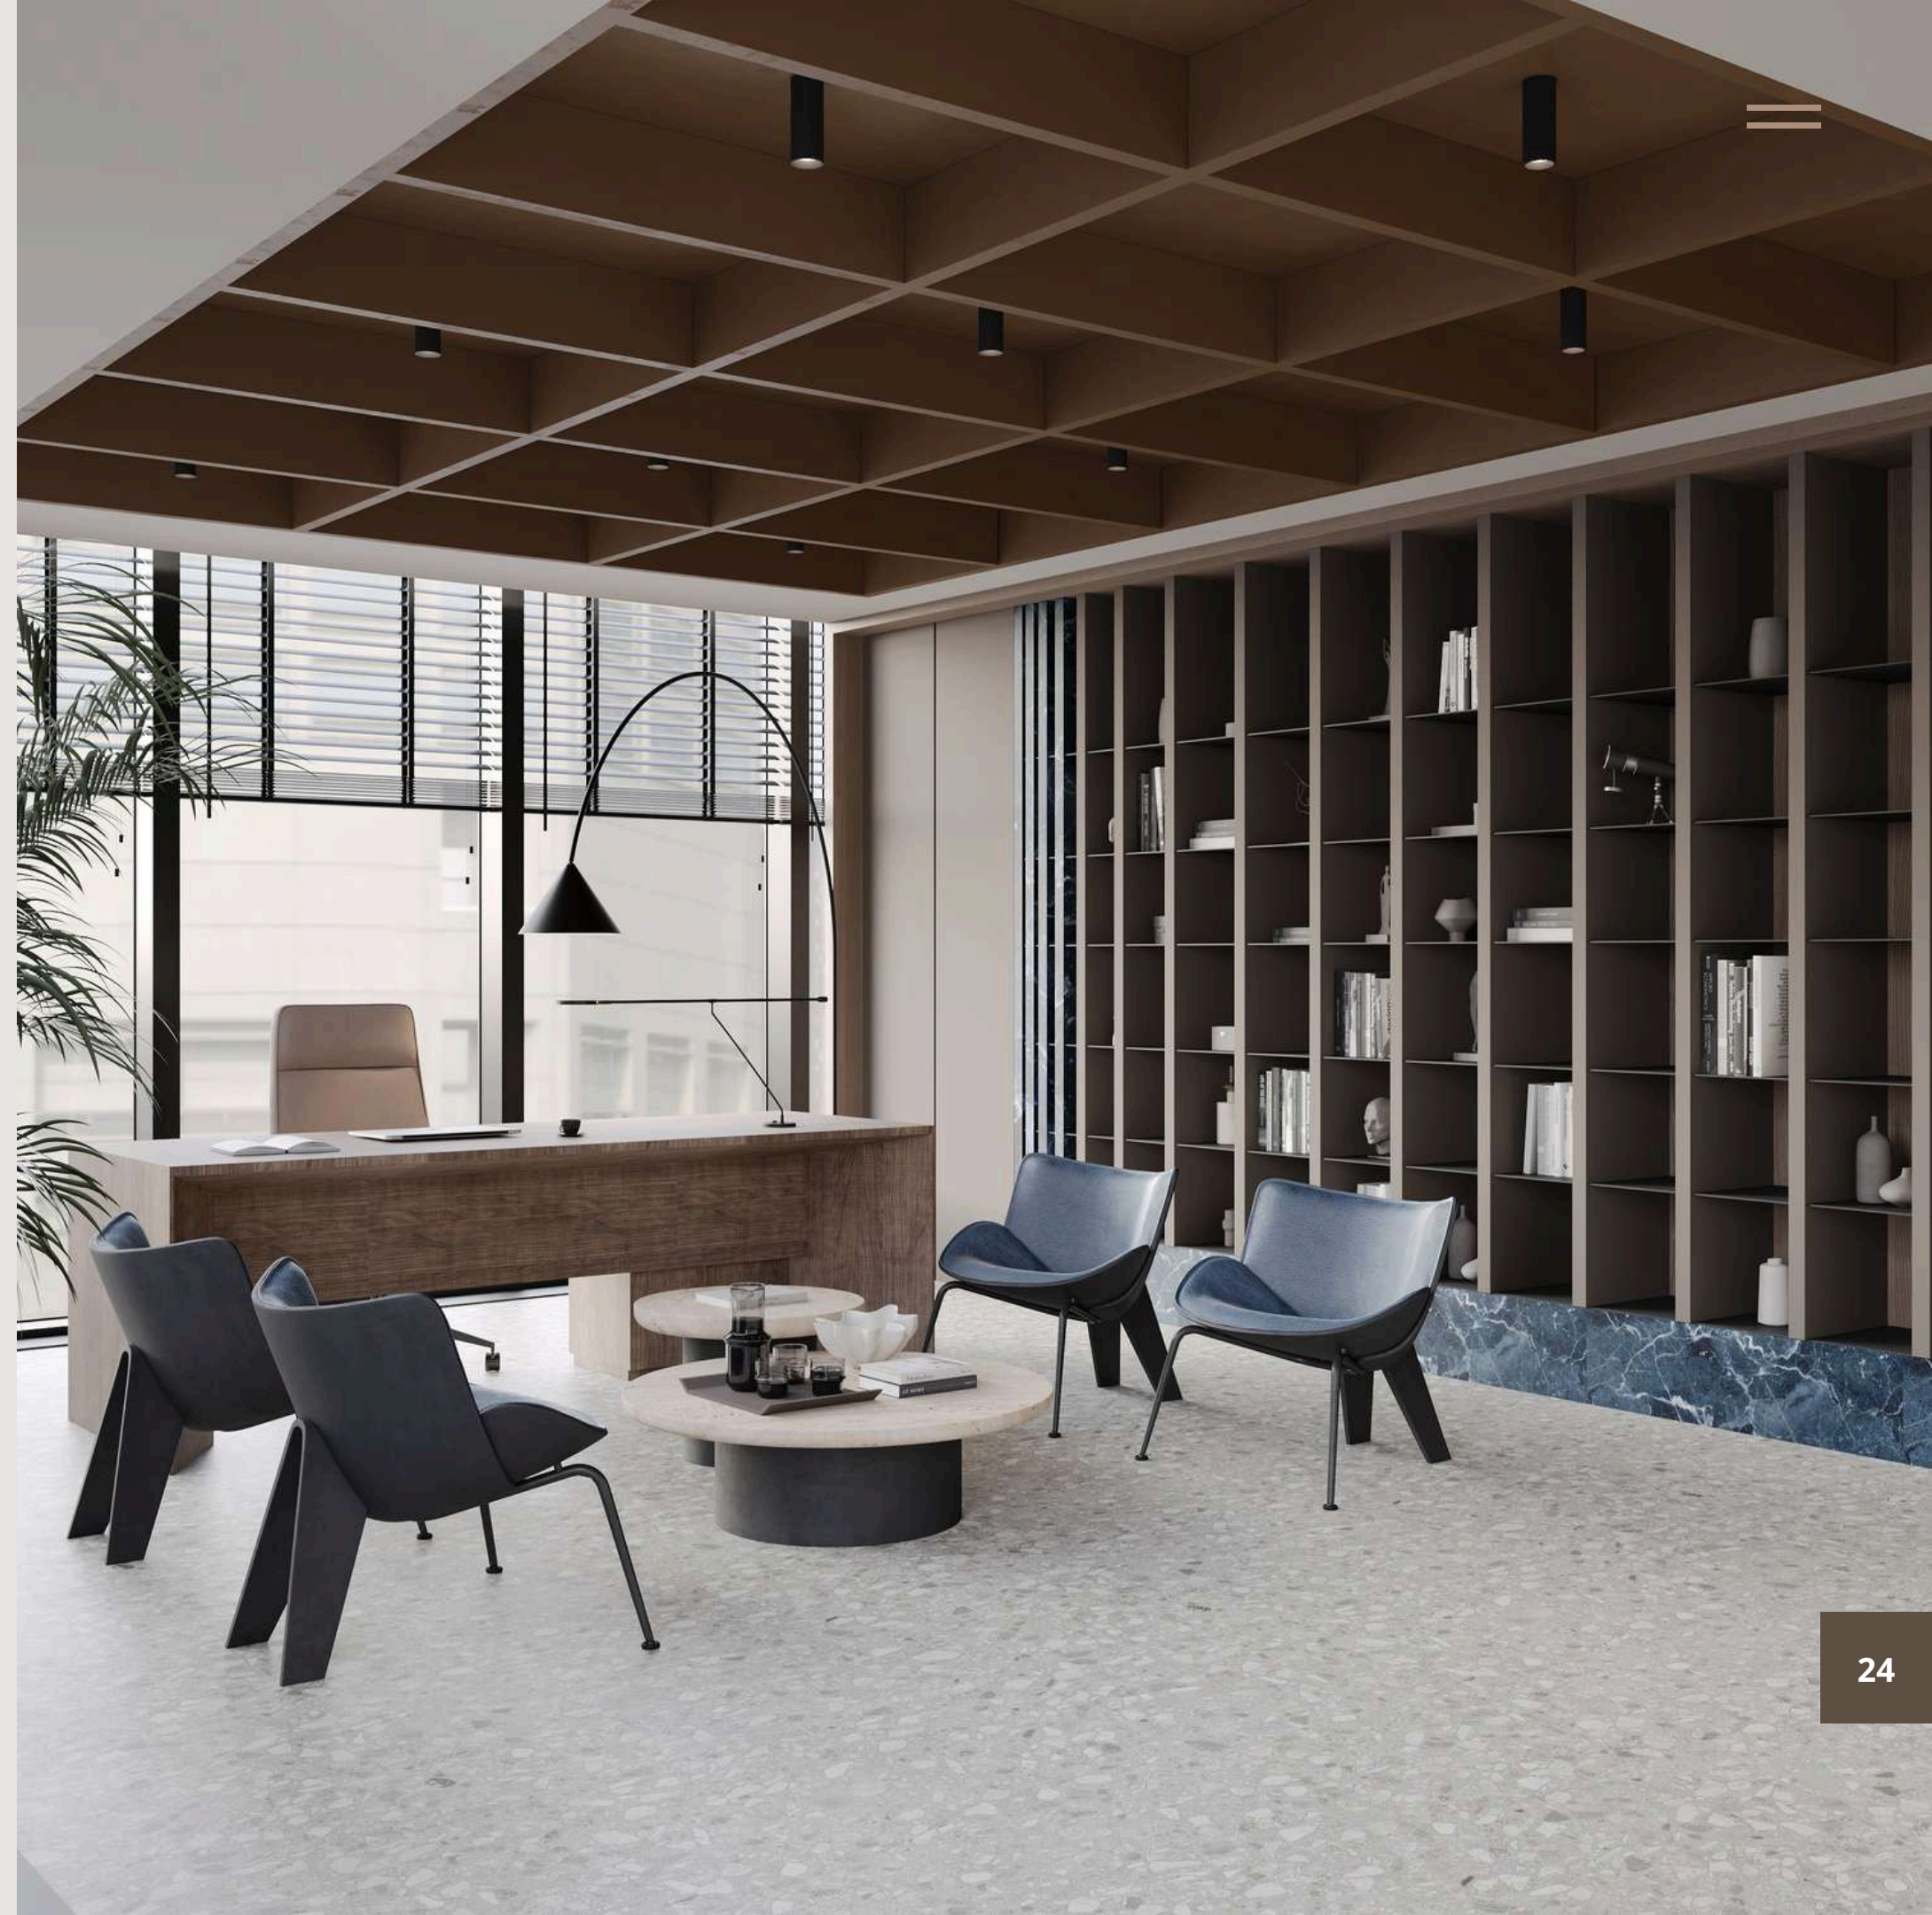

EDI PROJECT - DDM

EXECUTIVE OFFICE

In this executive office design, where functionality and aesthetics converge, every detail has been thoughtfully crafted. At the heart of the space, a large open storage unit not only ensures organization but also enhances the room's airy atmosphere.

Distinct ceiling details add architectural depth to the design, while blue marble surfaces introduce a sophisticated and refined touch. The blue tones used in the armchairs complement this elegant material choice, reinforcing a sense of visual harmony.

A soft and cohesive color palette creates a calm and inspiring work environment. Offering comfort, prestige, and practicality, this space presents a fresh interpretation of modern office design.

EDI PROJECT - DDM

RECEPTION AREA - 02

In this reception design, a modern atmosphere dominates, with the counter standing out as a striking focal point.

The design of the counter features an elegant combination of blue cylindrical columns and stainless steel, creating a contemporary touch. The contrast between these two materials adds both sophistication and dynamism to the space.

The dark wood panel at the back of the counter provides a warm and welcoming atmosphere. The orange accents in the ceiling perfectly complement the overall concept, infusing the space with an energetic vibe and enhancing the richness of the colors.

EDI PROJECT - IMA

MANAGEMENT OFFICE

A management office design where elegance and functionality meet in every detail. Modern furniture in warm tones, ergonomic workspaces, and carefully selected accessories create a sophisticated atmosphere that reflects prestige. A workspace that not only enhances productivity but also makes a striking visual impact.

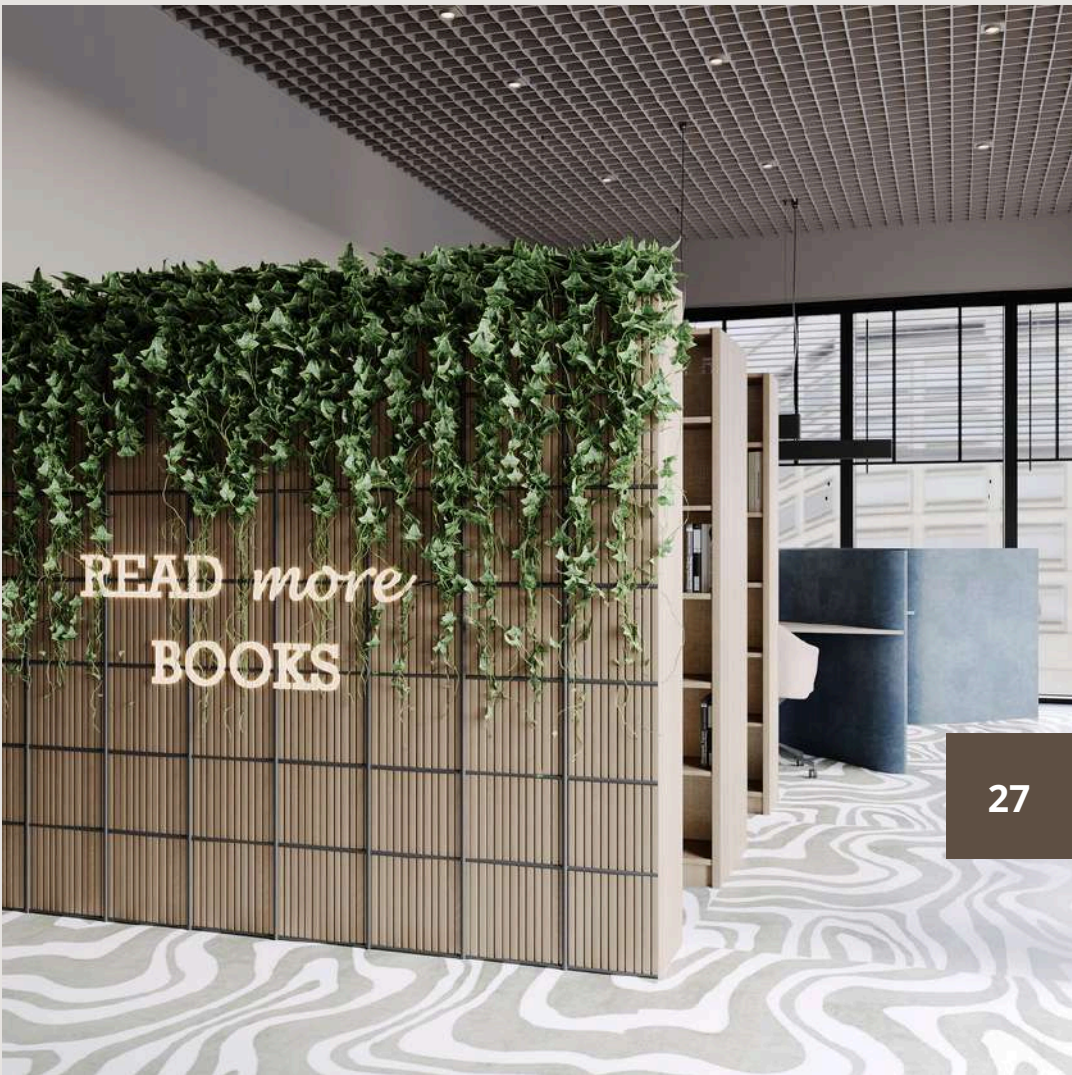

EDI PROJECT - COMMON AREA

LIBRARY

In the shared space library, individual workstations and every detail have been carefully designed. Each area is thoughtfully partitioned to support focus and efficient work. The modern and minimalist design maximizes the use of natural light, creating a comfortable and productive work environment.

FOYER

The foyer area was designed to create a warm and inviting atmosphere through the harmonious combination of orange tones, natural wood surfaces, black accents, and integrated greenery. Located on the conference hall level, the space serves as a social hub where visitors can gather and spend time. A custom-designed seating area with an organic form adds visual interest and a sense of flow to the space. At the center, black bistro tables offer casual spots for standing conversations, while green areas along the windows bring in a touch of nature and enhance the openness of the environment.

TAGLIAFERRI PROJECT

The Tagliaferri Project, created by our team in the captivating city of Florence, combines modern living with elegance and functionality in both of its apartments. Although both apartments are compact, every space has been meticulously designed to make the most efficient use of its size. With a minimalist approach, a simple yet refined aesthetic has been achieved.

Every corner of the living spaces has been shaped with a focus on comfort and style. Small but functional areas have been designed to create a sense of openness and spaciousness through smart layouts and the careful selection of materials. In particular, the living area offers a relaxing atmosphere, providing an aesthetically fulfilling experience.

PROJECT OVERVIEW

Project Type	Residential - Interior Design & Visualization
Location	Florence, ITALY
Area	110 sq.m
Date / Year	2025

TAGLIAFERRI PROJECT

FLOOR PLAN

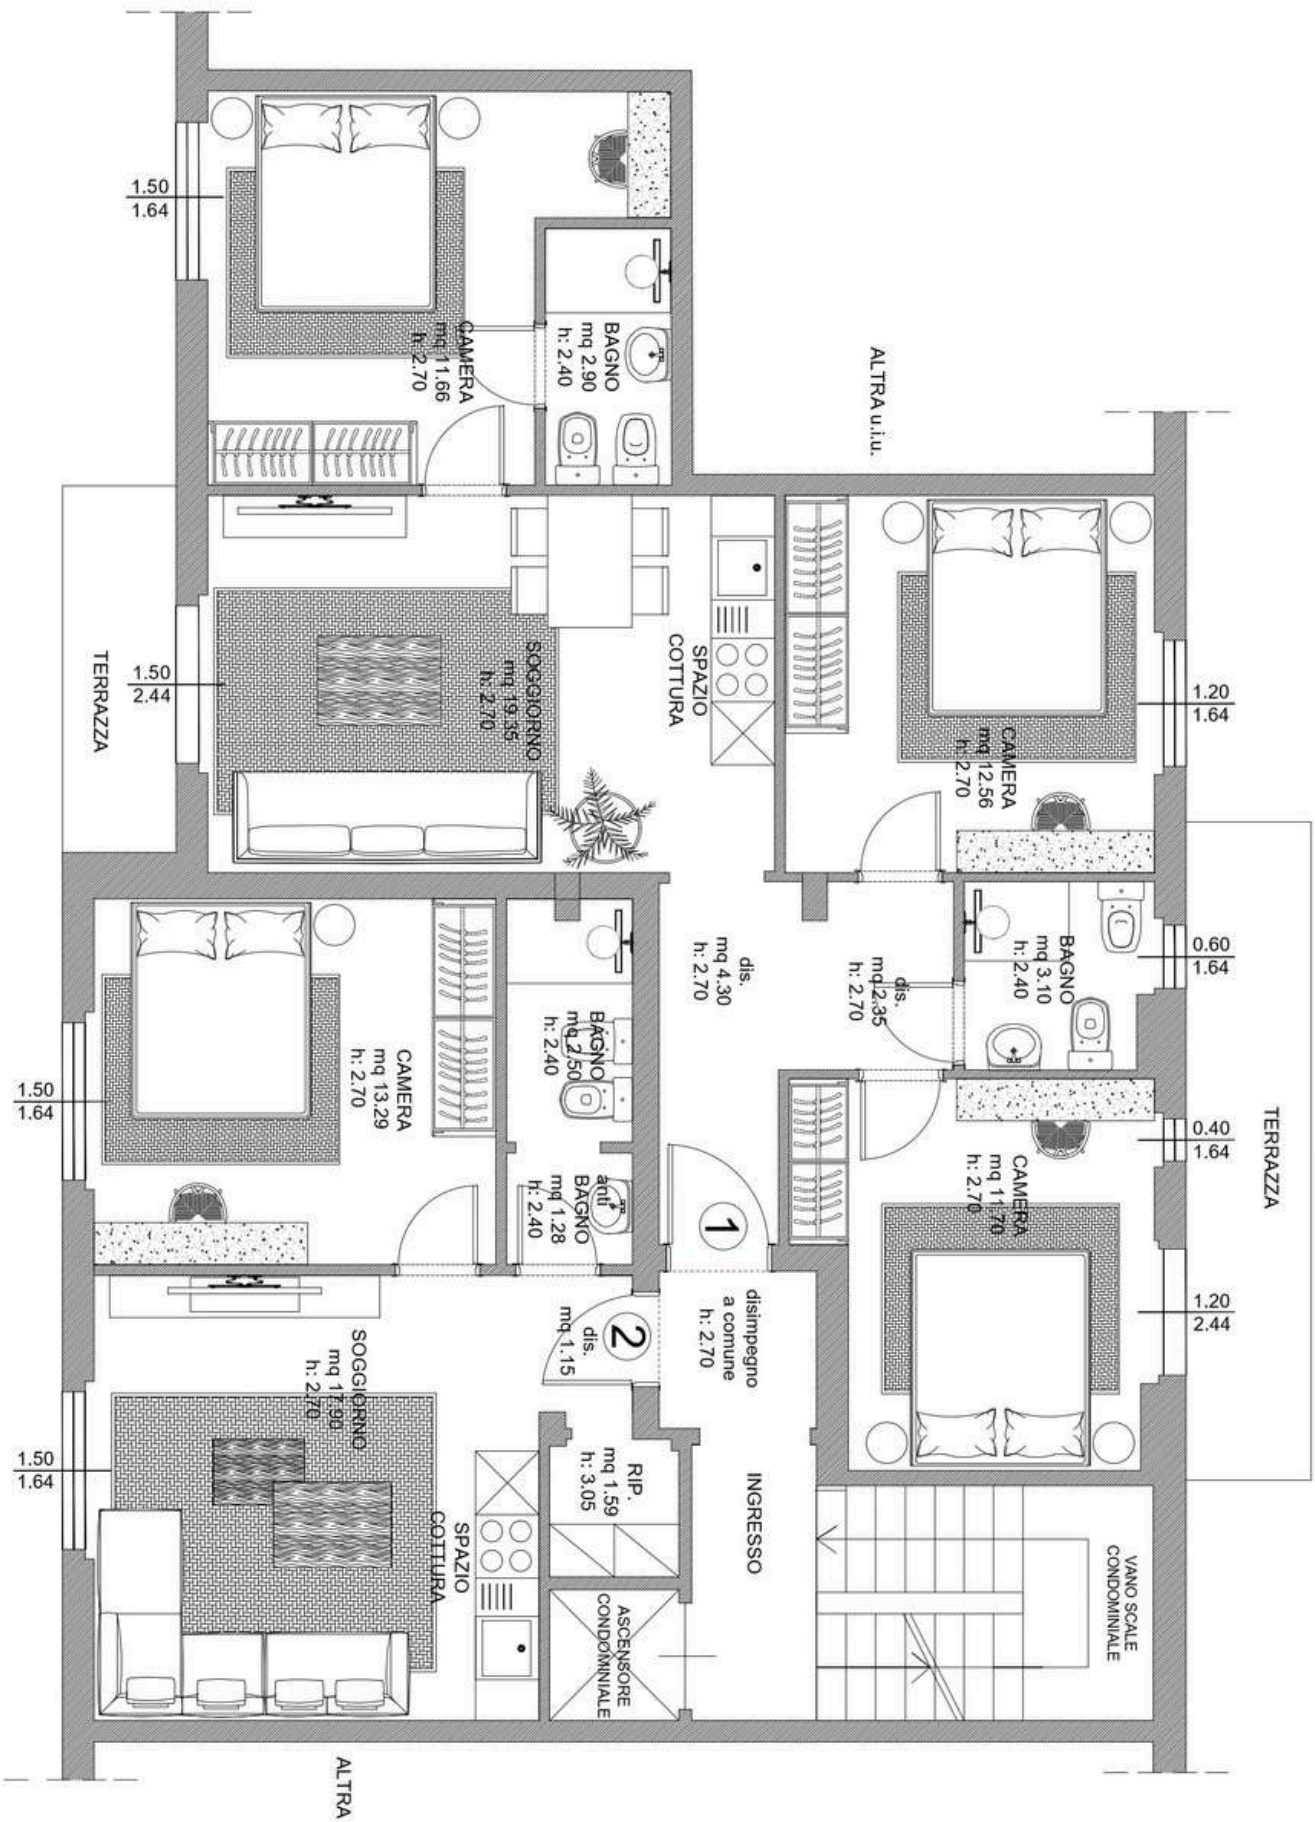

This project, located in Florence, Italy, involves the design and visualization of two compact residential apartments. Despite the limited square footage, each unit has been carefully planned to achieve a minimalist and highly functional layout that maximizes spatial efficiency.

Apartment 1

The first apartment features an open-plan kitchen and living area, three bedrooms, and two bathrooms, including an en-suite in the master bedroom. The open layout enhances the sense of space and light, while the overall organization ensures optimal usability and comfort.

Apartment 2

The second apartment is more compact in size, offering an open-plan kitchen and living space, one bedroom, and one bathroom. Designed with a minimalist approach, this unit provides a functional and comfortable living environment within a limited footprint. Both layouts were developed with a focus on functionality, simplicity, and spatial clarity—resulting in interiors that are both practical and aesthetically refined.

TAGLIAFERRI PROJECT

FIRST APARTMENT - LIVING ROOM

Located in the heart of Florence, the living room of the first apartment in the Tagliaferri Project is a perfect example of how a small space can be designed in a stylish and functional way. Every detail of this space was carefully designed with both aesthetics and ease of use in mind, featuring elegant and minimal furnishings. Neutral tones and warm wood textures create a cozy atmosphere, while modern lines bring a sophisticated touch.

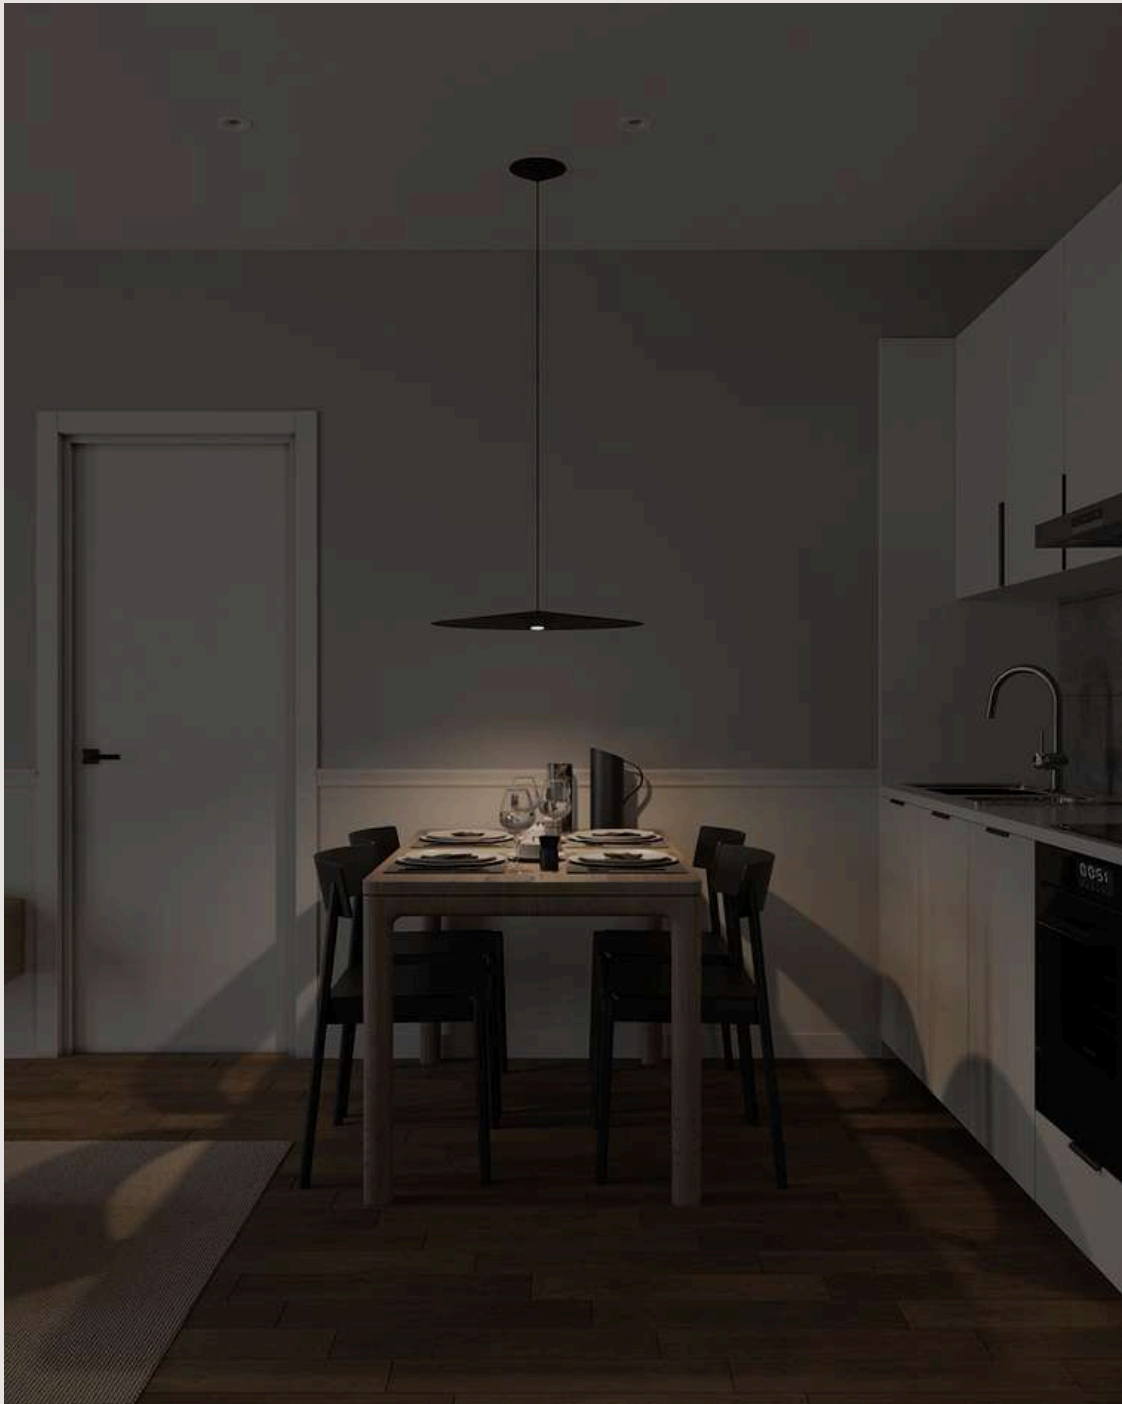

This apartment, consisting of 3 bedrooms and a living room, utilizes every square meter to offer a comfortable and stylish living space. The design takes into account the unique function of each area, perfectly combining the relaxation, social, and aesthetic needs expected from a living room.

The Tagliaferri Project demonstrates that creating impressive designs in small spaces is possible and emphasizes the importance of blending functionality with elegance in every space. This design serves as an inspiring example for modern living spaces.

TAGLIAFERRI PROJECT

FIRST APARTMENT - LIVING ROOM

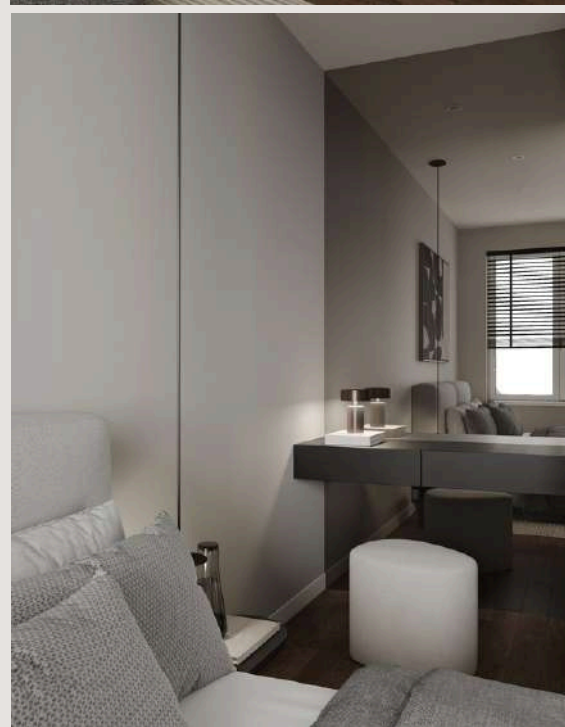

TAGLIAFERRI PROJECT

FIRST APARTMENT - BEDROOM 01

Located in the heart of Florence, the bedroom of the first apartment in the Tagliaferri Project beautifully exemplifies how elegance and functionality can be seamlessly integrated into a compact space. The design effortlessly combines comfort with modern aesthetics, creating a harmonious and inviting atmosphere.

This bedroom uses gray and black tones. Every detail in the room has been meticulously designed to maximize functionality. Thoughtful layout choices and smart storage solutions not only make the space appear larger and more organized but also enhance its overall usability. The modern lines of the furniture add both style and practicality to the bedroom.

The Tagliaferri Project demonstrates that even in smaller spaces, it is possible to achieve a perfect balance of style and functionality. This bedroom design serves as an inspiring example for those seeking to create stylish yet practical living spaces.

TAGLIAFERRI PROJECT

FIRST APARTMENT - BEDROOM 02

Located in the heart of Florence, the bedroom of the first apartment in the Tagliaferri Project offers a perfect example of how a small space can be both stylish and practical. Every detail in the design was carefully considered to seamlessly combine aesthetics and functionality. Soft neutral tones and warm wood textures create a relaxing atmosphere, while modern lines enhance the room's elegance and sophistication.

With functionality as a top priority, every corner of the room was thoughtfully utilized. Smart storage solutions help keep the space organized while maintaining an airy, spacious feel. Modern furniture adds both elegance and comfort to the bedroom, and the functional design elements make the space even more practical.

The Tagliaferri Project showcases how it is possible to combine functionality and style even in small spaces. This bedroom design serves as an inspiring example for modern living spaces, offering a perfect reference for those seeking to achieve balance in design.

TAGLIAFERRI PROJECT

FIRST APARTMENT - BEDROOM 03

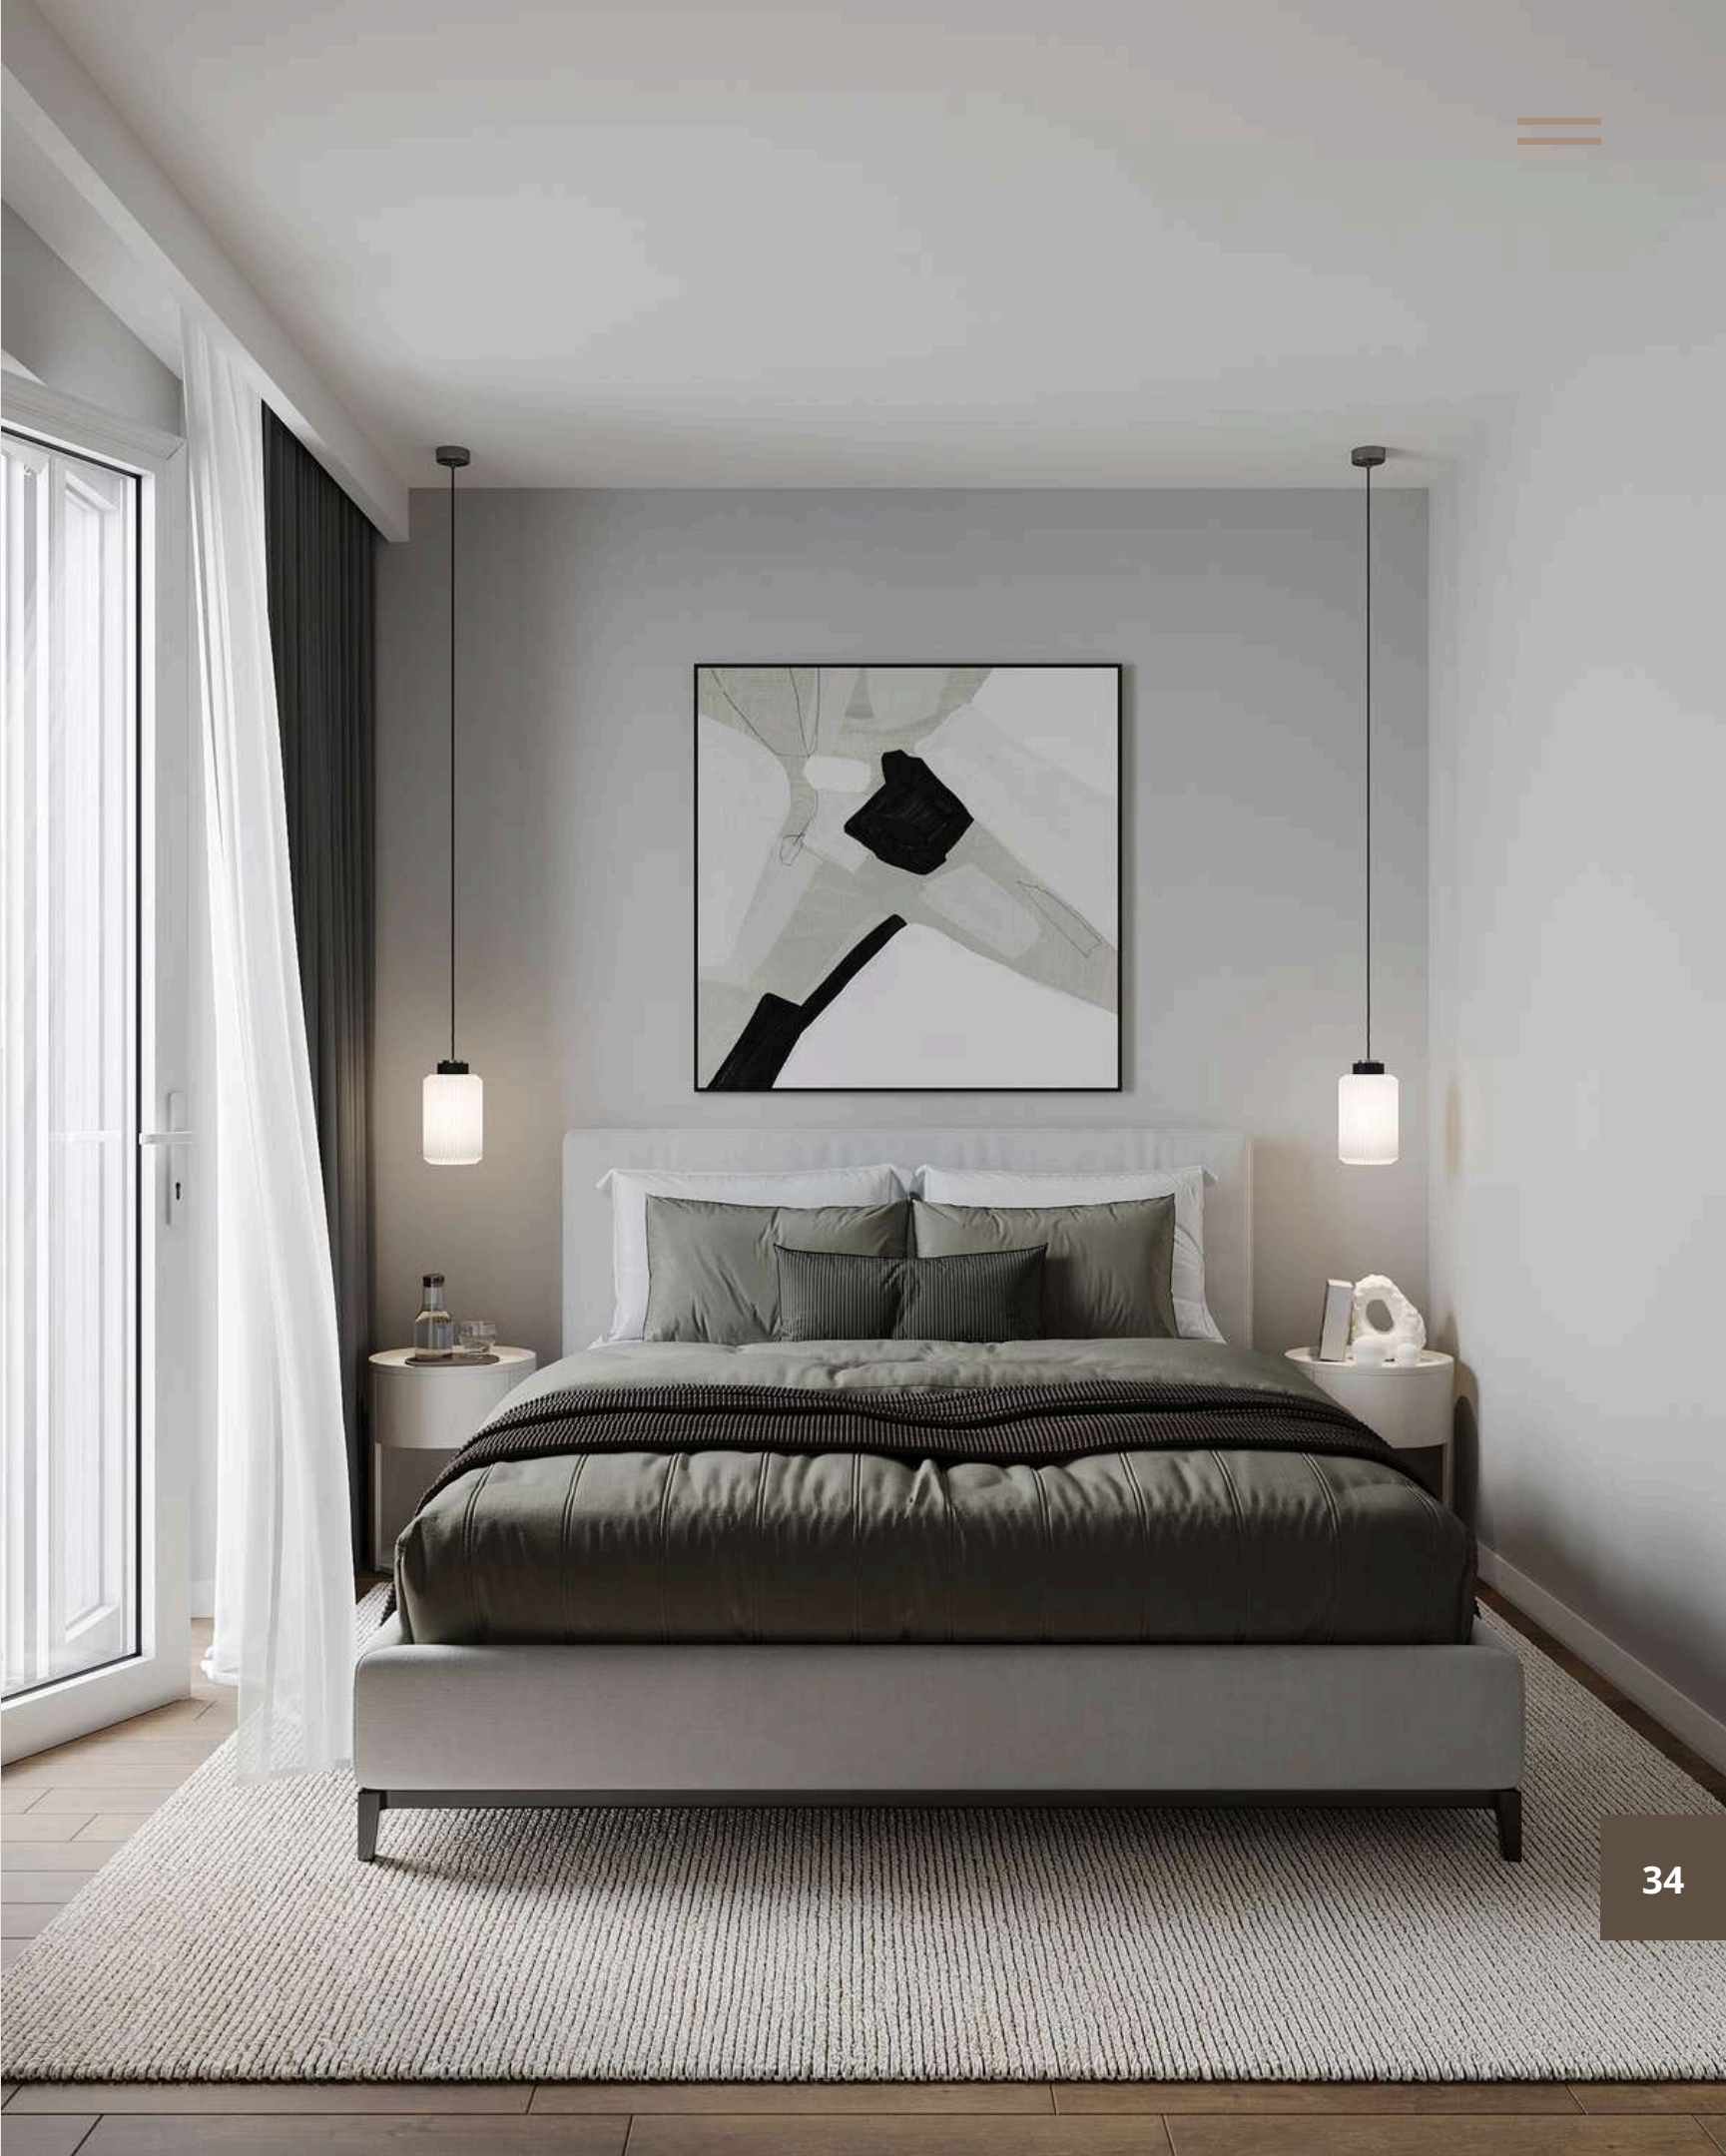

The bedroom of the first apartment in the Tagliaferri Project in Florence is a refined example of modern and minimalist design. With minimalist details throughout, everything in this room serves a purpose—functionality, comfort, and aesthetics come together seamlessly.

The spacious and airy atmosphere is created by neutral-toned walls and natural wooden flooring, which evoke a calming effect. The high-quality fabric-covered headboard stands as the centerpiece of the room, showcasing its elegance. The stylish bed, a symbol of sophisticated design, emphasizes both comfort and grace.

Modern pendant lighting used throughout the room perfectly complements the minimalist style. Elegant and functional furniture optimizes the space, adding a delicate touch to the overall design. Hidden storage solutions ensure that everything is neatly in place without disrupting the room’s orderly aesthetic.

This bedroom excels not only in its visual appeal but also in its functionality. Every detail has been thoughtfully designed to make the living space more comfortable and practical.

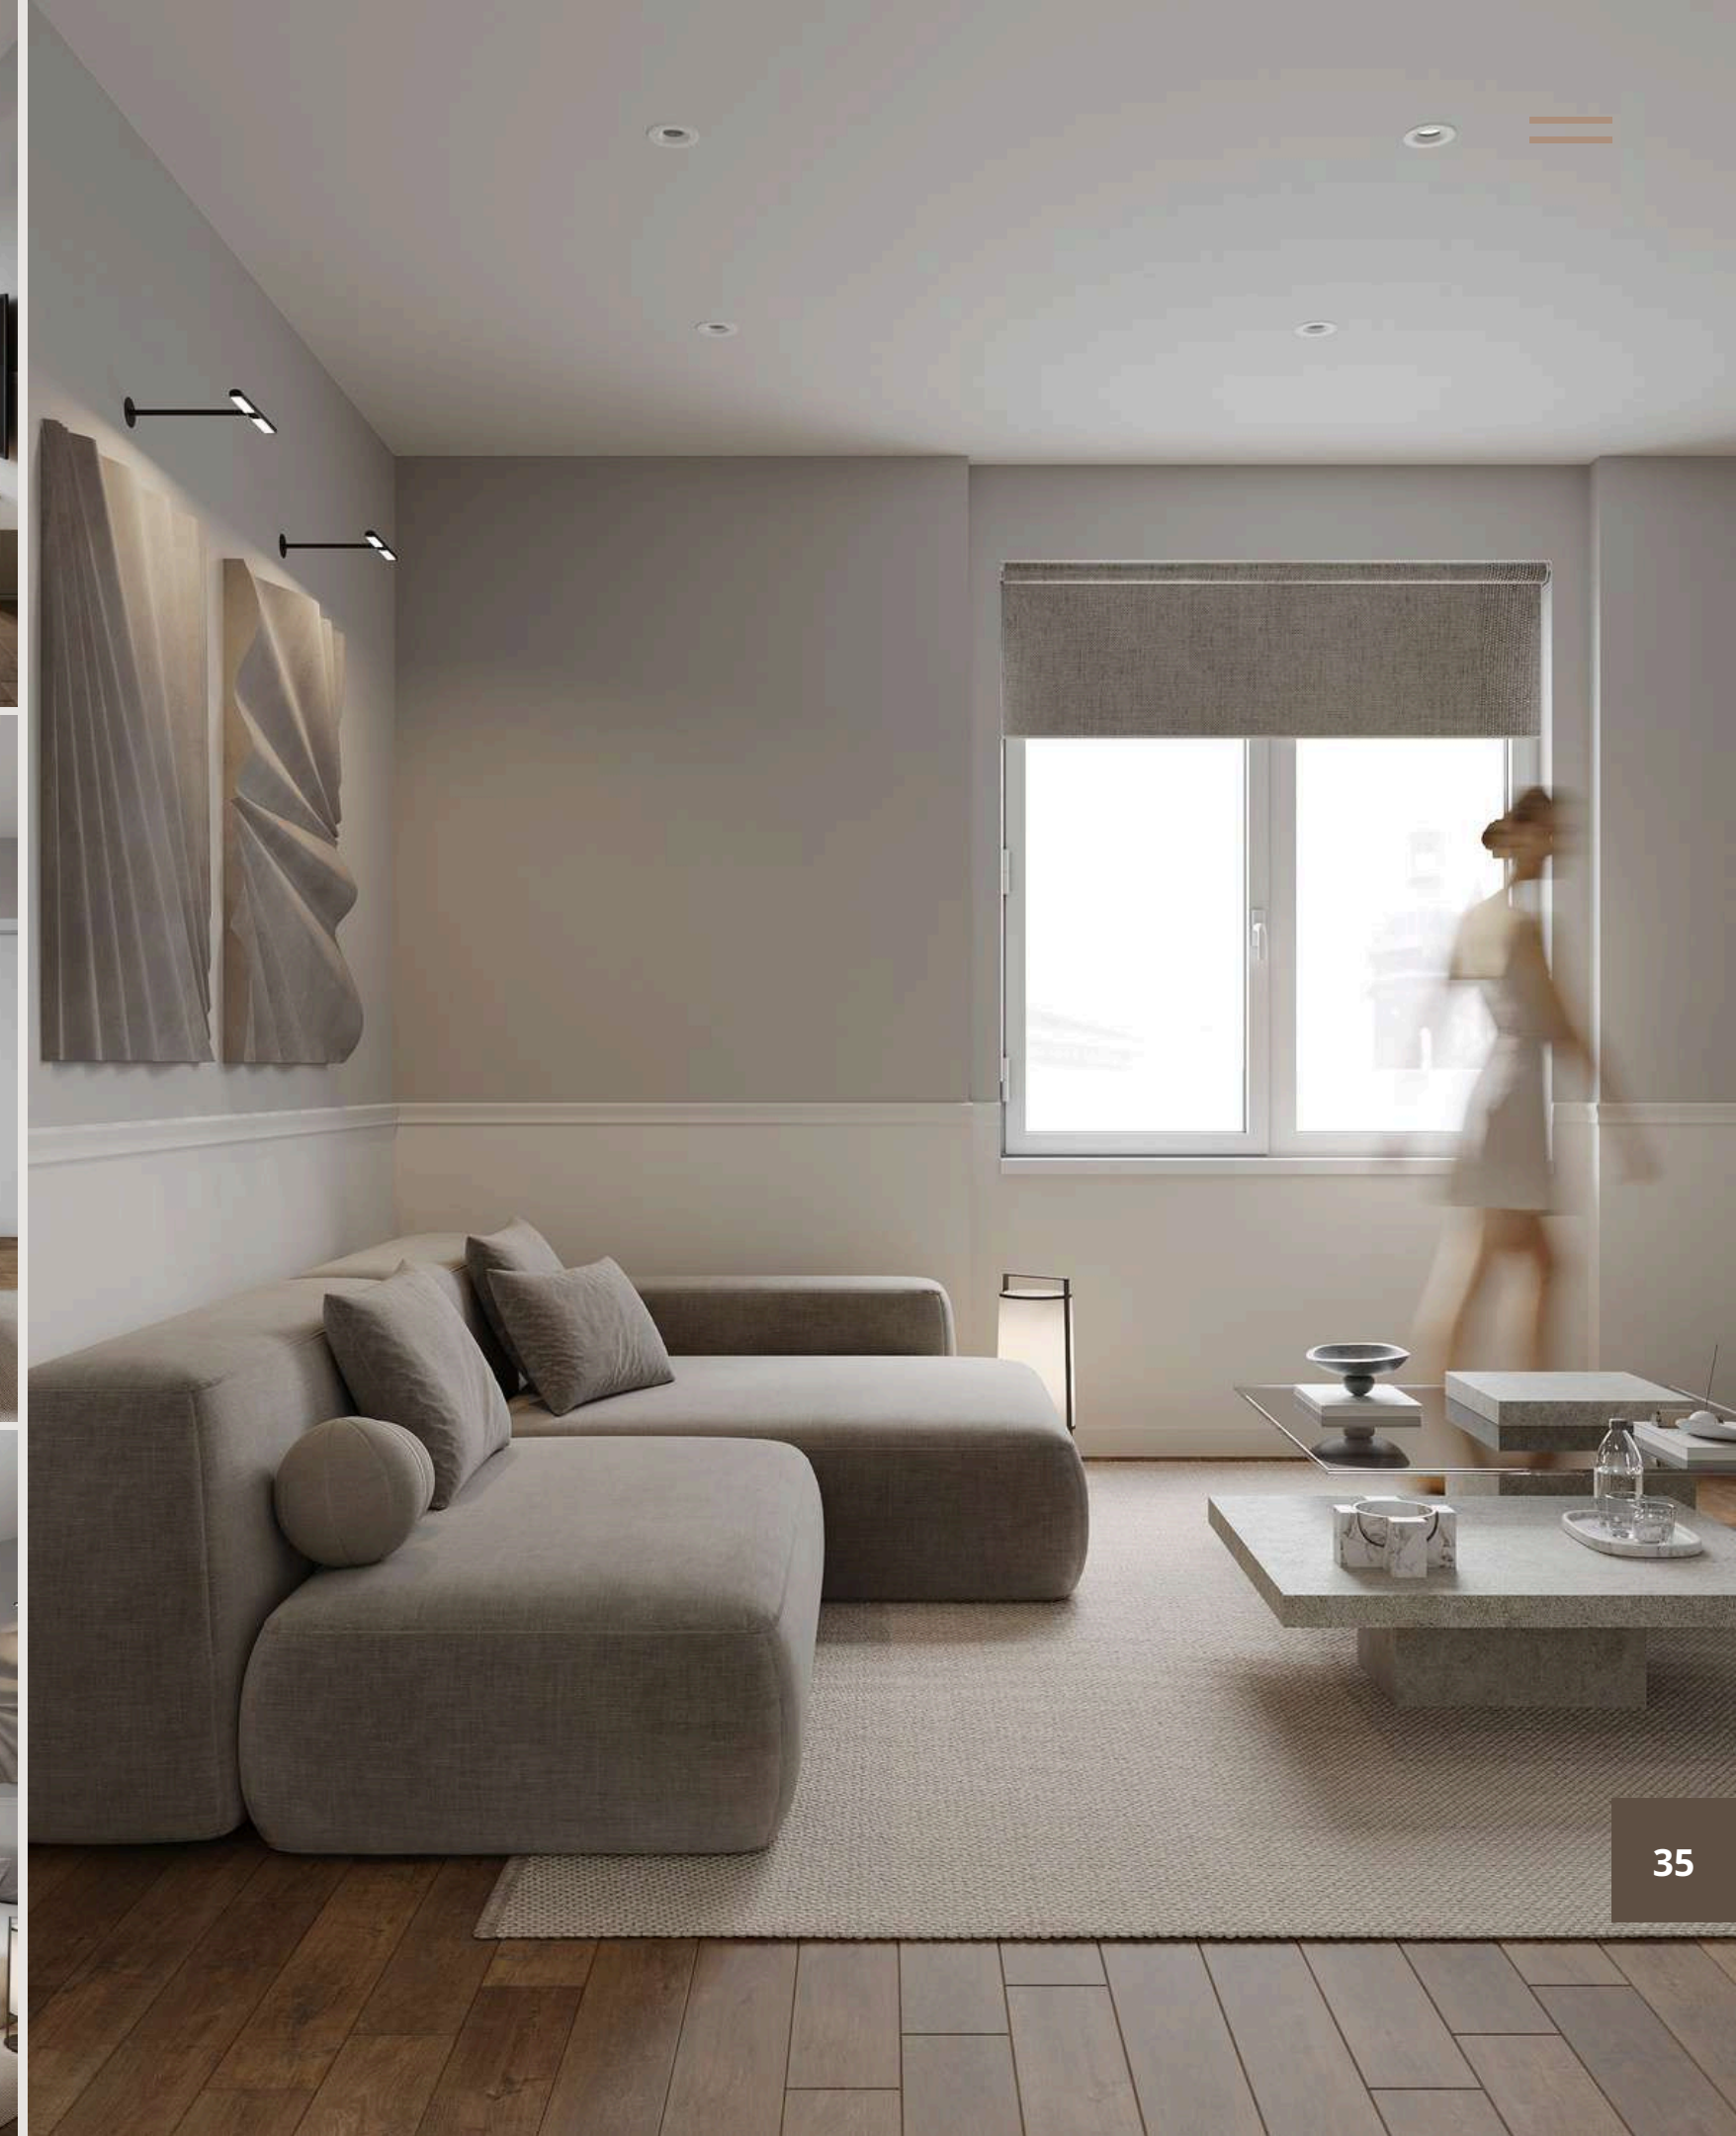

TAGLIAFERRI PROJECT

SECOND APARTMENT - LIVING ROOM

The living room of the second apartment in the Tagliaferri Project stands out as a compact yet remarkably refined space that seamlessly blends style and functionality. Designed with a minimalist approach, the room features a soft, neutral color palette that creates a bright and calming atmosphere.

At the heart of the space is an L-shaped sofa, which serves as both a visual anchor and a practical solution for maximizing seating within a limited footprint. Its placement enhances the sense of openness while offering a comfortable and inviting setting for relaxation or socializing.

Every detail—from the selection of materials to the layout of the furniture—has been thoughtfully considered to meet the needs of modern living while maintaining a sophisticated aesthetic. The living room in the second apartment exemplifies how elegance and practicality can coexist in perfect harmony, even within a modest floor plan.

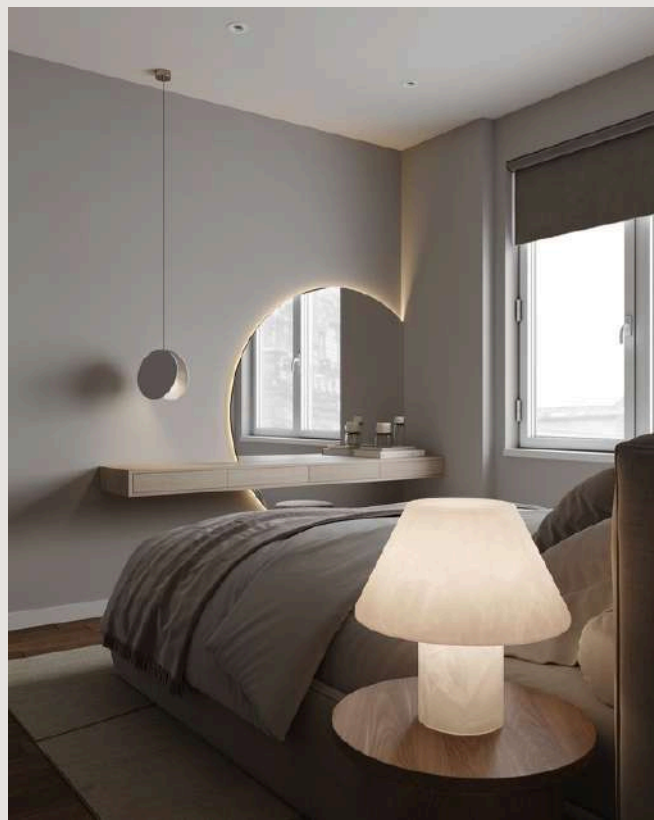

TAGLIAFERRI PROJECT

SECOND APARTMENT - LIVING ROOM

TAGLIAFERRI PROJECT

SECOND APARTMENT - BEDROOM

The bedroom of the second apartment in the Tagliaferri Project, designed by our team in the heart of Florence, perfectly embodies the balance between comfort, elegance, and functionality. Despite the compact size, every element has been carefully crafted to maximize both practicality and style.

The design focuses on creating a calm atmosphere with soft tones and natural materials that promote relaxation. Smartly placed storage solutions and efficient layouts make the room feel spacious while maintaining its minimalist aesthetic. Every detail has been considered to create an environment where comfort and elegance come together seamlessly.

With the details shared from the Tagliaferri Project bedroom, I'm excited to showcase how each element has been designed to be both functional and beautifully refined.

LIGHTING PRODUCT DESIGN

In this project, three distinct products were designed with a focus on user experience and aesthetic values: a wall sconce, a coffee table, and a table lamp. Each product aims to merge functionality with unique form within its own context, offering a fresh perspective on both lighting and product design.

Each piece was evaluated both as an independent design object and as an element within the spatial context. The relationship between the user and the product, its placement within the space, and the selected material samples were all examined in detail. These designs go beyond functionality, evolving into distinctive forms that add character to the environment. This holistic approach provided design solutions that are both visually compelling and experientially rich.

Material selection played a key role in defining the identity of each design. For the wall lamp, a primary product was created using three different materials. This main design was then reinterpreted through material variations, resulting in three alternative versions with distinct material combinations. A similar method was applied to the coffee table: the main design used three materials, followed by two alternative versions created with different material pairings. The desk lamp was designed as a single, unique product, combining three carefully selected materials. The fusion of crystal glass motifs with high-quality materials added a refined aesthetic dimension, making each product visually striking and truly original.

PROJECT OVERVIEW

Project Type	Product Design & Visualization
Location	Istanbul, TURKEY
Date / Year	2025
Collaborators	XYZ Design

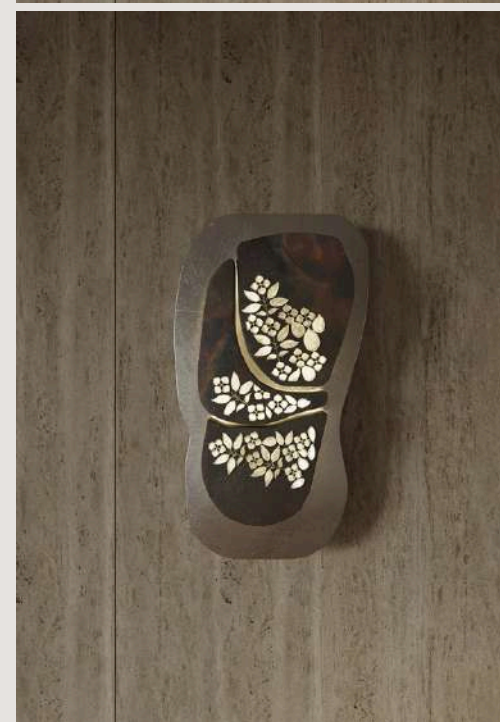

LIGHTING PRODUCT DESIGN

WALL SCONCE

This wall sconce was developed with a focus on material diversity and layered visual depth. The design features three alternative material configurations: oxidized metal, stainless steel, and genuine leather. Each material option offers a distinct tactile and aesthetic experience, allowing the fixture to complement a variety of interior design contexts — from industrial to contemporary and even luxury-oriented environments.

The sconce is constructed in two layers, contributing to both structural integrity and spatial dimension. The front layer incorporates ornamental patterns designed to accommodate crystal glass inlays, which add a refined visual texture and act as subtle light diffusers. These motifs were carefully composed to harmonize with the overall geometry of the fixture, creating a balanced interplay between transparency and opacity.

Integrated LED lighting is embedded in both the front and back layers, ensuring efficient and ambient illumination. The dual-layer lighting approach enhances depth perception and casts elegant shadows that enrich the surrounding space. This combination of material richness, detailed craftsmanship, and functional lighting makes the sconce a versatile and sophisticated product for modern interiors.

LIGHTING PRODUCT DESIGN

TABLE LAMP

This table lamp is a striking piece finished in a high-gloss red lacquer, chosen to enhance its bold, sculptural presence. The design is composed of fluid, organic forms that converge to create a visually dynamic and contemporary silhouette. These forms serve as the foundation for intricately placed crystal glass elements, which add a layer of elegance and light refraction to the overall composition.

What distinguishes this piece is the uniqueness of its motifs — each one carefully crafted to break away from repetition and conventional geometry. The crystal accents are not merely decorative; they are thoughtfully integrated to interact with light in expressive and unexpected ways. These motifs elevate the lamp from a functional object to a sculptural statement.

The base of the lamp consists of a circular platform that supports a series of interlocking elements. These elements are assembled in a way that allows light to escape through the negative spaces between them, casting intricate patterns onto nearby surfaces. The combination of vibrant color, organic design language, and layered lighting effects makes this table lamp both a functional light source and a captivating centerpiece.

LIGHTING PRODUCT DESIGN

COFFEE TABLE

This coffee table was designed using two distinct material options: oxidized metal and stainless steel. The same structural model was applied to both materials, offering varied visual and tactile qualities while maintaining design consistency. Each table consists of two interlocking components that can be configured together or used separately, allowing flexibility in spatial arrangement.

The tabletop features an inset of crystal glass, carefully embedded into the surface to create a refined contrast between the rawness of metal and the elegance of glass. The two-part design ensures that each component complements the other, both aesthetically and functionally. When joined, the tables form a cohesive, sculptural unit, but they can also stand alone as individual statement pieces.

An additional layer of sophistication is introduced through the leg design, where crystal glass motifs are embedded and backlit with integrated LED lighting. These illuminated details not only enhance the decorative appeal but also provide ambient lighting, subtly elevating the atmosphere of the surrounding space. The overall result is a versatile and harmonious piece that balances craftsmanship, modularity, and modern luxury.

ES HOUSE

This project embodies a contemporary and minimalist interior design approach, thoughtfully crafted to meet the needs of modern living. Comprising an open-plan kitchen, living room, bedroom, and bathroom, the space is designed with a holistic vision that blends functionality, simplicity, and refined aesthetics.

At the heart of the design lies a calm and understated palette, composed entirely of soft hues. Dominant tones of soft beige are harmonized with light natural wood textures, creating a warm and inviting ambiance. Concrete surfaces introduce a modern, industrial contrast, adding depth and character to the soft visual language of the space.

The open-plan kitchen and living area emphasize spaciousness and fluidity, encouraging social interaction within a clean, cohesive layout. Minimalist built-in furnishings and uncluttered surfaces contribute to an atmosphere of serene elegance. In the bedroom, comfort and tranquility take center stage, with layout and materials carefully selected to maximize natural light and foster a restful environment.

The bathroom combines micro-concrete surfaces with natural wood accents, evoking a calming, spa-like experience. Across all spaces, material selections and color harmonies work together to establish a consistent and sophisticated design language.

This project aims to deliver a peaceful, timeless living environment that fuses modern aesthetics with natural elements—offering a sanctuary of simplicity and contemporary elegance.

PROJECT OVERVIEW

Project Type	Residential – Interior Design & Visualization
Location	İzmir, TURKEY
Area	100 sq.m
Date / Year	2024

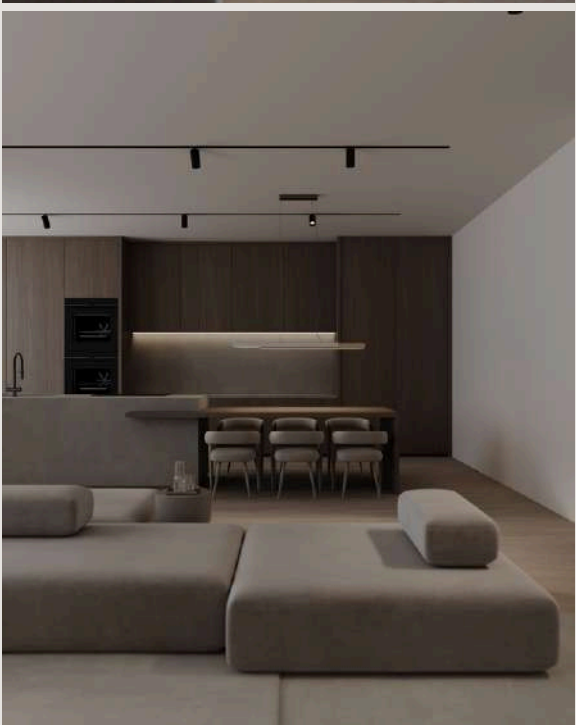

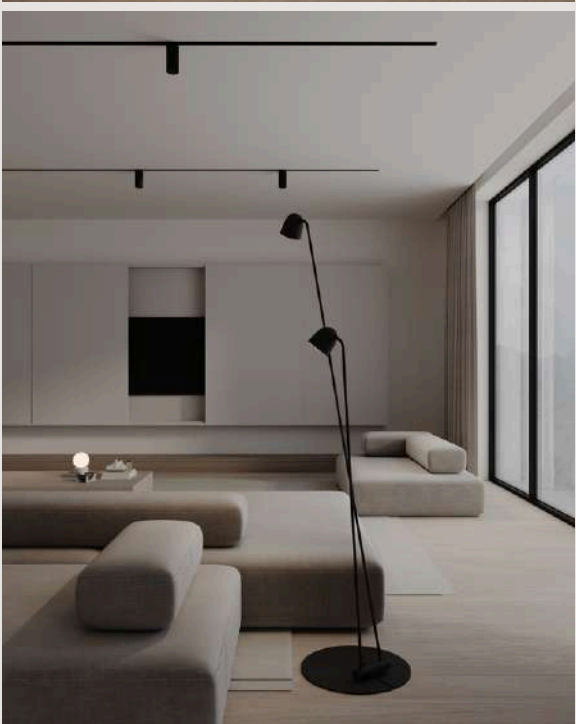

ES HOUSE

LIVING ROOM

The living area is designed as an open-plan space that seamlessly integrates the kitchen and living room, reflecting a modern and cohesive lifestyle. The kitchen cabinetry is fully crafted from natural wood, forming a continuous and monolithic appearance that enhances the sense of unity within the space.

A central island stands at the heart of the kitchen, designed with a concrete-look finish to introduce a contemporary, industrial texture. The island features an integrated sink and is extended with a wooden dining attachment, comfortably accommodating up to six people. Above the table, a suspended pendant light provides focused, localized illumination, adding both function and atmosphere to the dining experience.

The living room is furnished with a modular sofa composed of five individual pieces. These elements can be rearranged freely, offering flexibility in layout while maintaining a visual and functional connection between the kitchen and lounge areas. This modular approach encourages dynamic use of the space and adapts to different social and spatial needs.

ES HOUSE

LIVING ROOM

A minimalist TV unit enhances the clean aesthetic of the room. It is designed with sliding panels that allow the television to be concealed entirely when not in use, transforming the unit into a decorative wall element. This feature supports the overall minimal character of the interior, maintaining a calm and clutter-free visual environment.

Ceiling-mounted track spotlights provide adjustable lighting throughout the room, supporting both general and task-oriented illumination while emphasizing the linear and architectural qualities of the design.

The primary goal in this living space is to strike a harmonious balance between aesthetics and functionality, creating a warm, timeless, and understated atmosphere. Natural materials were deliberately chosen to evoke a tactile experience throughout the space, with every surface and detail thoughtfully considered.

The warmth of wood and the raw simplicity of concrete come together to establish a bold contrast while maintaining a sense of visual balance. The open-plan layout ensures fluid transitions between zones, while carefully positioned furniture and lighting elements allow each area to retain its own identity. This space is not merely for sitting or dining—it is conceived as a dynamic, adaptive environment that transforms with the rhythms of daily life, responding intuitively to different moments and needs.

ES HOUSE

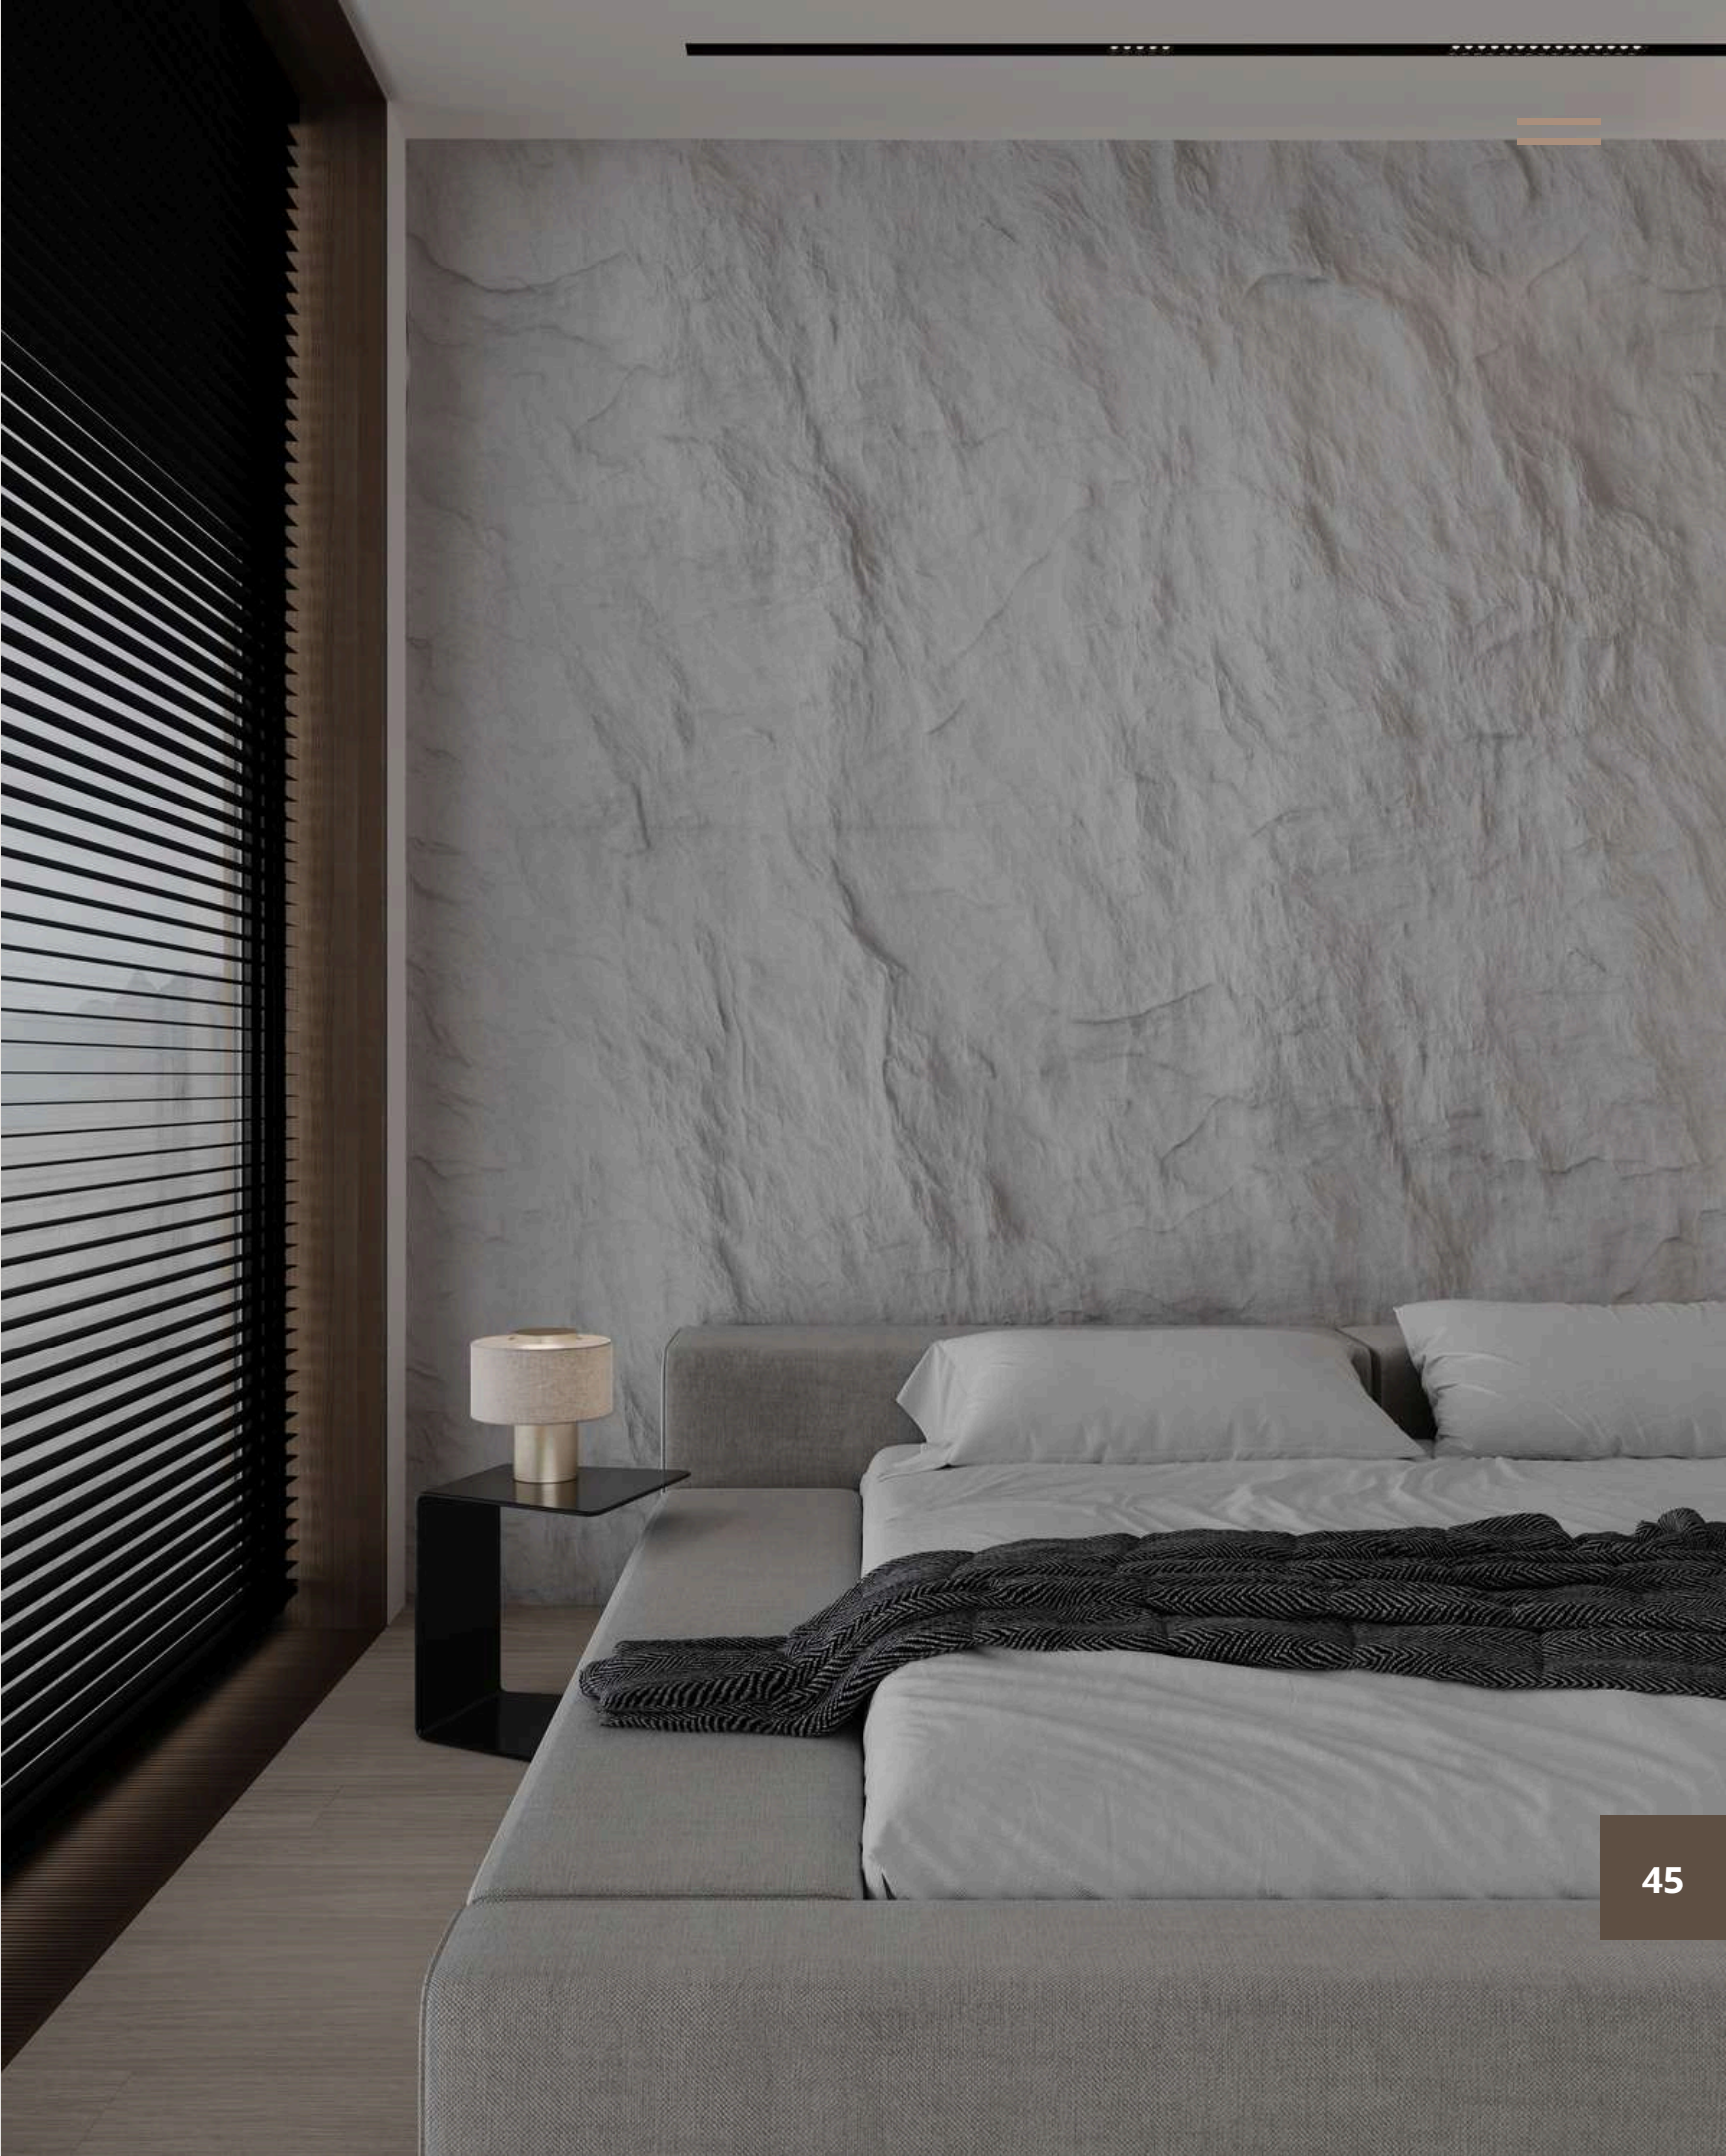

BEDROOM

The bedroom is defined by a sliding glass partition that separates it from the living area, maintaining a sense of openness while offering visual privacy. This semi-open layout allows natural light to flow freely through the space, enhancing the overall feeling of airiness. The bed is designed in a low-profile form with light, neutral tones, contributing to a calm and serene atmosphere. Behind the bed, a decorative wall panel adds visual interest and depth, subtly elevating the minimalist aesthetic.

Floor-to-ceiling windows allow abundant daylight into the room, while sleek, modern blinds provide flexible light control and privacy as needed. A low, minimalist TV console made of natural wood blends seamlessly into the space. Instead of a conventional television, a blank wall has been intentionally left open to serve as a projection surface, creating a functional media area without compromising the room's clean and understated design.

Every detail in the bedroom has been curated to enhance a sense of tranquility and refined simplicity. The use of soft textures, subdued colors, and clean lines creates a restful retreat that supports relaxation and mindfulness. The integration of the projection wall not only minimizes visual clutter but also transforms the space into a flexible environment for both rest and quiet entertainment. The thoughtful combination of transparency, natural light, and tactile materials invites a deeper connection to the space, making the bedroom not just a place to sleep, but a calm, personal sanctuary within the home.

BODRUM HOUSE BEDROOM

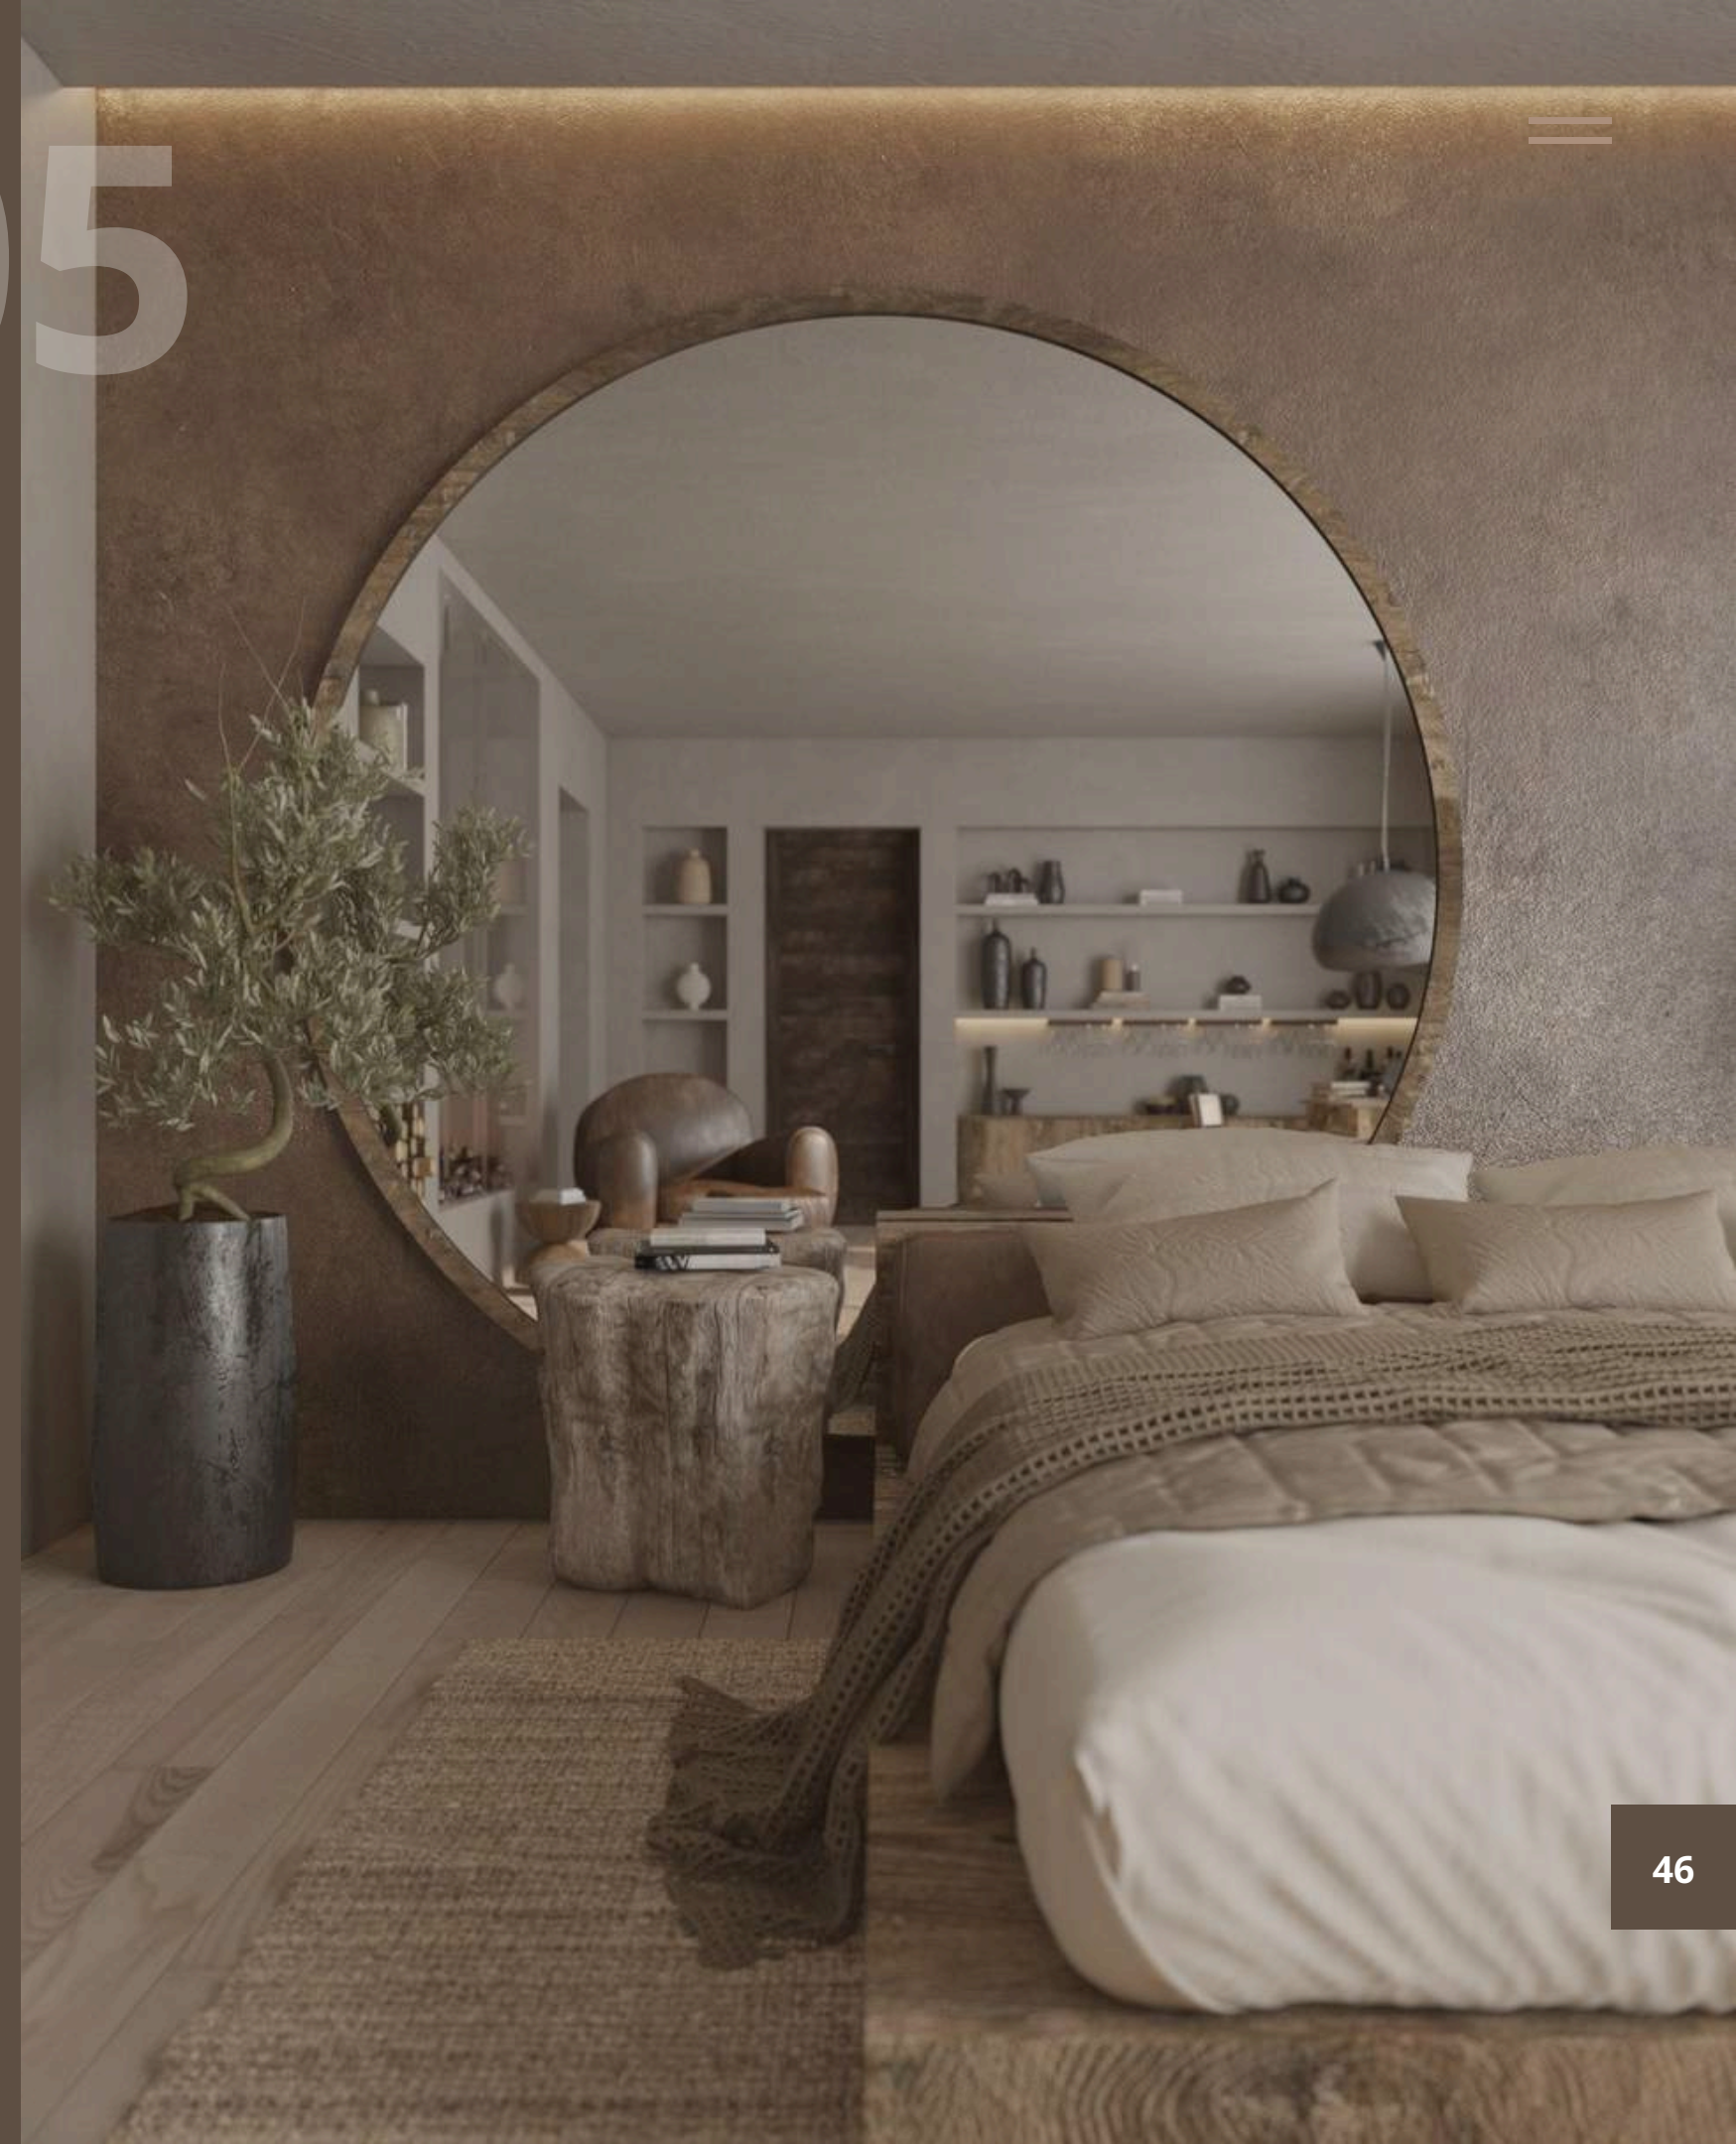

This design presents a serene and nature-inspired living space that reflects the calm elegance of Bodrum. Emphasizing organic textures and earthy tones, the concept brings together natural materials like wood, stone, and soft, tactile surfaces to create a warm and harmonious atmosphere.

The space is composed of a seamlessly integrated bedroom, dressing area, and bathroom, designed to function as a unified and fluid living environment. Each zone is thoughtfully arranged to maintain spatial continuity while serving distinct purposes, allowing for both privacy and openness within a harmonious, nature-inspired setting.

The bedroom and bathroom are envisioned as a continuous spatial experience, where every element is thoughtfully positioned to encourage relaxation and quiet luxury. With subtle contrasts, sculptural details, and a seamless connection between functional zones, the design offers a timeless retreat that balances comfort, sophistication, and the essence of natural living.

PROJECT OVERVIEW

Project Type	Residential – Interior Design & Visualization
Location	Bodrum, TURKEY
Area	55 sq.m
Date / Year	2024

BODRUM HOUSE BEDROOM

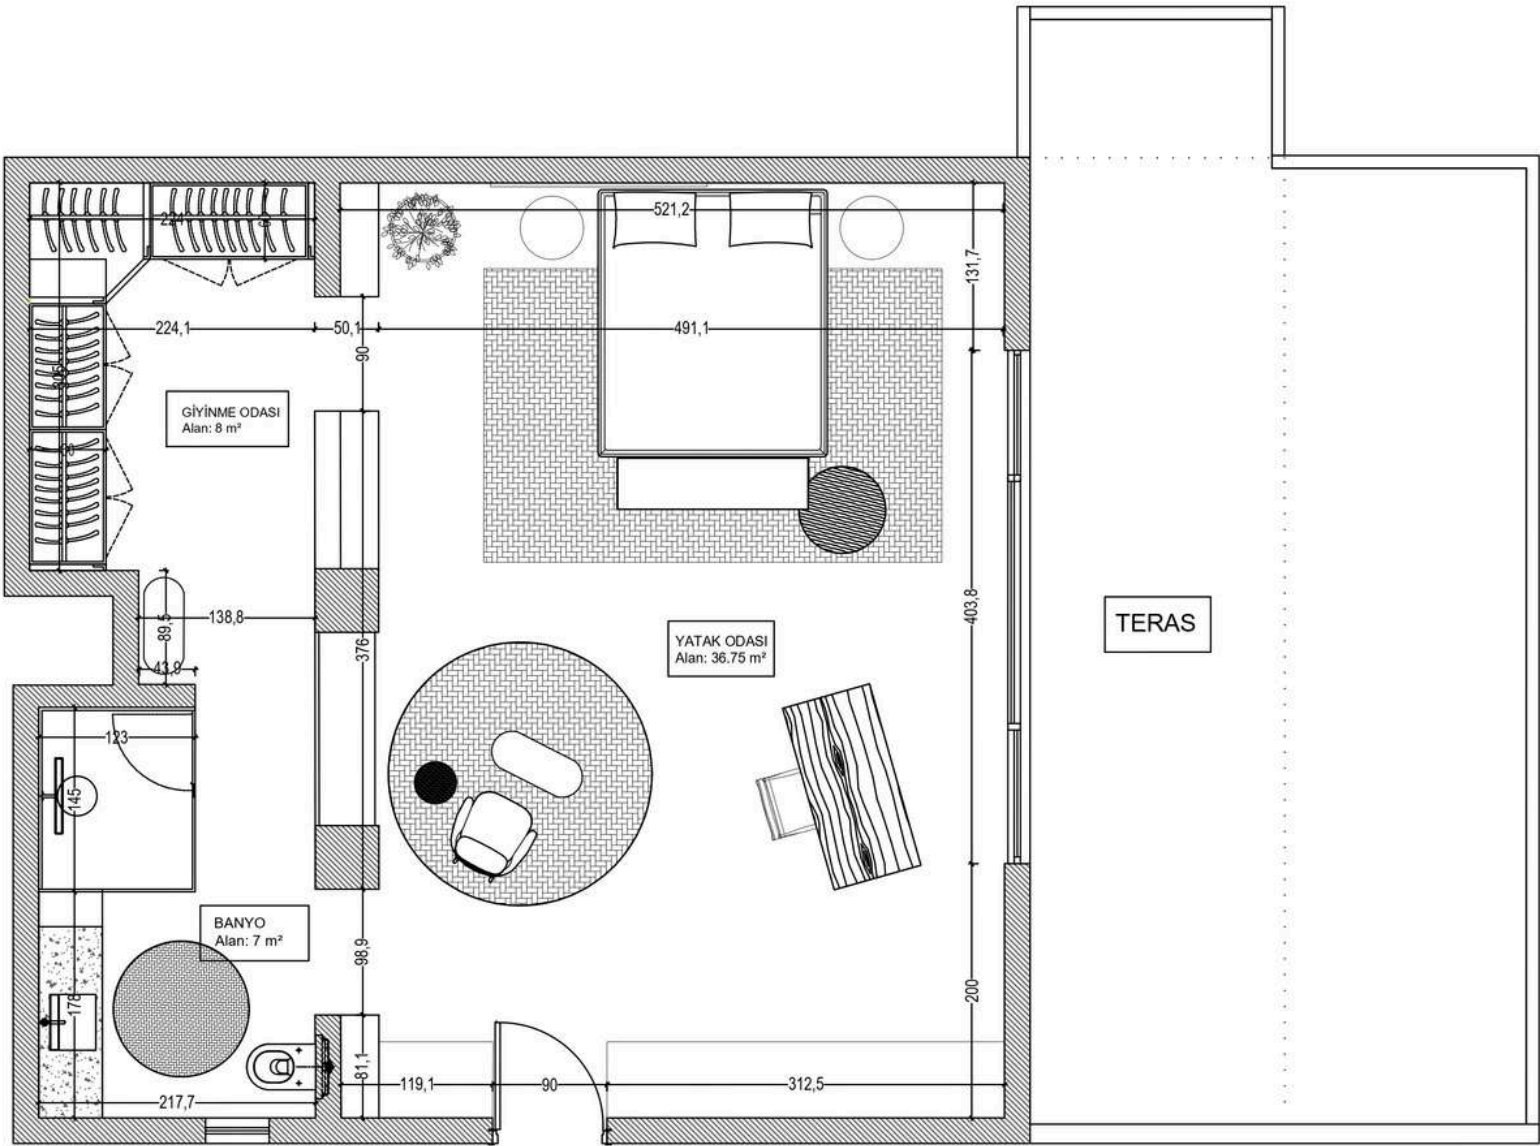

MASTER BEDROOM

Inspired by the natural textures and serene ambiance of Bodrum, this bedroom and bathroom design aims to create a refined living space that feels both grounded and luxurious. Every detail has been carefully curated to reflect a strong connection with nature through the use of organic materials and thoughtful spatial planning.

The bedroom features a harmonious blend of natural wood and stone elements. The bed rests on a custom-designed solid wood platform, while the bedside tables are crafted from whole natural stones, each with a unique form. Above them hangs a large pendant light with an organic shape, enhancing the room's sculptural quality.

The headboard wall is finished with a leather-effect cladding that adds a tactile dimension, complemented by an oversized oval mirror that expands the sense of space and light.

FLOOR PLAN

BODRUM HOUSE BEDROOM

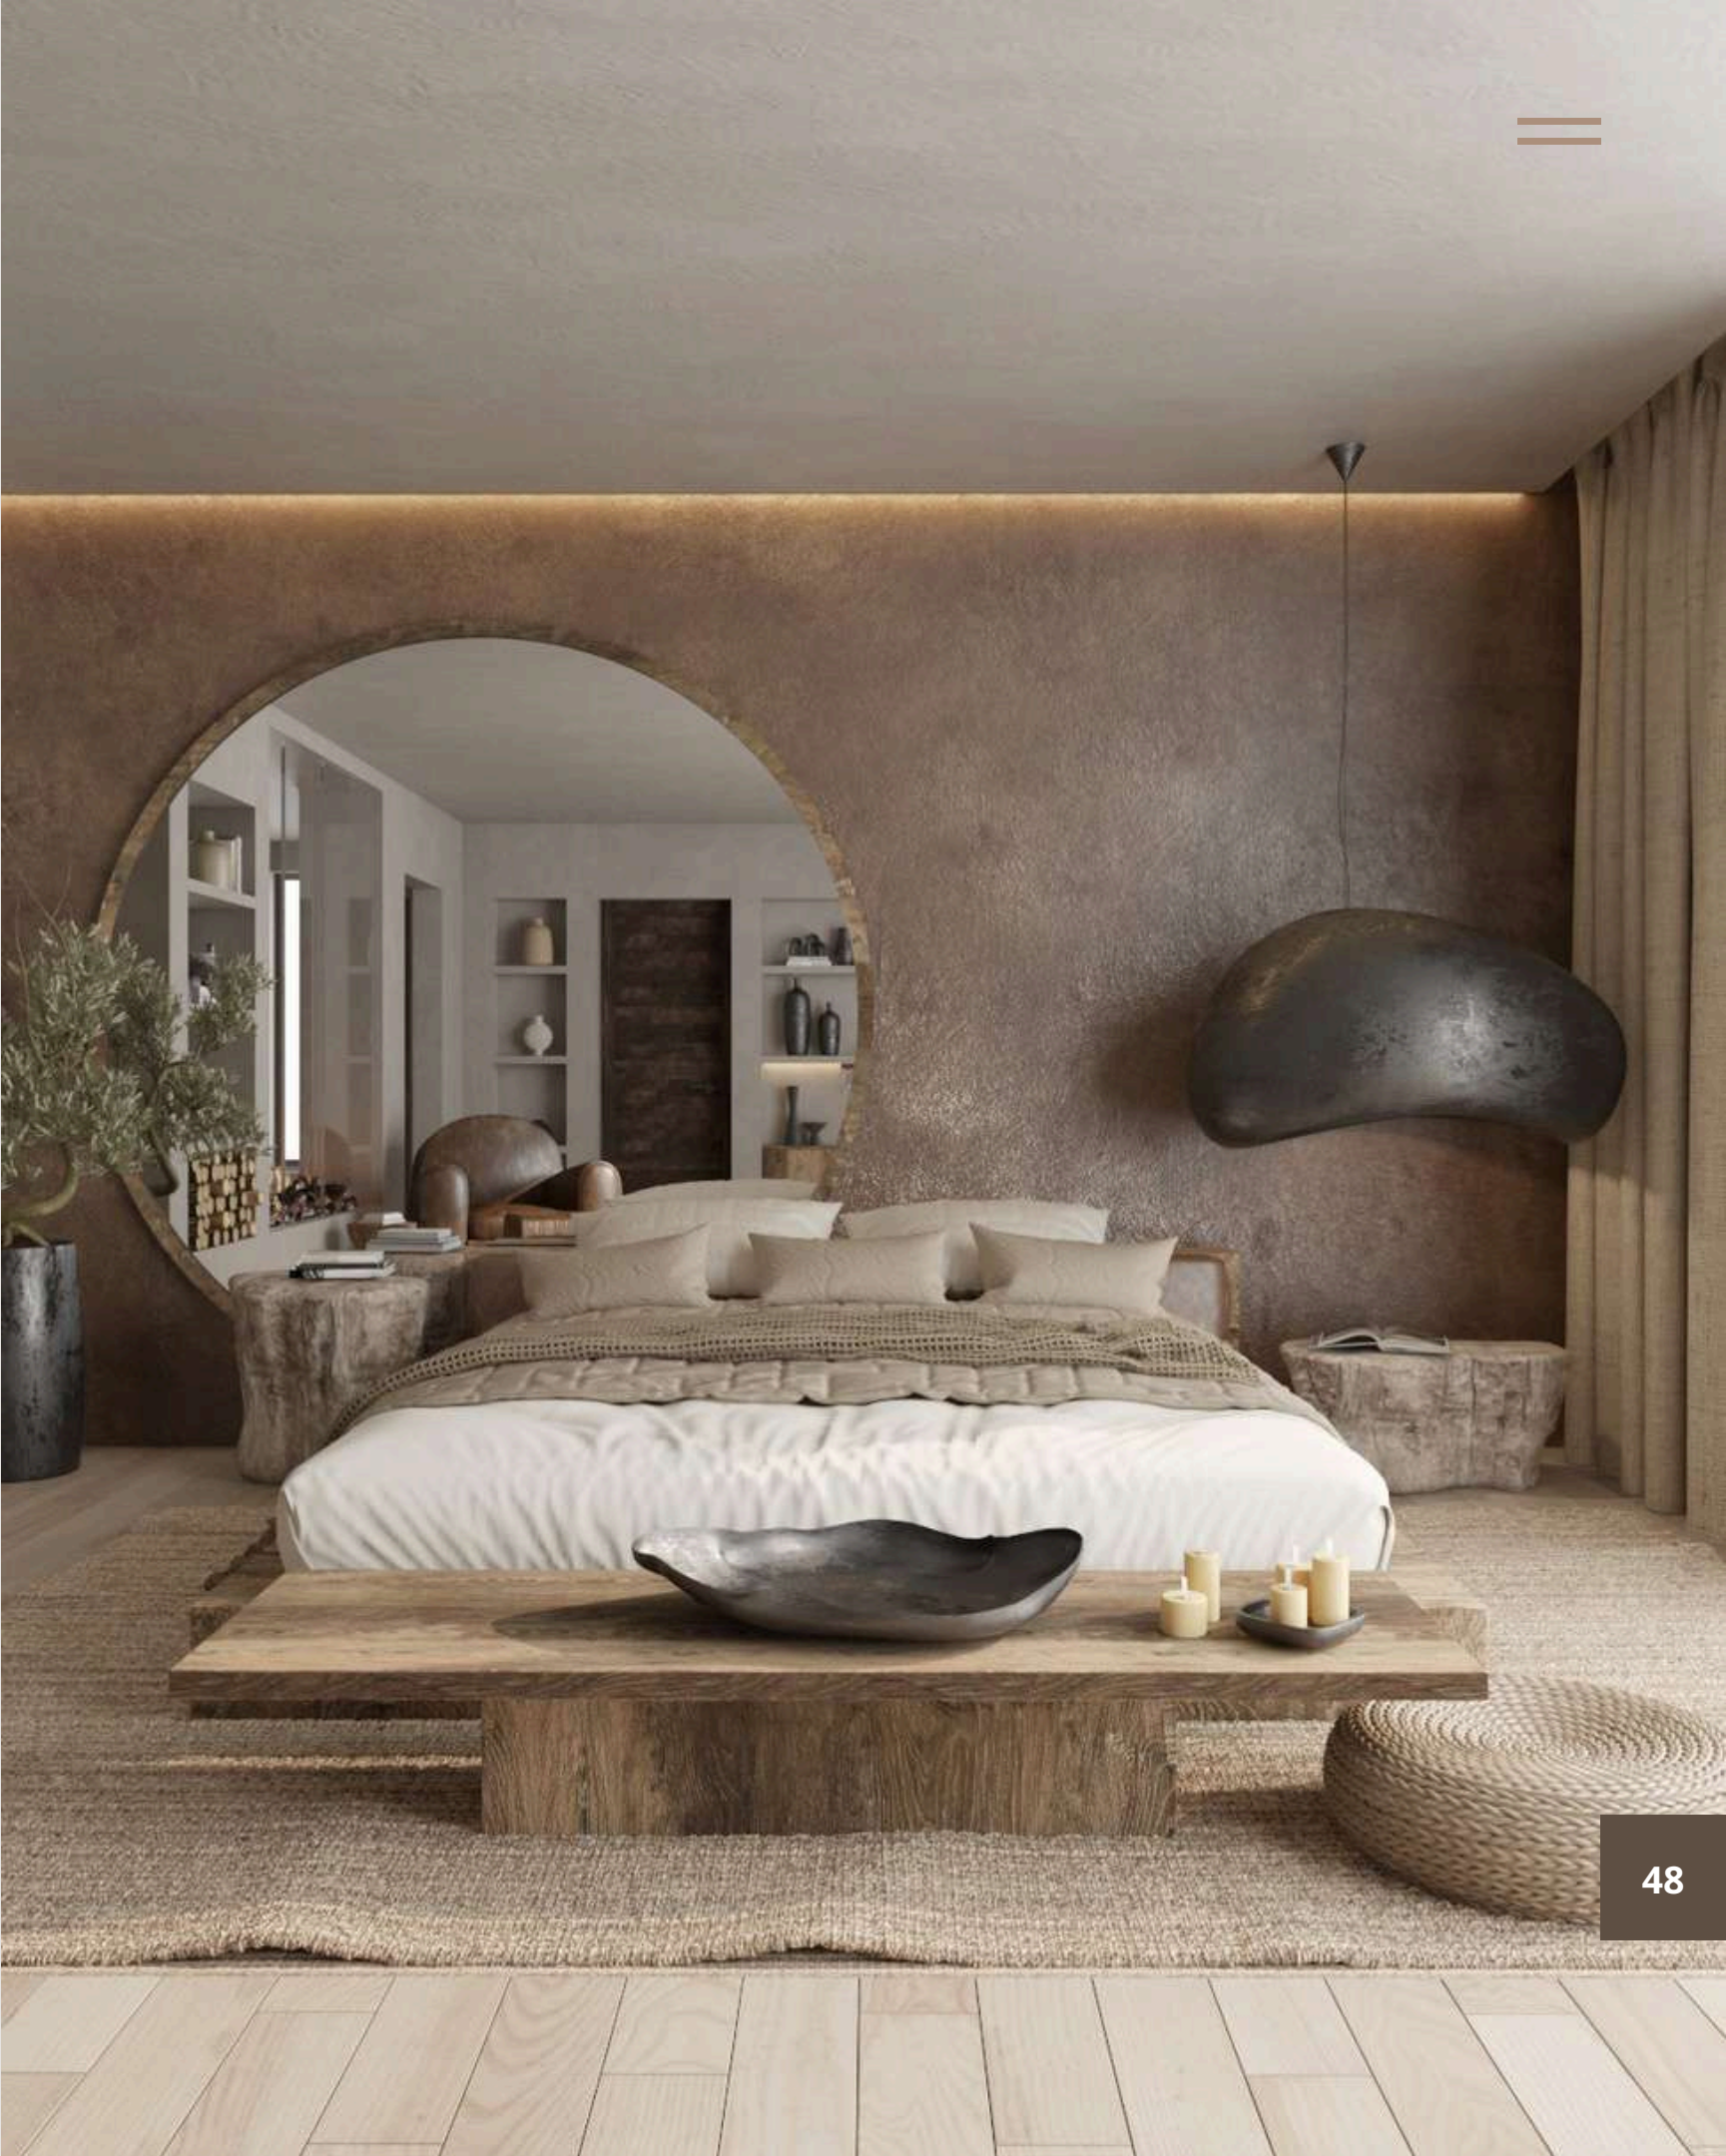

MASTER BEDROOM

One wall of the room has been transformed into a refined bar area, complete with open shelving and integrated storage—both functional and visually striking. At the heart of the room, a distressed wood table anchors the space, offering a warm and inviting setting for relaxation or social gatherings.

A floor-to-ceiling glass fireplace elegantly separates the bedroom and bathroom, maintaining visual continuity while introducing warmth and intimacy. In front of the fireplace, a cozy seating area invites residents to unwind, creating a seamless indoor retreat.

This design redefines the conventional bedroom, transforming it into a multi-layered living environment that balances comfort, function, and aesthetic integrity.

BODRUM HOUSE BEDROOM

BATHROOM

The bathroom design continues the natural and refined language of the overall space, with an emphasis on texture, durability, and minimalist elegance. The ceiling is clad entirely in water-resistant wood, adding warmth and a sense of intimacy. The shower area is crafted from large, seamless marble slabs, creating a bold, sculptural presence. Between the shower and the vanity, a recessed niche was designed to offer both functionality and visual depth.

Walls and the countertop feature a concrete-look finish, lending a raw yet sophisticated atmosphere to the space. Beneath the basin, a natural wood shelf provides subtle storage while reinforcing the organic material palette. The result is a serene and highly functional bathroom that balances natural textures with modern simplicity.

OYAK RENAULT R&D OFFICE

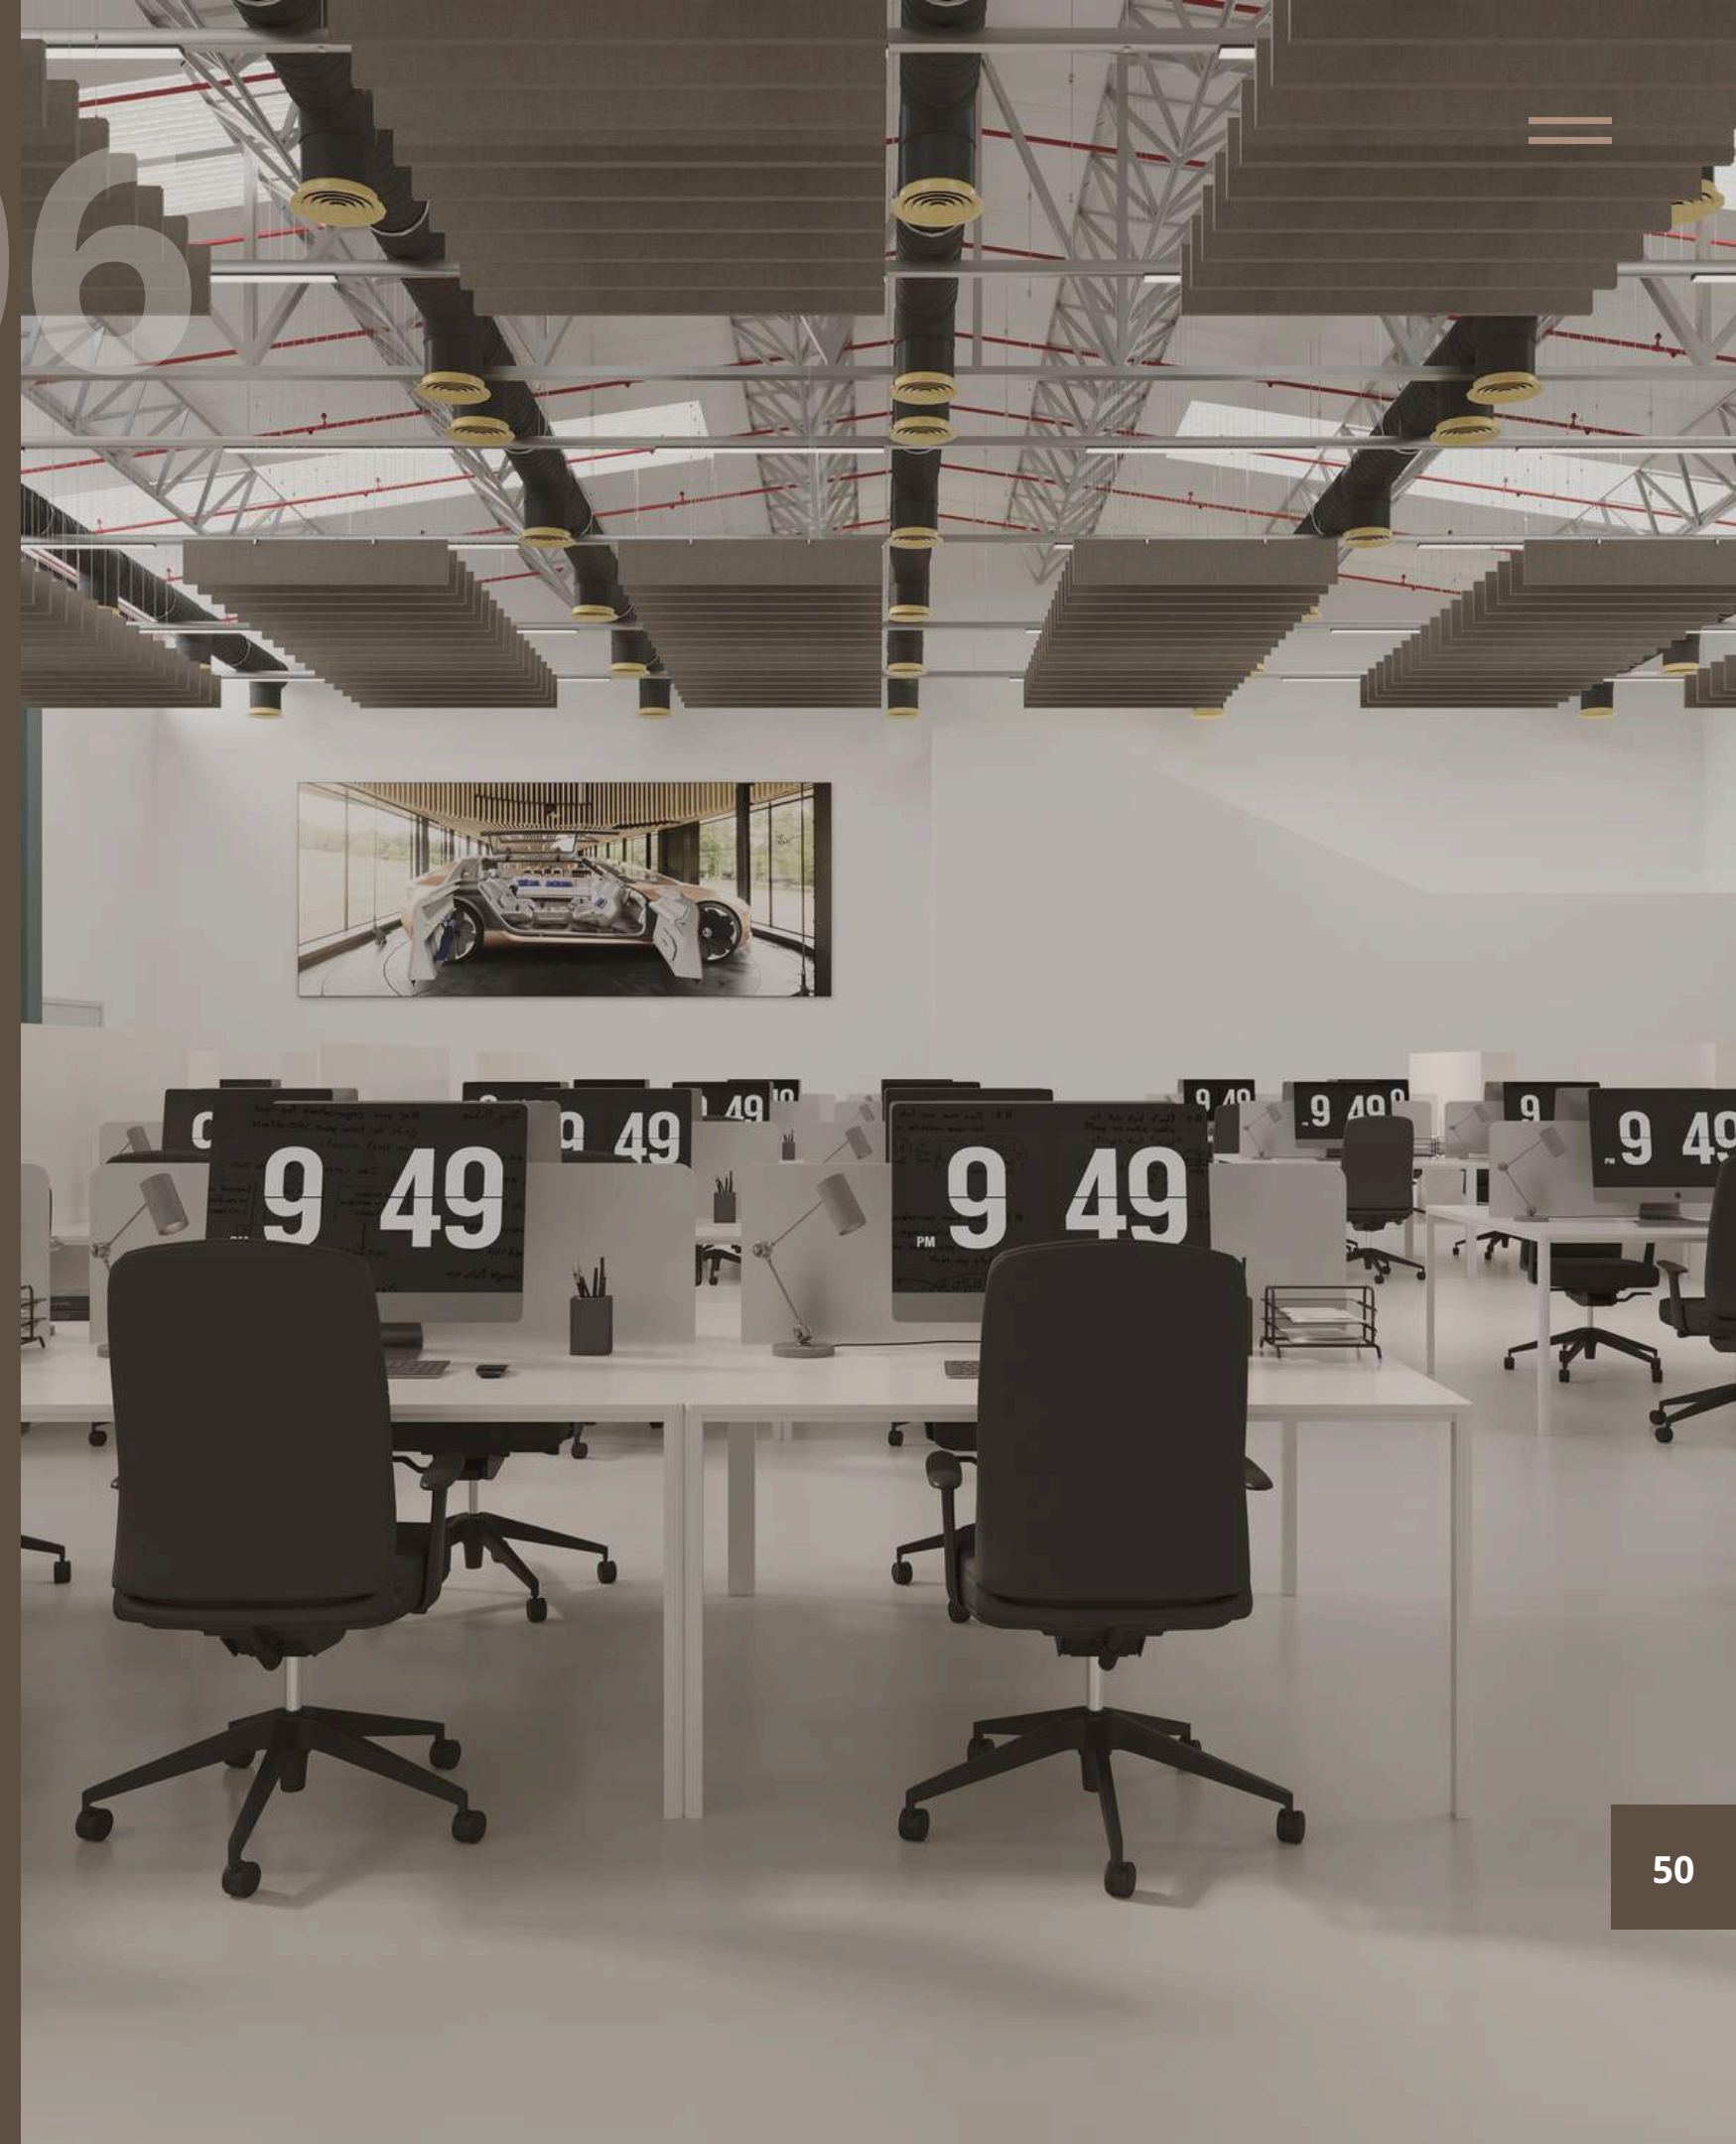

This project encompasses comprehensive interior design solutions for the meeting room, cafeteria, and open office areas within the Oyak Renault R&D Office Building. Each space was approached with a deep understanding of its unique functional requirements, prioritizing user experience while integrating ergonomic and aesthetic principles. Acoustic comfort, flexible use, and a contemporary design language served as the common thread throughout the entire design process.

In the meeting room, orange-toned acoustic panels were installed to enhance sound insulation and create a dynamic visual identity. A custom-designed 16-person meeting table, a writable wall panel for idea sharing, and a screen embedded within an acoustic module were all integrated to support a variety of meeting formats and communication needs. The 915 m² cafeteria was designed to accommodate high user density with an open and spacious layout. Acoustic panels were strategically placed to reduce noise and echo, while the ergonomic seating arrangement ensured smooth circulation and a comfortable, social dining experience.

The 500 m² open office area was developed to meet both architectural and acoustic needs. Custom-profile acoustic panels integrated into the open ceiling system addressed sound reverberation, while modular workstations and dividing panels created a balanced environment that encourages both collaboration and focused work. These interiors blend functionality with aesthetic clarity, delivering contemporary, user-centered spaces tailored to the dynamic needs of Oyak Renault’s workforce.

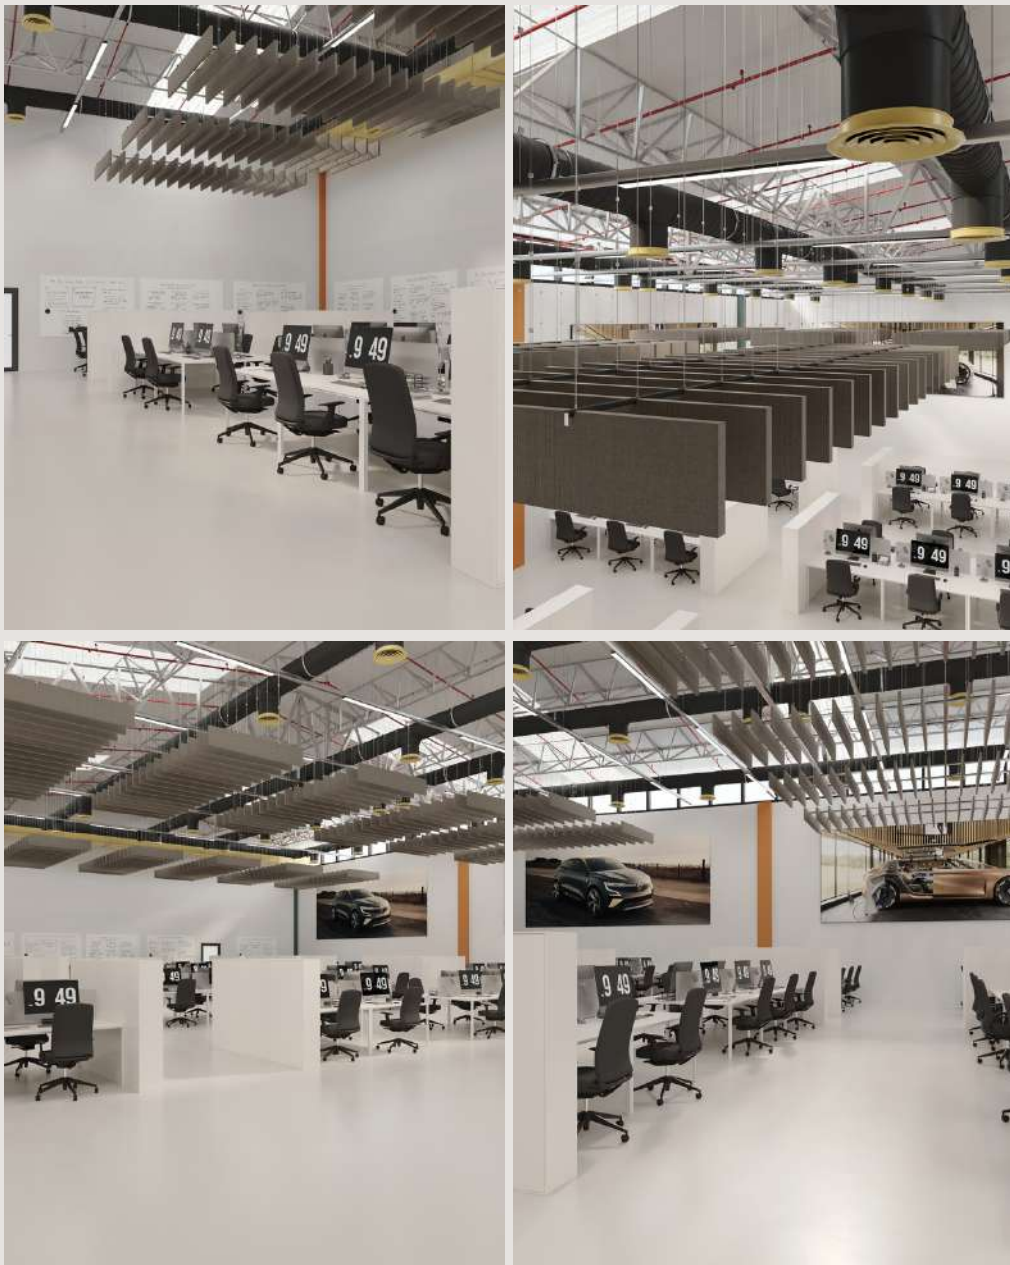

PROJECT OVERVIEW

Project Type	Commercial – Ofiice Interior Design & Visualization
Location	Bursa, TURKEY
Area	1495 sq.m
Date / Year	2024

OYAK RENAULT R&D OFFICE

OPEN OFFICE SPACE

We carried out a comprehensive interior design project for a 500 m² open office space within the Renault headquarters, addressing both architectural and acoustic needs. To eliminate echo and sound transmission issues, we designed and installed custom-profile acoustic panels integrated into the exposed ceiling structure. These panels not only improved the acoustic performance of the space but also added visual value, creating a rhythmic, modern ceiling that complements the industrial character of the architecture.

In parallel, we developed an ergonomic workstation layout with modular desks and divider panels, prioritizing user experience. The layout creates a balance between collaboration and individual focus, while also maximizing the use of natural light throughout the workspace.

By combining acoustic comfort, ergonomic planning, and visual coherence, we created a quiet, efficient, and aesthetically refined working environment tailored to Renault's modern office needs.

OYAK RENAULT R&D OFFICE

MEETING ROOM

The 80 m² meeting room located within the Oyak Renault R&D office building was designed to meet both functional requirements and aesthetic expectations. To enhance acoustic comfort, orange-toned acoustic panels were installed on the ceiling. These panels not only provided effective sound insulation but also introduced a dynamic and energetic atmosphere to the space.

A custom-designed meeting table with a capacity for 16 participants was placed at the heart of the room. To encourage active idea sharing during meetings, a writable wall panel was integrated into the space. This feature enhances flexibility by supporting note-taking, sketching, and interactive presentations throughout meetings.

For video conferencing, a screen unit was incorporated within a specially designed acoustic module. This solution facilitated clear digital communication while improving acoustic performance, ultimately enabling a more efficient and comfortable meeting experience.

OYAK RENAULT R&D OFFICE

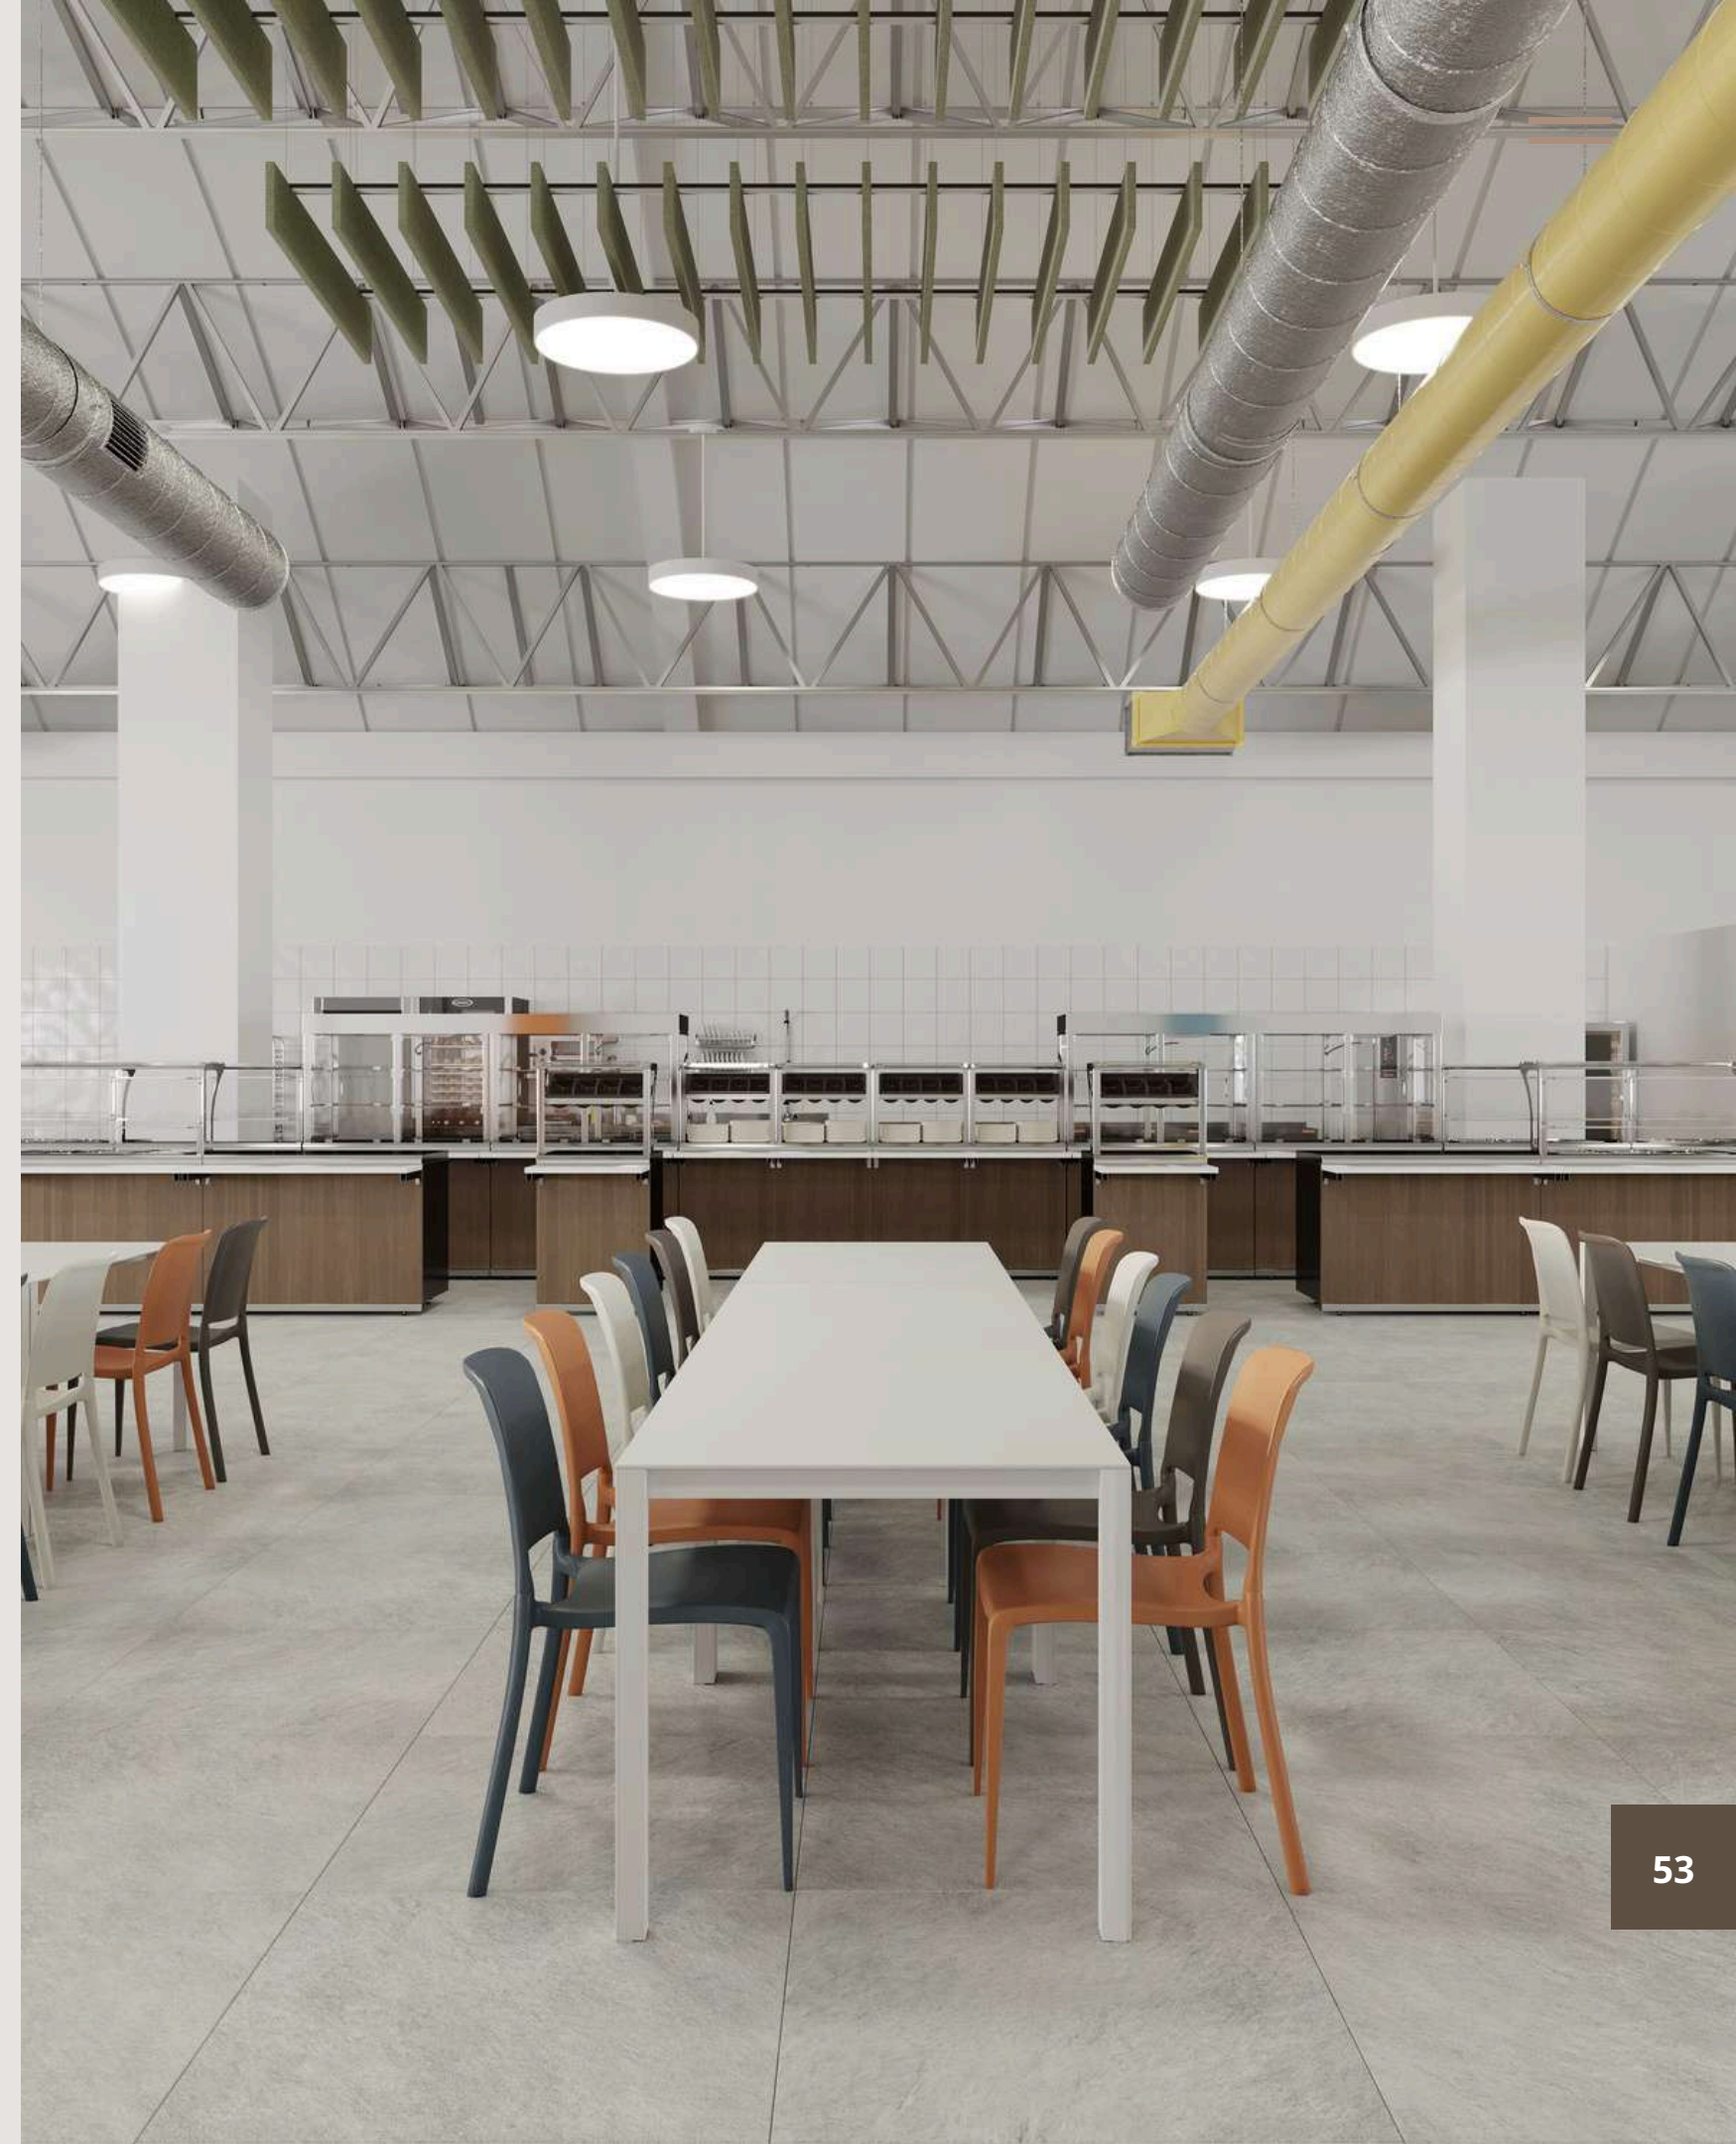

CORPORATE CAFETERIA

A comprehensive interior design was developed for the 915 m² cafeteria area located within the Oyak Renault R&D Office Building. The design process aimed to create a functional and comfortable social space that could accommodate high user density. To ensure an open and airy atmosphere, table layouts and overall circulation were carefully planned and optimized.

To enhance acoustic comfort within the cafeteria, acoustic panels were integrated into the existing space frame ceiling system. In this large-volume area with high foot traffic, the panels were strategically positioned to minimize echo and reduce noise levels. This solution was designed to provide users with a quieter and more pleasant dining experience.

The arrangement of tables and chairs was designed with careful attention to circulation, ergonomics, and seating capacity. Even during peak hours, the layout allows for easy movement, encourages social interaction, and offers zones for rest and relaxation. This project delivers a user-centered cafeteria environment that successfully balances functional requirements with acoustic comfort and aesthetic coherence.

HUAWEI OFFICE

The Huawei office design project was developed with a holistic approach that prioritizes user experience, spatial efficiency, and brand identity. The overall concept focused on creating a dynamic and modern working environment that balances collaboration and individual productivity. Each area within the office was carefully planned to serve a specific function while contributing to a cohesive spatial narrative. Ergonomics, flexibility, and visual clarity served as key principles throughout the design process.

A central objective of the project was to enhance the everyday work experience through smart spatial organization, intuitive circulation, and purposeful material choices. Open workspaces, meeting rooms, social zones, and support areas such as the printer section were all designed to respond to different work modes while maintaining visual and functional unity. The integration of modular furniture, acoustic solutions, and adaptable layouts ensures that the office can evolve with the needs of its users over time.

Aesthetic considerations were closely aligned with functionality. Natural textures, vibrant accent colors, and motivational graphic elements were strategically incorporated to reflect Huawei’s innovative and people-centered brand culture. The result is a high-performing office environment that supports employee well-being, encourages communication, and visually reinforces the company’s identity in every detail.

PROJECT OVERVIEW

Project Type	Commercial – Office Interior Design & Visualization
Location	İstanbul, TURKEY
Area	500 sq.m
Date / Year	2024

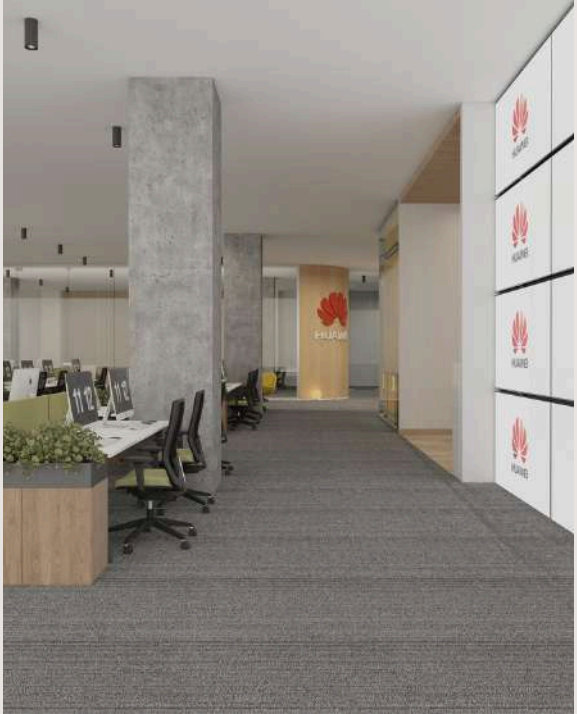

HUAWEI OFFICE

OPEN OFFICE SPACE

The open-plan office design we implemented at the Huawei building was shaped by a user-centric and functional layout approach. The arrangement was designed to enhance interaction among employees while also supporting individual focus. Desks were designed based on principles of ergonomics and modularity, offering flexible usage tailored to the needs of different teams. Chairs were selected to provide comfort during long working hours and were coordinated with the desk design to create a cohesive aesthetic throughout the office.

To enhance the visual and motivational aspects of the design, inspiring quotes were featured on the walls. These not only reflected the brand's values but were also curated to inspire employees. Digital screens placed in communal areas were used for up-to-date announcements and content that supports internal communication. In this way, the office was transformed into a functional and interactive communication platform.

The flooring design was conceived to help distinguish different zones within the open-plan area, using variations in materials and colors for emphasis. Quiet workspaces, meeting corners, and social areas were thus naturally delineated. Partition elements, with their semi-transparent and aesthetically pleasing designs, provided privacy while maintaining a bright and spacious atmosphere. All these elements came together to create a modern work environment that enhances productivity while prioritizing employee comfort.

HUAWEI OFFICE

PRINTER AREA

The printer area was designed as a functional hub to efficiently manage document flow within the office. Printers, scanners, and related equipment were positioned for easy access, while cabinets, shelves, and organizers provided temporary storage for printed materials. The ergonomic layout ensures practical and efficient use by employees.

Visually set apart from the main office space, the area features a blue accent wall that defines the zone both functionally and aesthetically. This color choice aids in wayfinding while adding a vibrant, dynamic touch to the workspace. As a result, the printer area contributes to the overall design coherence, going beyond its purely technical role.

MEETING ROOM

The meeting room was designed to support focused communication and effective team collaboration. With seating for six, it provides an intimate and efficient setting for both group meetings and one-on-one discussions. The yellow-toned color palette creates an energetic atmosphere that enhances engagement and concentration. Ergonomic chairs and integrated storage units contribute to comfort and organization.

Wooden wall panels add warmth and acoustic comfort, striking a balance between professionalism and a welcoming feel. A wall-mounted screen enables visual presentations, with all technical features arranged for ease of use. This cohesive design ensures the meeting room complements the overall office concept, offering both functionality and visual harmony.

CR PENTHOUSE

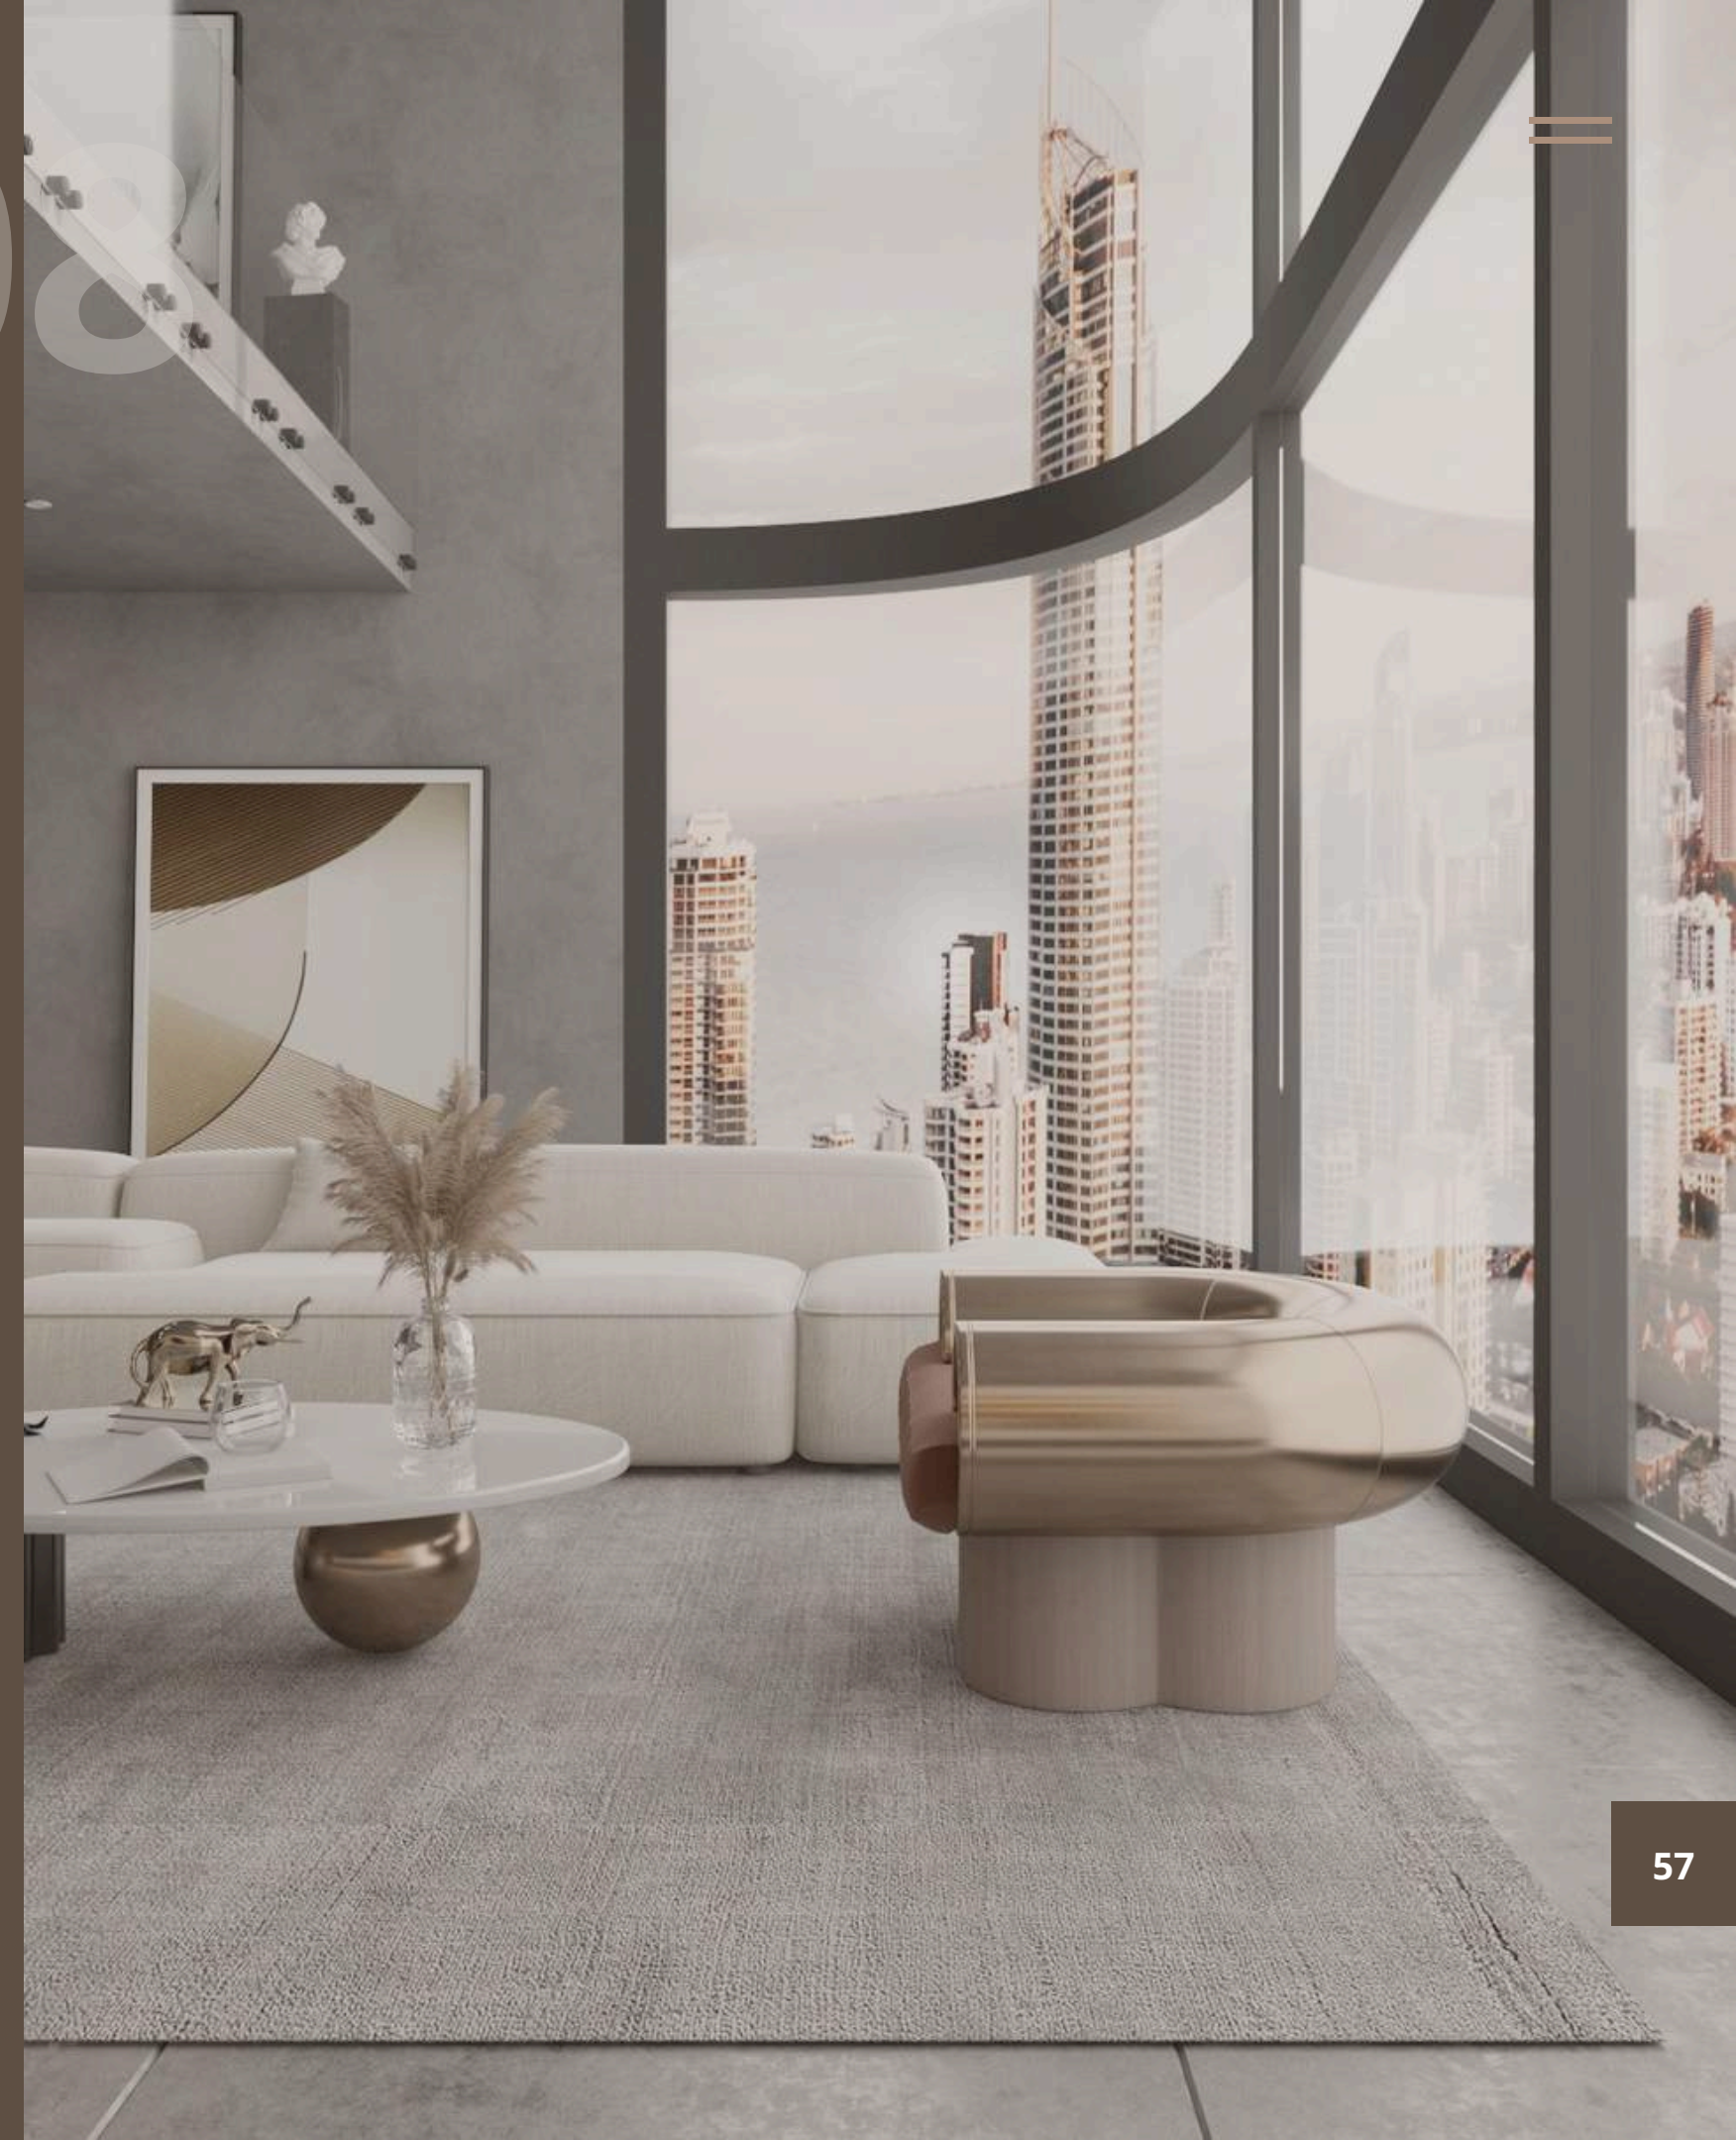

This project presents a sophisticated penthouse design located in the United States, seamlessly blending contemporary living with luxurious detail. Organized across two levels, the layout features an open-plan kitchen and living area on the lower floor, while the upper floor is dedicated to the bedroom suite. With its functional spatial planning and open flow, the residence offers an expansive and uninterrupted living experience.

The interior material palette was carefully selected to evoke a refined and elegant atmosphere. Warm wood textures contrast with sleek black accents and striking marble surfaces, while concrete-look walls and industrial elements reflect the spirit of modern urban living. The design language is further enhanced by custom furniture and ambient lighting, creating a cohesive and expressive environment.

Floor finishes combine high-quality ceramic tiles with natural hardwood, offering both visual richness and practical durability. Every material and design choice was made to balance aesthetics with comfort and usability. This penthouse delivers a unique interpretation of contemporary urban lifestyle through its bold architectural character, premium finishes, and meticulous attention to detail.

PROJECT OVERVIEW

Project Type	Residential– Interior Design & Visualization
Location	Delaware, USA
Area	110 sq.m
Date / Year	2024

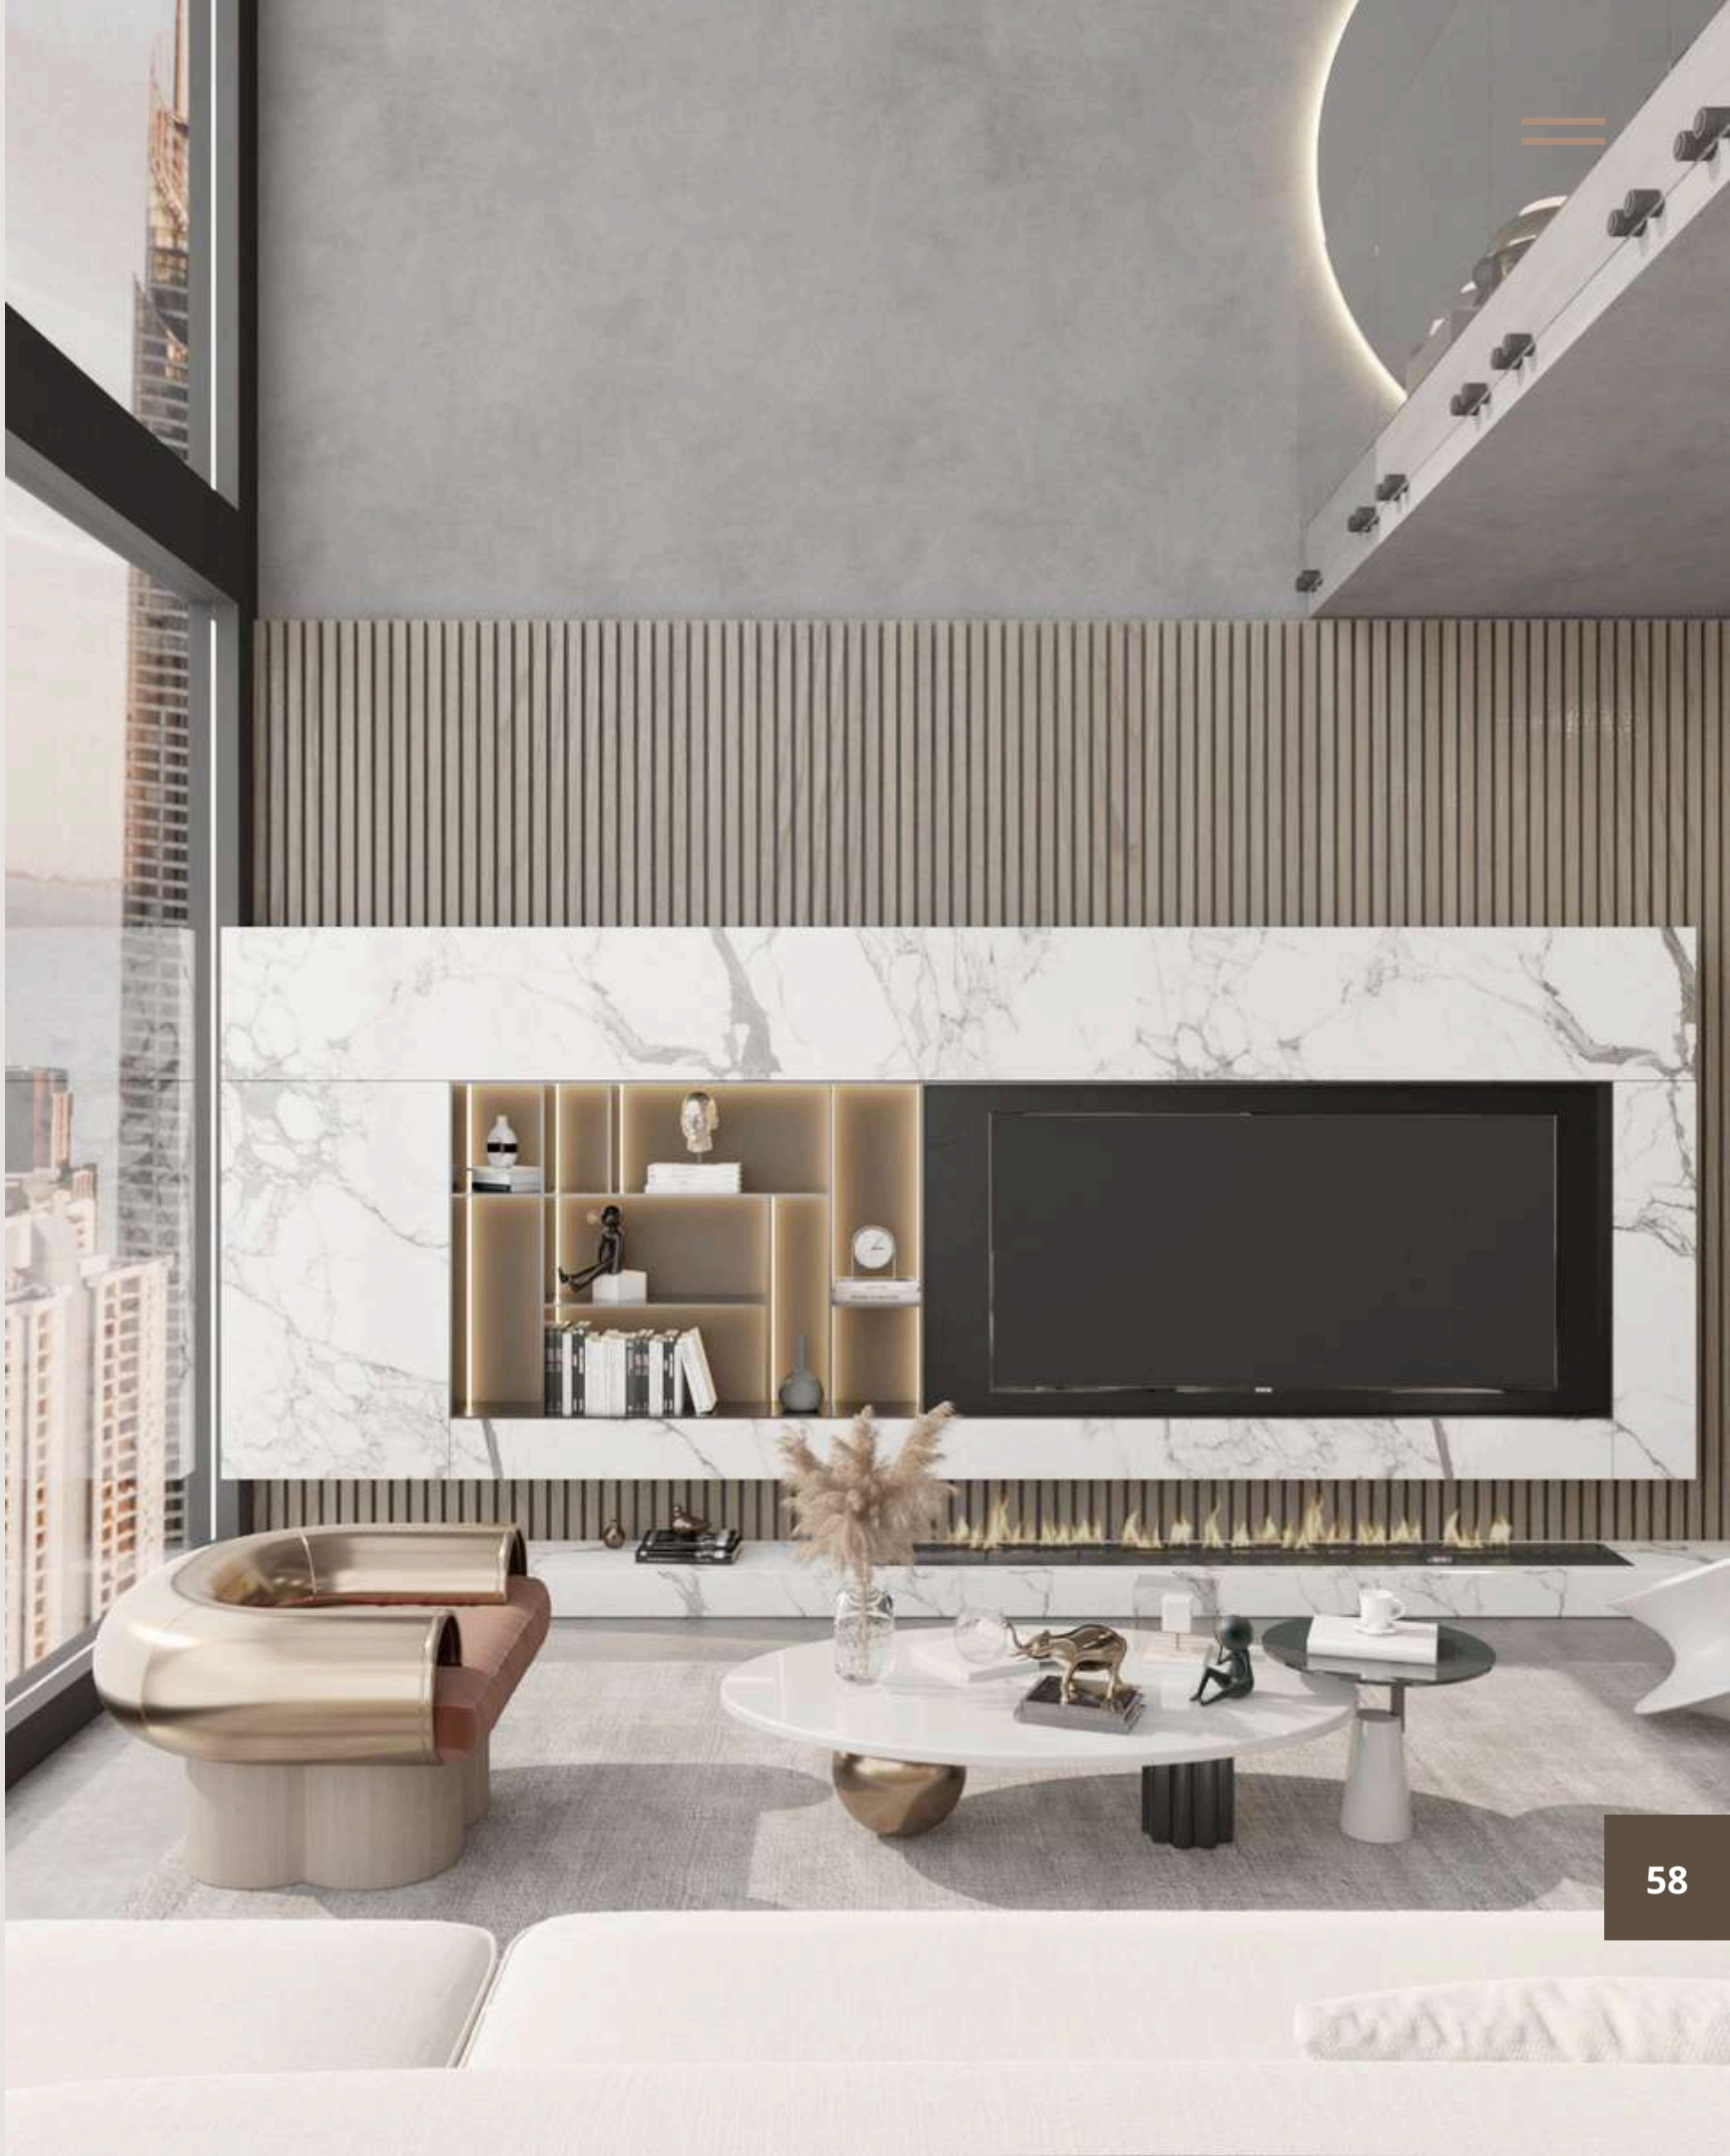

CR PENTHOUSE

LIVING ROOM

The living room is shaped in accordance with the curved form of the penthouse's exterior glass façade, which defines the architectural identity of the space. This fluid geometry is reflected in both the spatial arrangement and the placement of the furniture, allowing panoramic views and natural light to fill the room through floor-to-ceiling windows. The result is a harmonious blend of indoor comfort and the visual impact of the exterior surroundings.

At the heart of the space stands a custom-designed marble TV wall that combines functionality with elegance. The television is set within a minimal black frame, accompanied by softly illuminated shelves that display sculptural objects and carefully curated books. Below, a full-length marble slab integrates a sleek linear fireplace, adding warmth and architectural depth. Behind the marble, vertical wooden panels provide tactile contrast and enrich the spatial composition.

The furniture selection has been carefully curated to complement the architectural features while preserving the openness of the space. Soft, neutral-toned upholstery pairs seamlessly with sculptural forms and metallic accents, notably the custom-designed bronze-toned armchair. Low-profile coffee tables styled with modern art pieces contribute to a refined and cohesive ambiance. Altogether, the living room reflects a meticulous design approach that unites luxury, comfort, and contemporary sophistication.

CR PENTHOUSE

KITCHEN

Located on the lower level of the penthouse, the kitchen is seamlessly integrated into the open-plan living area. The use of dark tones lends the space a sophisticated and contemporary character. Matte-finish cabinetry, clean lines, and a cohesive color palette create a minimalist yet impactful aesthetic. The design prioritizes not only functionality but also a strong visual identity.

The central island serves as both a functional workspace and a social hub. Surrounded by sleek bar stools, it forms a smooth transition between the kitchen and living area. An open shelving system, highlighted with warm ambient lighting, offers both storage and a decorative focal point. Built-in appliances and a custom-designed wine rack elevate the space with refined, luxury-driven details.

The staircase, integrated with an indoor cactus garden, brings a unique natural element into the heart of the space. The stone-covered plant bed complements the concrete-effect floors and walls, softening the overall ambiance while maintaining architectural cohesion. This approach transforms a traditionally unused corner into a dynamic and organic design feature. Overall, the kitchen reflects a thoughtful blend of elegance, efficiency, and spatial harmony.

CR PENTHOUSE

BEDROOM

Located on the upper floor of the penthouse, the bedroom was designed to create a modern and sophisticated living space. Positioned at the center of the room, the bed serves as a striking focal point, flanked by pendant lights suspended from the ceiling that bring both symmetry and visual balance. Dominated by dark tones, particularly black, the furniture adds a strong, elegant character to the space, while the lighting elements provide contrast, preventing the atmosphere from feeling heavy.

The transition between the bedroom and the walk-in closet is defined by a full-height glass fireplace, which visually separates the zones while preserving a sense of openness and transparency. In the dressing area, glass-fronted wardrobes not only enhance the modern aesthetic but also offer practical visibility of their contents—combining style and function seamlessly.

The vanity corner adds a refined touch to the overall design. Anchored by a large, round LED mirror mounted on the wall, the dressing table is both elegant and practical. It complements the room’s darker palette and contributes to the cohesive design language. Altogether, the space offers a luxurious yet intimate environment, tailored for comfort and contemporary living.

CR PENTHOUSE

BEDROOM

BUNGALOW HOUSE

This interior design project is conceptualized as a mountain retreat that blends modern comfort with a nature-integrated living experience. The architectural form, supported by natural materials, aims to create a serene atmosphere in harmony with its surroundings. The space offers users a living environment that is both aesthetically refined and functionally efficient.

Natural wood cladding, selected for its rich texture, is used consistently across all surfaces to create a warm and inviting ambiance. The minimalist approach in the interior preserves spatial clarity, while carefully curated furniture and design elements introduce a sense of understated elegance. Large openings connect the interior to the surrounding landscape, visually extending the space and establishing a strong dialogue between the user and nature.

The core idea of the design is to provide a peaceful and introspective living space in isolation. Natural light streaming through the expansive glass surfaces brings dynamism to the space while blurring the boundaries between interior and exterior. As a result, the interior offers an immersive experience that reflects both the stillness of winter and the seasonal transitions of nature.

PROJECT OVERVIEW

Project Type	Residential– Interior Design & Visualization
Location	Sapanca, TURKEY
Area	25 sq.m
Date / Year	2023

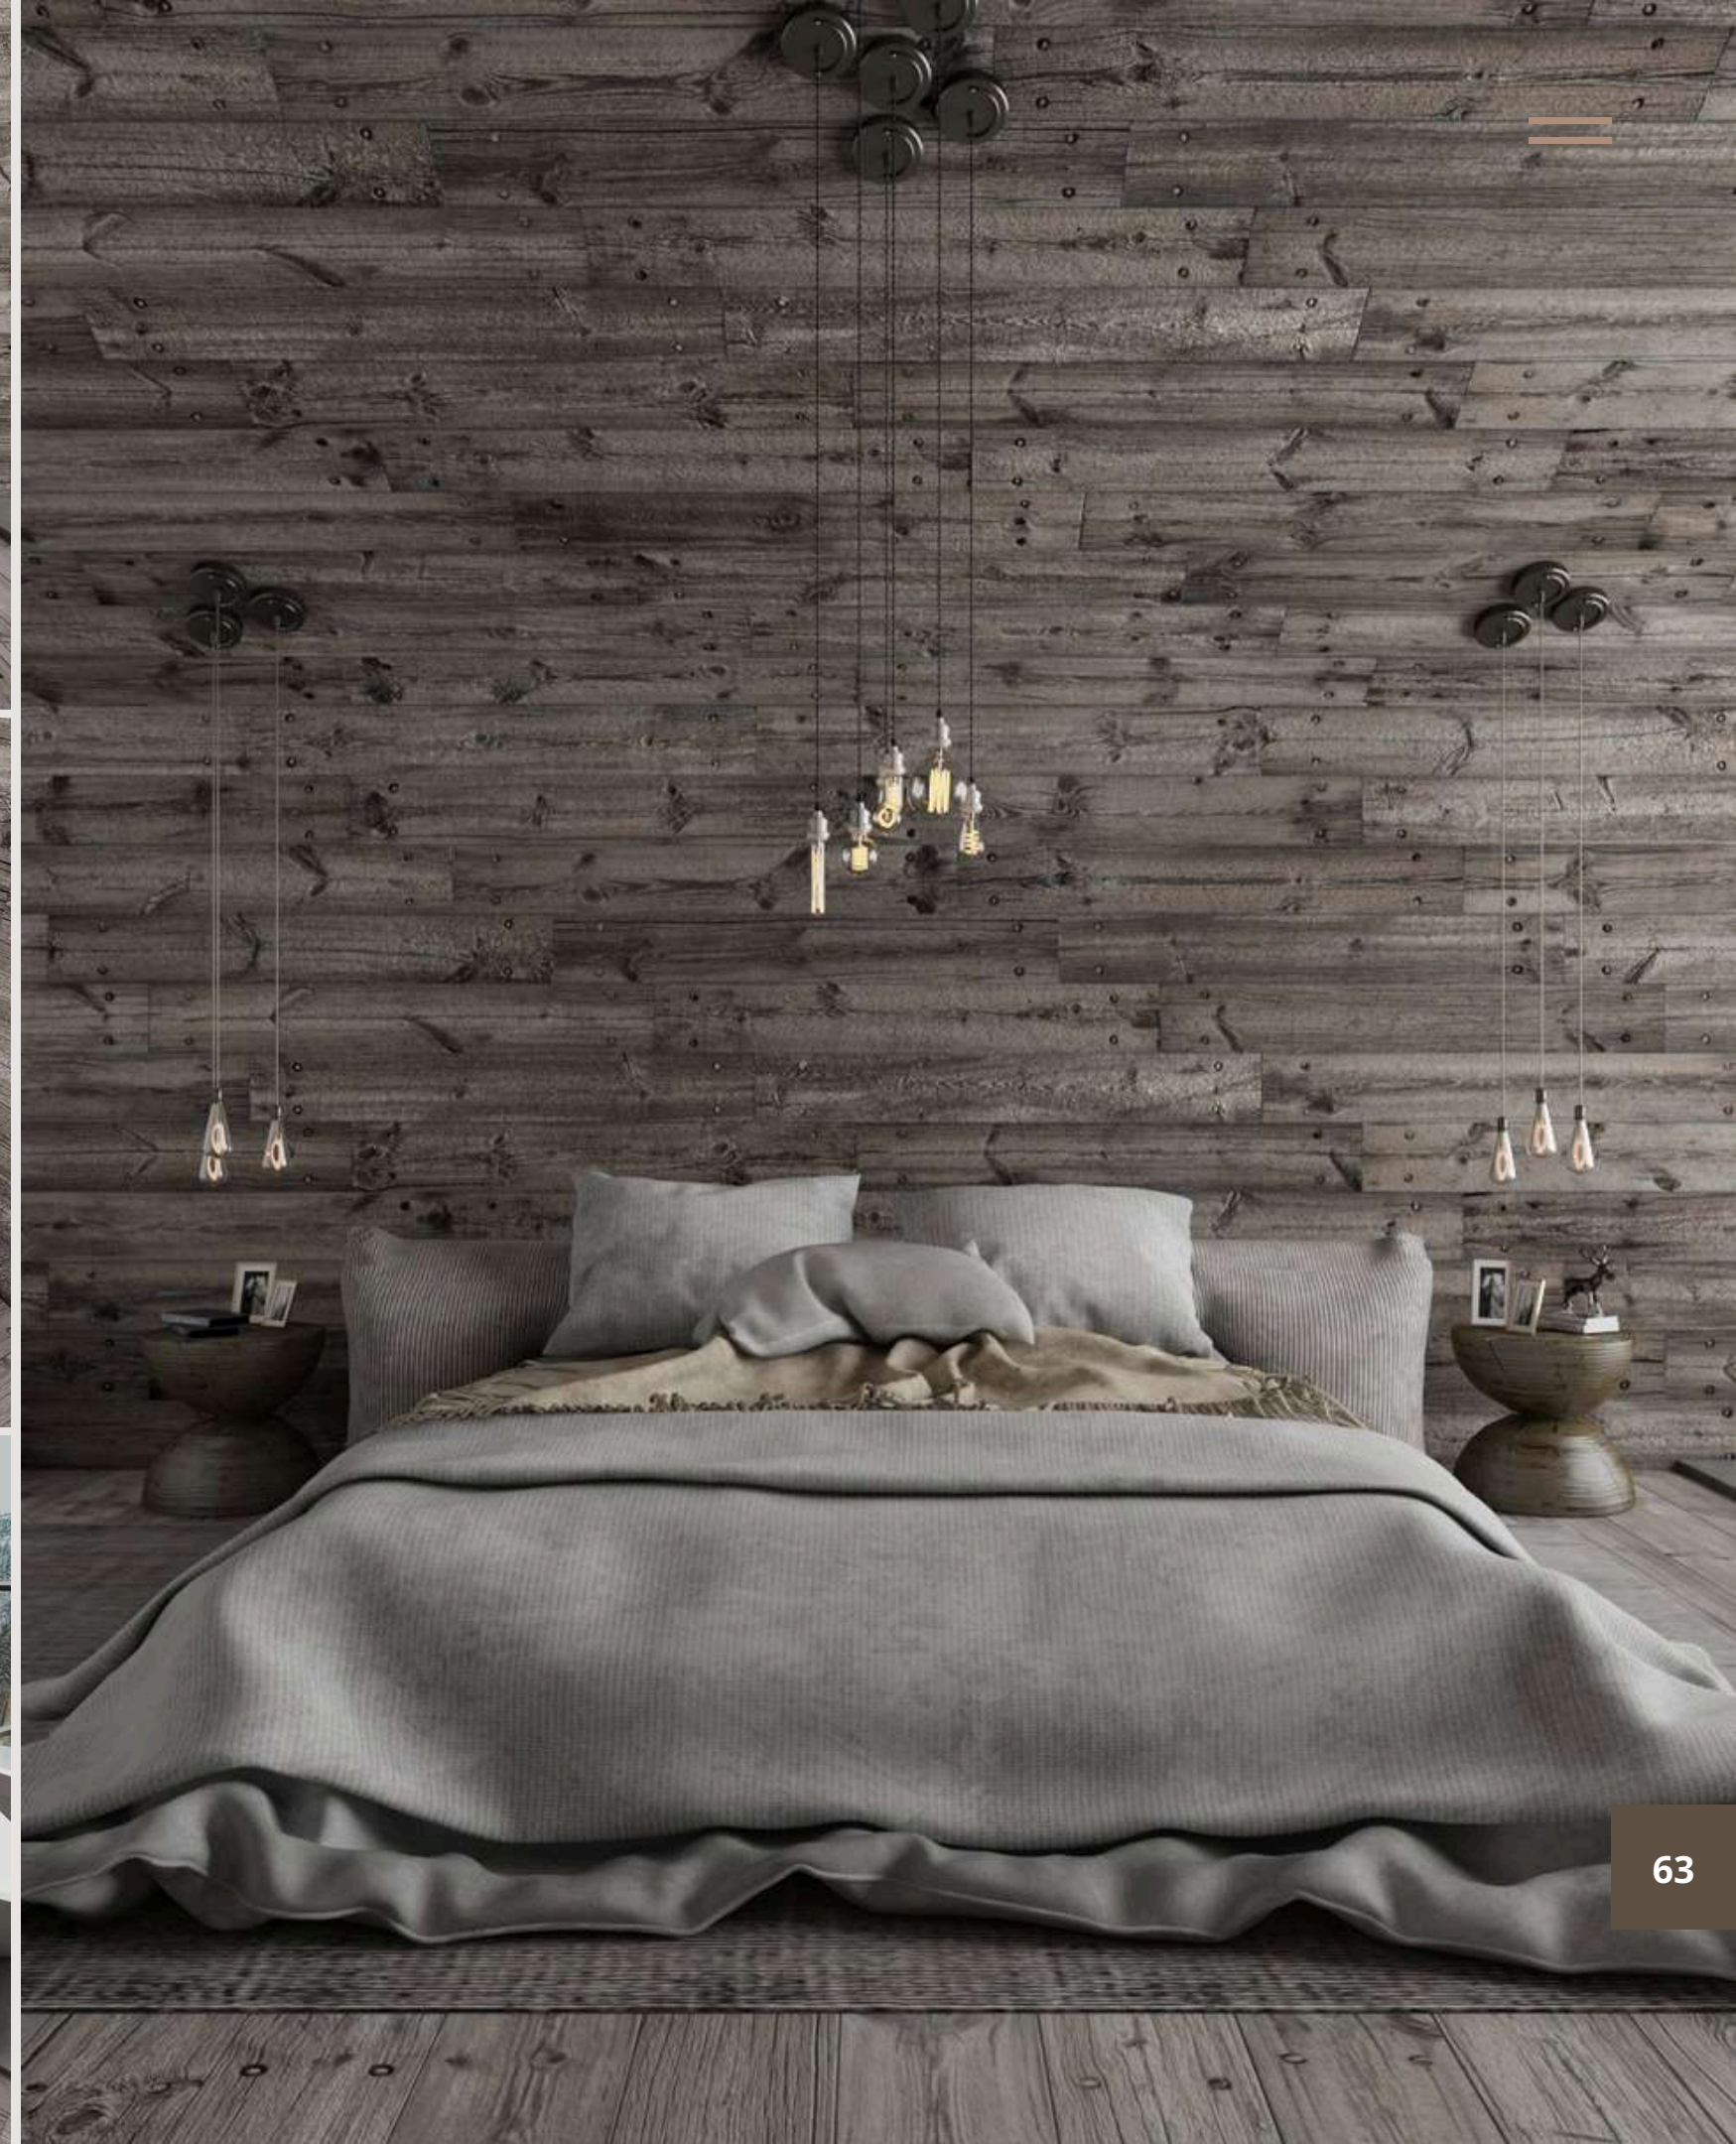

BUNGALOW HOUSE

The most striking feature in the interior layout is the freestanding bathtub positioned directly against the geometric glass façade. This design choice adds both aesthetic value and experiential depth to the space. While soaking in the bath, the user can enjoy panoramic views of the landscape, feeling intimately connected to the natural surroundings. The continuation of wood cladding across the ceiling and walls creates a cohesive shell that wraps the volume in a tactile, organic layer.

The bedroom area is designed to deliver high comfort and aesthetic harmony without compromising functionality. The generously sized bed is paired with soft, textured fabrics and a subdued, neutral color palette to reinforce the calm ambiance. Asymmetrically placed pendant lights add rhythm and visual interest, while offering soft, ambient illumination suited to the tranquil purpose of the space.

The natural textures used in the flooring and furnishings foster both visual and tactile connection, creating a sense of belonging for the user. The rustic approach, enriched with subtle industrial details, transforms the space into more than just a visually pleasing environment—it becomes a holistic living experience centered on comfort, simplicity, and a profound connection with nature.

WUPPERTAL PROJECT

Wuppertal Residential Project is a housing design located in the city of Wuppertal, Germany. The project consists of three individual apartments—Apartment 5, Apartment 6, and Apartment 8. Each apartment was uniquely studied in terms of spatial organization, interior design, and visual representation to reflect a distinct yet cohesive living experience.

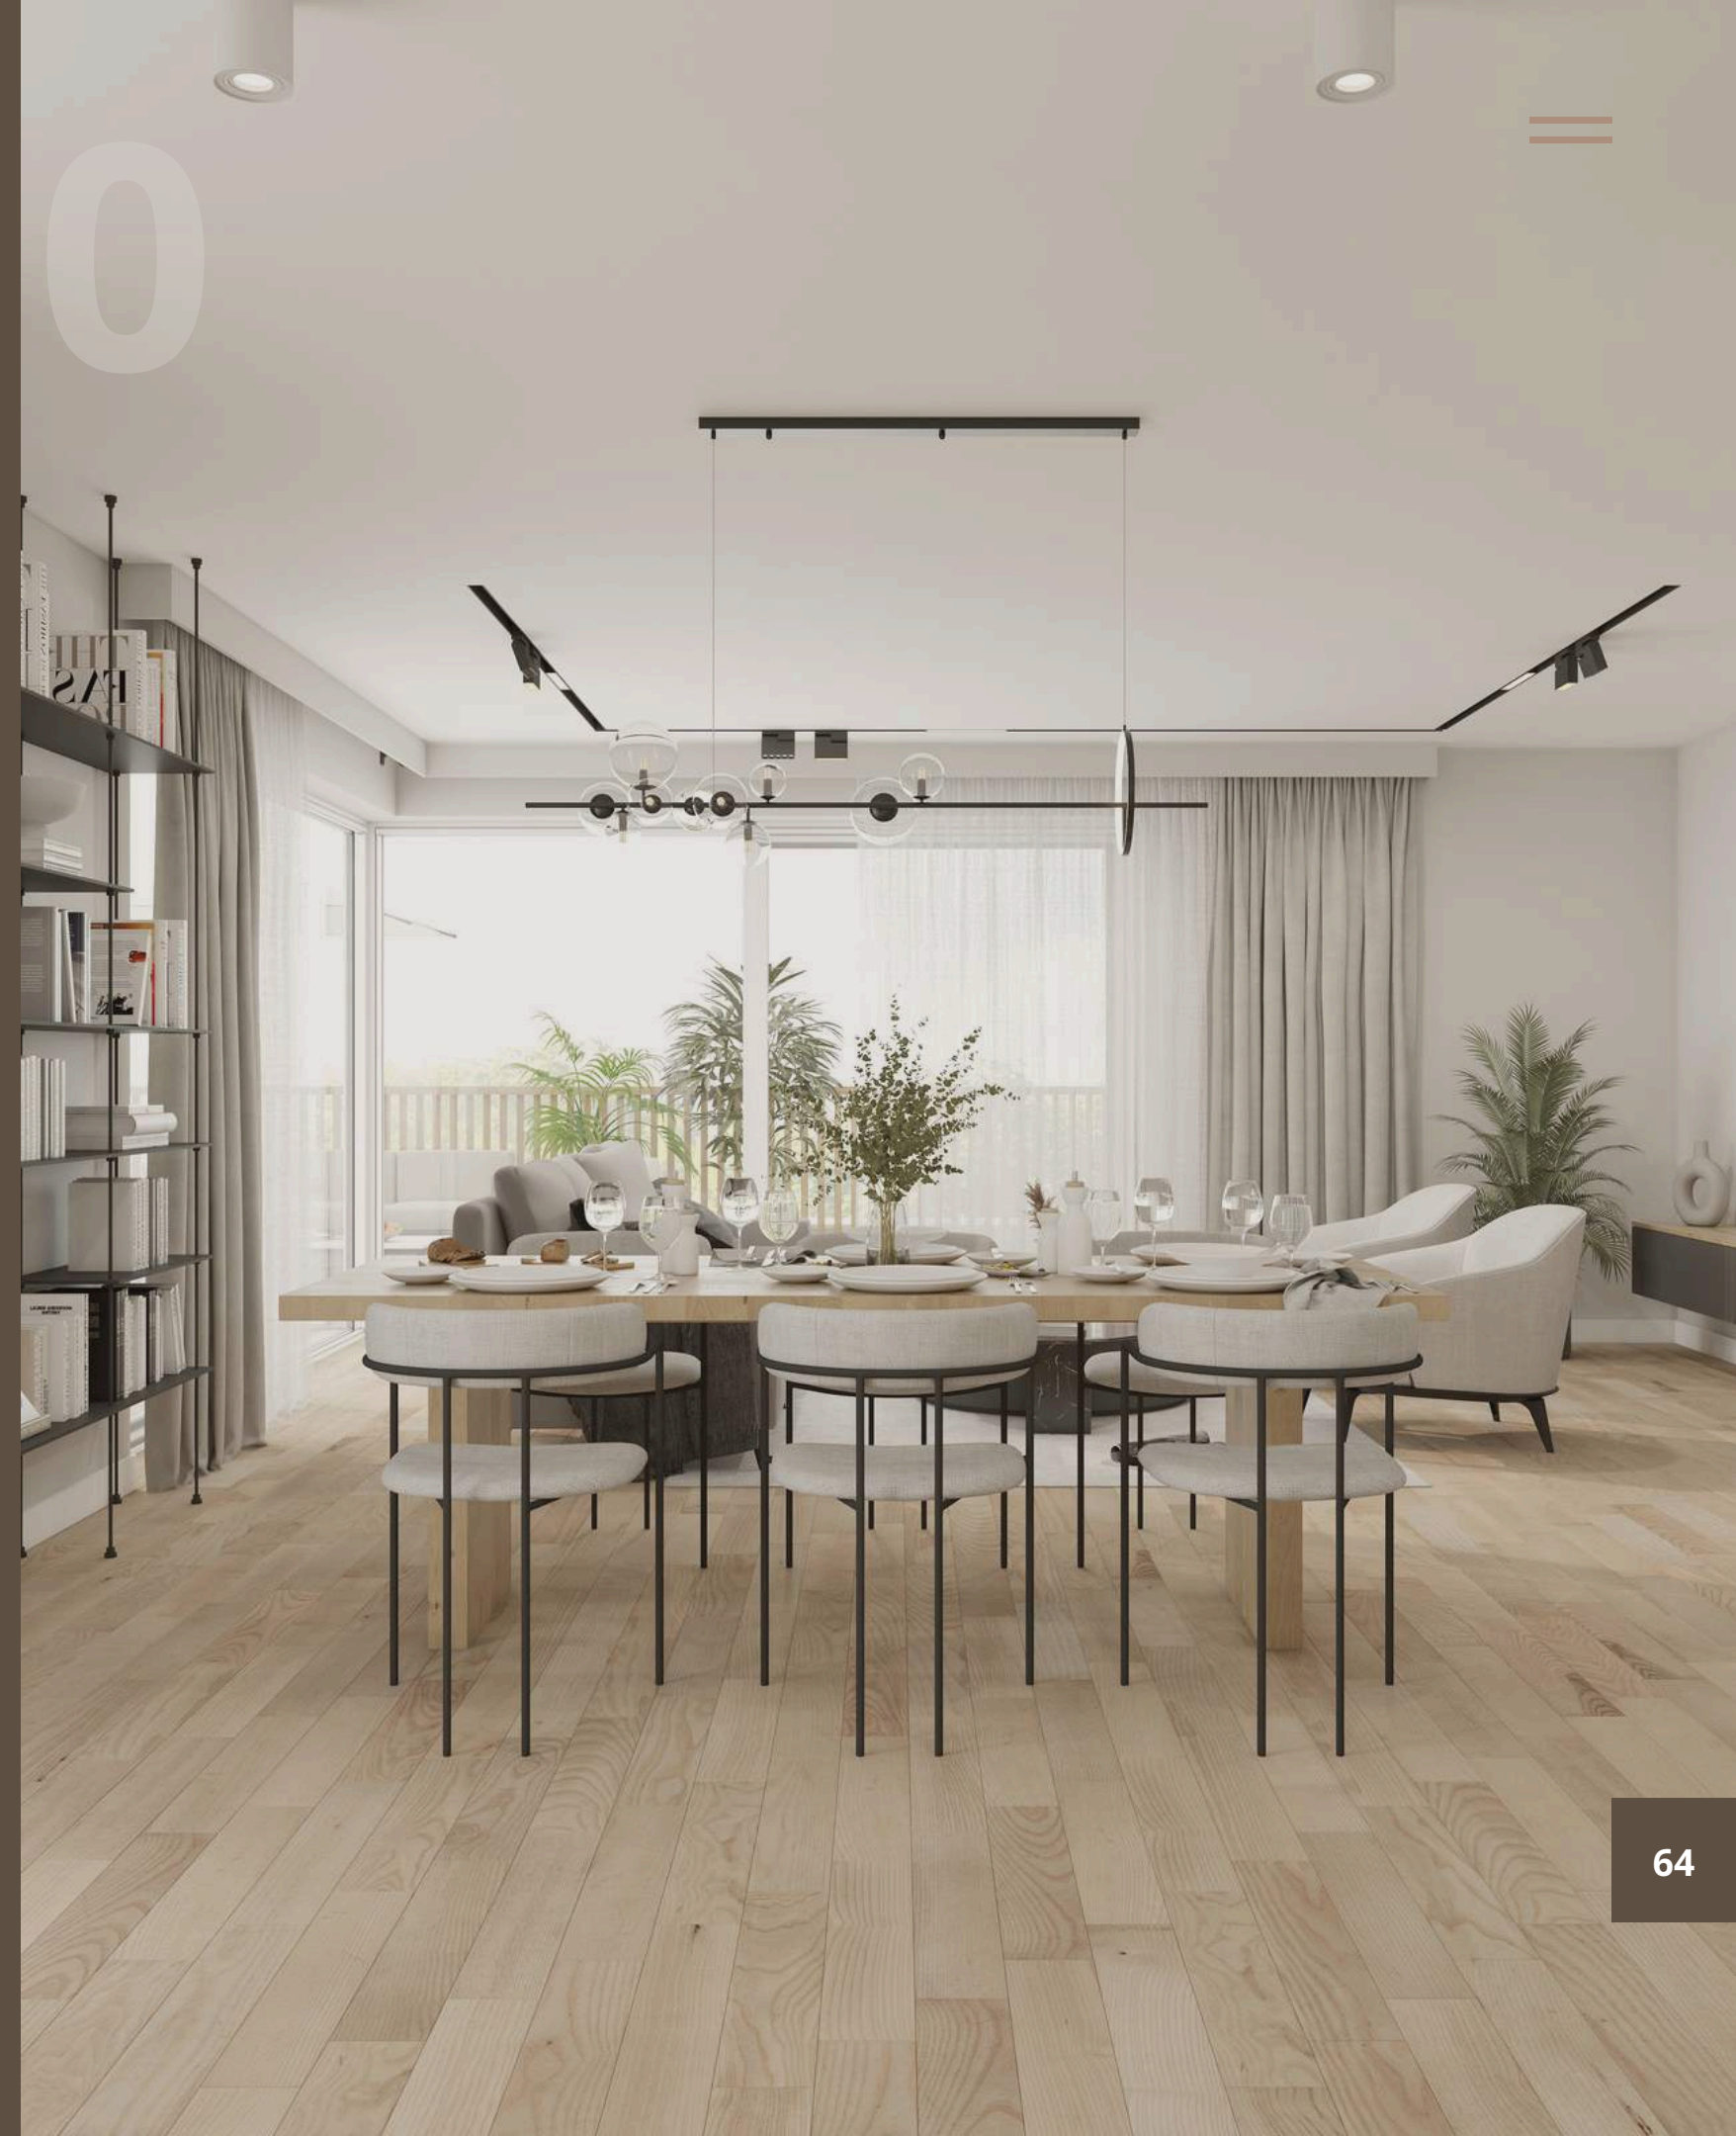

The design approach embraces a concept that is both accessible and modern. Rooted in simplicity, the project promotes a lifestyle that is minimal yet highly functional. The aesthetic choices prioritize clean lines, natural light, and a neutral color palette to enhance comfort without compromising on elegance.

Every apartment within the project offers a different layout and interior character. This variety allows for diverse living scenarios while maintaining a unified design language across the units. The result is a collection of homes that are stylish, comfortable, and thoughtfully tailored to modern urban life.

In addition to the design and visualization work, panoramic interior views were created for all three apartments, allowing for an immersive exploration of each space. These panoramic renders were used to develop a virtual tour, enabling viewers to navigate through the apartments as if they were physically present. The virtual experience enhances the understanding of spatial relationships, material choices, and lighting conditions, offering a dynamic and engaging way to present the design beyond static imagery.

WUPPERTAL PROJECT

WE 05

Apartment 5 is a 99 m² residential unit consisting of a living room, kitchen, children’s bedroom, master bedroom, two bathrooms, and a dedicated storage area. The spatial layout was designed with clarity and efficiency, ensuring each function is well-defined while maintaining a fluid connection between rooms. The planning process focused on creating a comfortable, modern living space tailored to the daily needs of a small family. With a practical distribution of rooms and careful zoning, the apartment offers both private and shared areas that are balanced and accessible.

The overall design concept emphasizes comfort, simplicity, and elegance. The living room features a spacious L-shaped sofa paired with a stylish armchair, forming an inviting seating arrangement. A custom wall panel, placed behind the dining table, adds visual depth and texture to the space, while also integrating seamlessly into the TV unit to create a cohesive focal point. The material and color palette is based on soft neutral tones, complemented by the abundant natural light that filters through the space, reinforcing a sense of openness and calm.

In the master bedroom, a full-height wooden headboard panel acts as a warm visual anchor, introducing natural texture and material contrast to the room. The children’s room was designed with flexibility and functionality in mind, incorporating a single bed, a work desk, and a storage wardrobe to support both rest and productivity. Each element was selected to contribute to a clean, minimal, yet personalized environment. Throughout the apartment, the use of natural materials and subtle detailing reflects a refined aesthetic that blends modern design principles with everyday practicality.

WUPPERTAL PROJECT

WE 05

WUPPERTAL PROJECT

WE 05

WUPPERTAL PROJECT

WE 06

Apartment 6 is a 120 m² residence designed to accommodate the daily life of a modern family with both functionality and elegance. The apartment includes a spacious living room, kitchen, study, children’s room, master bedroom, two bathrooms, and a dedicated storage area. The floor plan was developed to support fluid circulation while clearly defining each space according to its use. The combination of open and enclosed rooms allows for privacy, social interaction, and productive activities within the same environment, making the apartment adaptable to various lifestyle needs.

The living area is designed around a central L-shaped sofa, which anchors the space and creates a cozy atmosphere for relaxation. Just behind it, a dining area is framed by a set of pendant lights that offer both illumination and visual rhythm. The dining zone is distinguished by the use of wood and black accents, giving it a sophisticated and grounded aesthetic. Positioned in alignment with the dining table is a built-in bookshelf, which adds both functionality and character to the open-plan layout. The cohesive palette and material choices ensure continuity and harmony throughout the shared spaces.

Private rooms are each given their own identity through thoughtful use of color and texture. The study room, defined by soft grey tones, is designed as a flexible space suitable for both focused work and hosting guests. In the children’s room, green tones and playful wallpaper create an uplifting and imaginative atmosphere, balancing vibrancy with calm. The master bedroom features a striking blue accent wall behind the bed, adding depth and a serene energy to the space. Together, these elements reflect a design philosophy that merges warmth, personality, and refined modern aesthetics in a family-oriented layout.

WUPPERTAL PROJECT

WE 06

WUPPERTAL PROJECT

WE 08

Apartment 8 is a spacious 140 m² unit designed with an emphasis on openness, light, and refined simplicity. The layout includes a large living room, kitchen, master bedroom, two bathrooms, and dedicated storage areas. A key feature of the apartment is its seamless spatial flow, particularly between the kitchen and living area, which are visually and functionally connected through a central dining space. This spatial arrangement supports both everyday living and social gatherings, allowing the apartment to feel both expansive and intimate.

At the heart of the living space lies the dining area, strategically positioned between the living room and kitchen. Directly aligned with this zone is a built-in bookshelf, creating a cozy yet sophisticated atmosphere —ideal for long, relaxed moments of reading, dining, or conversation. This central area becomes the emotional and functional core of the home, balancing activity and calm. The neutral color palette, paired with natural materials and minimal detailing, ensures the space feels timeless and serene, without compromising on character.

One of the most striking features of Apartment 8 is its generous terrace, accessible from the living room, kitchen, and bedroom. This outdoor extension not only enhances the quality of daily life but also strengthens the connection between interior and exterior spaces. Abundant natural light pours into the apartment throughout the day, emphasizing the soft tones and clean lines that define the design. The master bedroom continues the project's cohesive material and color approach while offering direct access to the terrace, blurring the boundary between restful indoor space and open-air retreat. Overall, the apartment reflects a lifestyle built around comfort, light, and subtle elegance.

WUPPERTAL PROJECT

WE 08

KALKAVAN MANSION

Kalkavan Mansion is a 265 sqm residence that seamlessly blends refined aesthetics with functionality, offering a sophisticated living experience tailored to modern needs. The ground floor features an expansive open-plan living and dining area, creating a sense of spaciousness and fluidity. The kitchen, complete with a walk-in pantry, is designed for both practicality and elegance. Additional spaces such as the entrance hall, guest restroom, cloakroom, and a secondary dining area enrich the daily living experience with thoughtful convenience.

The upper floor is designed to provide privacy and comfort, comprising a master suite, children's bedrooms, bathrooms, and a dedicated dressing room. Each space has been carefully planned to respond to the individual needs of its users, ensuring a balanced harmony of function and form. The spatial transitions between rooms and levels are designed with meticulous attention to detail, enhancing both usability and visual continuity.

Conceived with a luxury design approach, the project features premium materials and high-end finishes throughout. From custom-designed furniture to surface treatments and lighting, every element has been thoughtfully selected to contribute to a cohesive and timeless atmosphere. Kalkavan Mansion stands out with its understated elegance, offering a holistic design that meets every requirement of contemporary upscale living.

KALKAVAN MANSION

LIVING ROOM

The living and dining areas are designed as a continuous, open-concept space that balances elegance with functionality. At the heart of the living area stands a custom-designed fireplace, which serves as both a visual anchor and a cozy focal point. Flanked by built-in shelving units on either side, the fireplace is accentuated by a large-scale mirror above it, enhancing the sense of depth and light in the space.

Contrasting tones are used strategically in the selection of seating elements, with sofas and armchairs in complementary hues that add vibrancy and character. Bespoke lighting fixtures are thoughtfully placed on side tables, contributing to both ambiance and refinement. A marble-clad arch subtly defines the transition between the living and dining zones, offering a graceful architectural gesture without compromising openness.

The dining area centers around a striking ten-person marble table, designed to bring both luxury and intimacy to gatherings. Surrounding the table are light green upholstered chairs that strike a perfect balance between sophistication and comfort. Carefully curated artworks by contemporary artists adorn the walls, infusing the space with cultural depth and a personalized aesthetic. Every detail is orchestrated to create a harmonious and timeless atmosphere.

KALKAVAN MANSION

KITCHEN

The kitchen is thoughtfully designed as both a functional workspace and a refined living zone, with a centrally placed island that serves as the focal point of the room. This generously sized island not only provides additional prep space but also creates a natural gathering spot within the home. A harmonious mix of materials and textures adds depth to the design, with marble surfaces featured prominently on the island and selected wall sections, reinforcing the space’s luxurious character.

To achieve a dynamic yet balanced aesthetic, the cabinetry is composed of both light and dark finishes, creating a sophisticated contrast that enhances the overall visual impact. The kitchen cabinets are not only elegant in appearance but also highly practical, offering ample storage solutions tailored to the needs of modern living. Integrated high-end appliances are seamlessly built into the cabinetry, preserving the clean lines and refined look of the space. A combination of closed and glass-front cabinet systems allows for both concealed storage and curated display, contributing to a sense of openness and personalization.

The layout of the kitchen emphasizes connectivity and efficiency, with direct access to the pantry, an additional dining area, and the outdoor space through strategically placed doors. This circulation design allows the kitchen to serve as a central hub within the home. A dedicated coffee station adds a touch of daily luxury and functionality, enhancing the kitchen’s role as a space for both routine and ritual. Overall, the kitchen blends high-performance design with visual sophistication, becoming an integral part of the home’s cohesive interior experience.

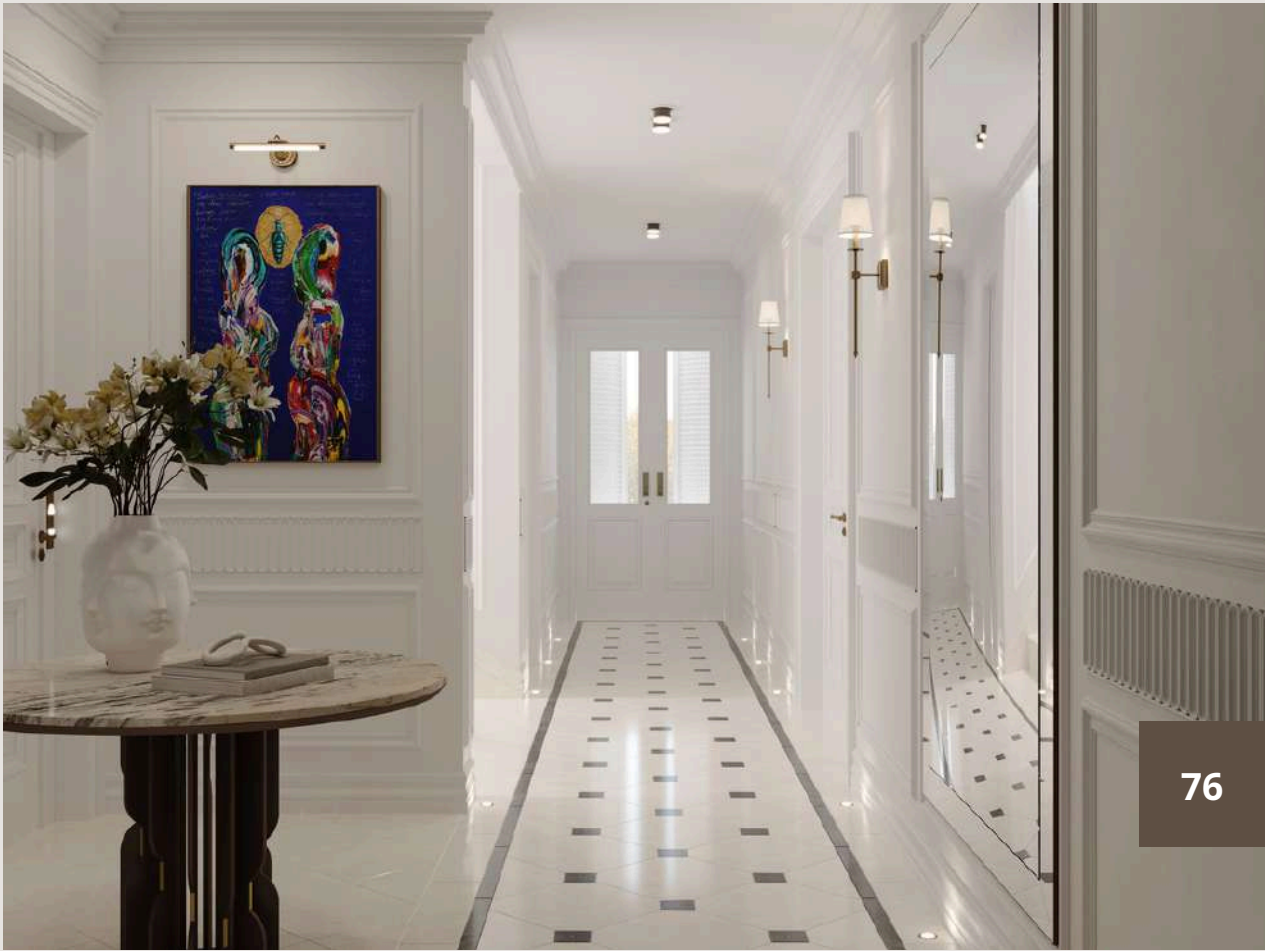

KALKAVAN MANSION

HALL

The hallway serves as a central transition space, thoughtfully designed to offer both elegance and functionality. Flanked by doors on either side, the layout ensures fluid circulation throughout the home. Upon entry, a bespoke wardrobe crafted from distressed leather is positioned to the left, combining aesthetic richness with practical storage for outerwear and accessories. This piece introduces a tactile warmth that contrasts beautifully with the overall neutral palette.

At the center of the hall, a custom-designed round table with a sculptural base anchors the space, acting as both a decorative element and a spatial focal point. Positioned directly across from the entry, a full-length mirror enhances the sense of depth and light. The surrounding walls are detailed with refined panel molding, adding architectural interest and visual texture. Wall sconces placed strategically throughout the space provide soft, ambient lighting that accentuates the classic details.

The staircase, located toward the middle of the hallway, leads to the upper floor and is framed by walls adorned with additional sconces, creating a visually engaging vertical element. White tones dominate both the walls and the doors, lending a bright and airy character to the entire area. This cohesive use of light colors, combined with high-quality materials and carefully curated lighting, elevates the hallway from a transitional zone into a graceful and welcoming introduction to the home.

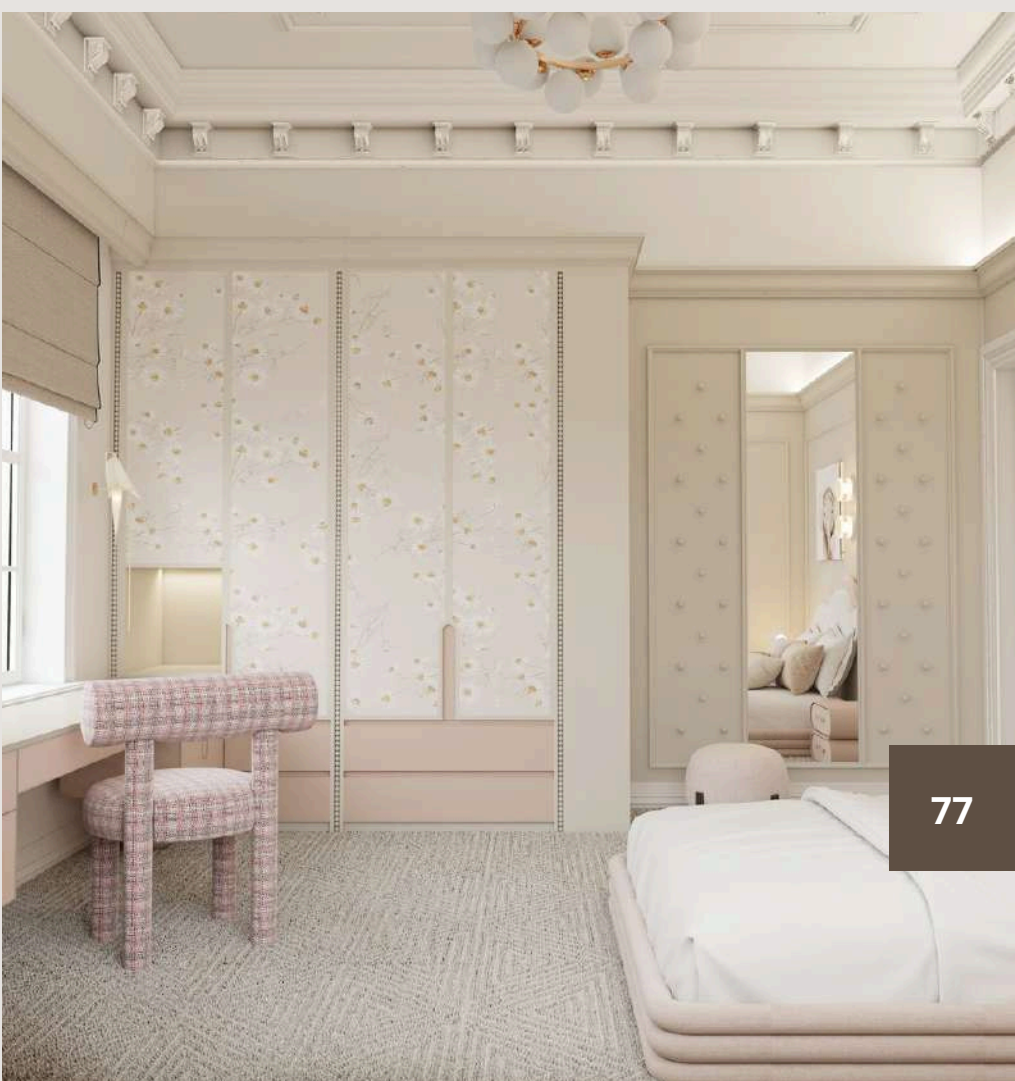

KALKAVAN MANSION

CHILDREN ROOM

The children's bedroom is designed in soft pink tones, evoking the charm and imagination of a fairytale setting. Every detail has been carefully considered and tailored to reflect the personality and preferences of its young occupant. The atmosphere is both dreamy and functional, combining playful elegance with thoughtful design elements that support daily routines and comfort.

At the entrance, a full-length mirror framed by decorative wall panels enhances both function and visual interest. A plush area rug spans the entire floor, bringing coziness and unity to the room. The ceiling lighting fixture was carefully selected to mirror the character of the space—whimsical, refined, and perfectly suited to its young resident. Altogether, the room is a harmonious blend of design and emotion, where form follows both function and fantasy.

A custom-designed fabric headboard serves as the focal point of the bed, adding texture and warmth to the room. Beside the bed, oval-shaped nightstands complement the room’s gentle aesthetic, softening the overall geometry of the space. In front of the window, a study desk has been placed to maximize natural light, flanked by built-in storage units on both sides—creating a dedicated, inspiring area for learning and creativity.

DG KITCHEN

This kitchen design emphasizes simplicity and functionality. A refined balance is achieved through the use of crisp white tones paired with deep anthracite, creating a clean and contemporary atmosphere. Despite its compact size, the space has been thoughtfully planned to meet essential needs, offering a practical and organized environment. The contrast in the color palette adds depth and character to the room while reflecting a timeless aesthetic approach.

Positioned between the kitchen and the living room, the central island serves not only as a visual divider but also as a versatile social space. It functions as both a casual dining area and a place to gather with guests, enhancing the multifunctionality of the interior. Every detail of the design has been considered to maximize comfort and efficiency; smart storage solutions, an ergonomic layout, and minimalist material choices come together to demonstrate how a small kitchen can offer both elegance and usability without compromise.

DG KITCHEN

This kitchen design combines modern aesthetics with practical solutions to maximize functionality in a compact space. The crisp white cabinetry contrasts harmoniously with deep anthracite surfaces, creating a clean and balanced atmosphere. A large, double-door refrigerator has been seamlessly integrated into the layout to meet daily storage needs without compromising on style. Open shelves are positioned between the upper cabinets and the countertop, offering both visual lightness and accessible storage, while the sink has been thoughtfully placed in front of the window to bring natural light into everyday kitchen tasks.

At the heart of the layout lies a multifunctional island that serves as a transitional element between the kitchen and the living area. This island not only defines the spatial boundaries but also acts as a casual dining zone. Its surface is finished with a marble countertop that extends and wraps partially around the side, creating a visually striking detail. Black leather bar stools complement the island with a refined, contemporary touch, making it a welcoming spot for dining, working, or socializing.

Above the island, pendant lighting fixtures provide focused illumination, enhancing the functionality of the space while contributing to its overall ambiance. These lights create a warm and intimate atmosphere, particularly in the evenings. Every design decision—from the placement of fixtures to the material choices—has been made with the goal of elevating daily routines and enhancing spatial comfort. This kitchen exemplifies how a well-planned layout and thoughtful design details can transform a small area into an efficient and elegant living space.

IBRADI PUBLIC LIBRARY

Located in the İbradı district of Antalya, this library project was designed as a multifunctional facility to support access to knowledge for all age groups—from infants to adults. The three-story building consists of a basement, ground floor, and first floor. The basement houses music, art, and playrooms, along with technical spaces, all intended to foster creativity and interaction. On the ground floor, there are dedicated library sections for babies and children, as well as a conference hall, a cafeteria, and administrative offices to encourage community engagement.

The first floor is designated for adult users and features expansive reading areas and a technology room. Each space was carefully designed to meet the cognitive, social, and physical needs of its target age group. Through this comprehensive approach, the library offers more than just a place for reading—it serves as a vibrant hub for learning, socialization, and cultural enrichment.

Architecturally, the building draws inspiration from the region’s traditional “Button Houses” (Düğmeli Evler), reflecting İbradı’s rich cultural heritage. In line with this local style, the structure incorporates cedar wood logs interlocked to form the frame, with the walls constructed from stacked stone without the use of mortar or cement. This integration of modern functionality with vernacular architecture results in a distinctive and sustainable design solution.

MEZZANINE FLOOR PLAN

IBRADI PUBLIC LIBRARY

ADULT LIBRARY

Located on the first floor, the adult library section accommodates up to 92 users and includes a mezzanine level that enhances spatial depth and functionality. The layout is organized with a clear circulation flow created through the strategic placement of bookshelves and reading tables, ensuring both ease of movement and focused study zones. The mezzanine provides additional seating and a more secluded reading environment, catering to various user preferences.

The interior design emphasizes both comfort and visual harmony. Deep navy wooden ceiling panels paired with linear lighting fixtures create a calm and focused atmosphere. Lighted wall panels add a soft ambient glow, contributing to a sophisticated and contemporary aesthetic. The thoughtful use of color—gray and yellow in chairs and shelving units—balances neutrality with vibrant accents, subtly energizing the space without distraction.

To further enhance user comfort, organically shaped blue poufs are placed throughout the library, offering informal seating options and encouraging a more relaxed reading experience. The combination of structured functionality with soft, inviting design elements transforms the adult library into a welcoming and inspiring environment for learning, reflection, and intellectual exploration.

IBRADI PUBLIC LIBRARY

ADULT LIBRARY

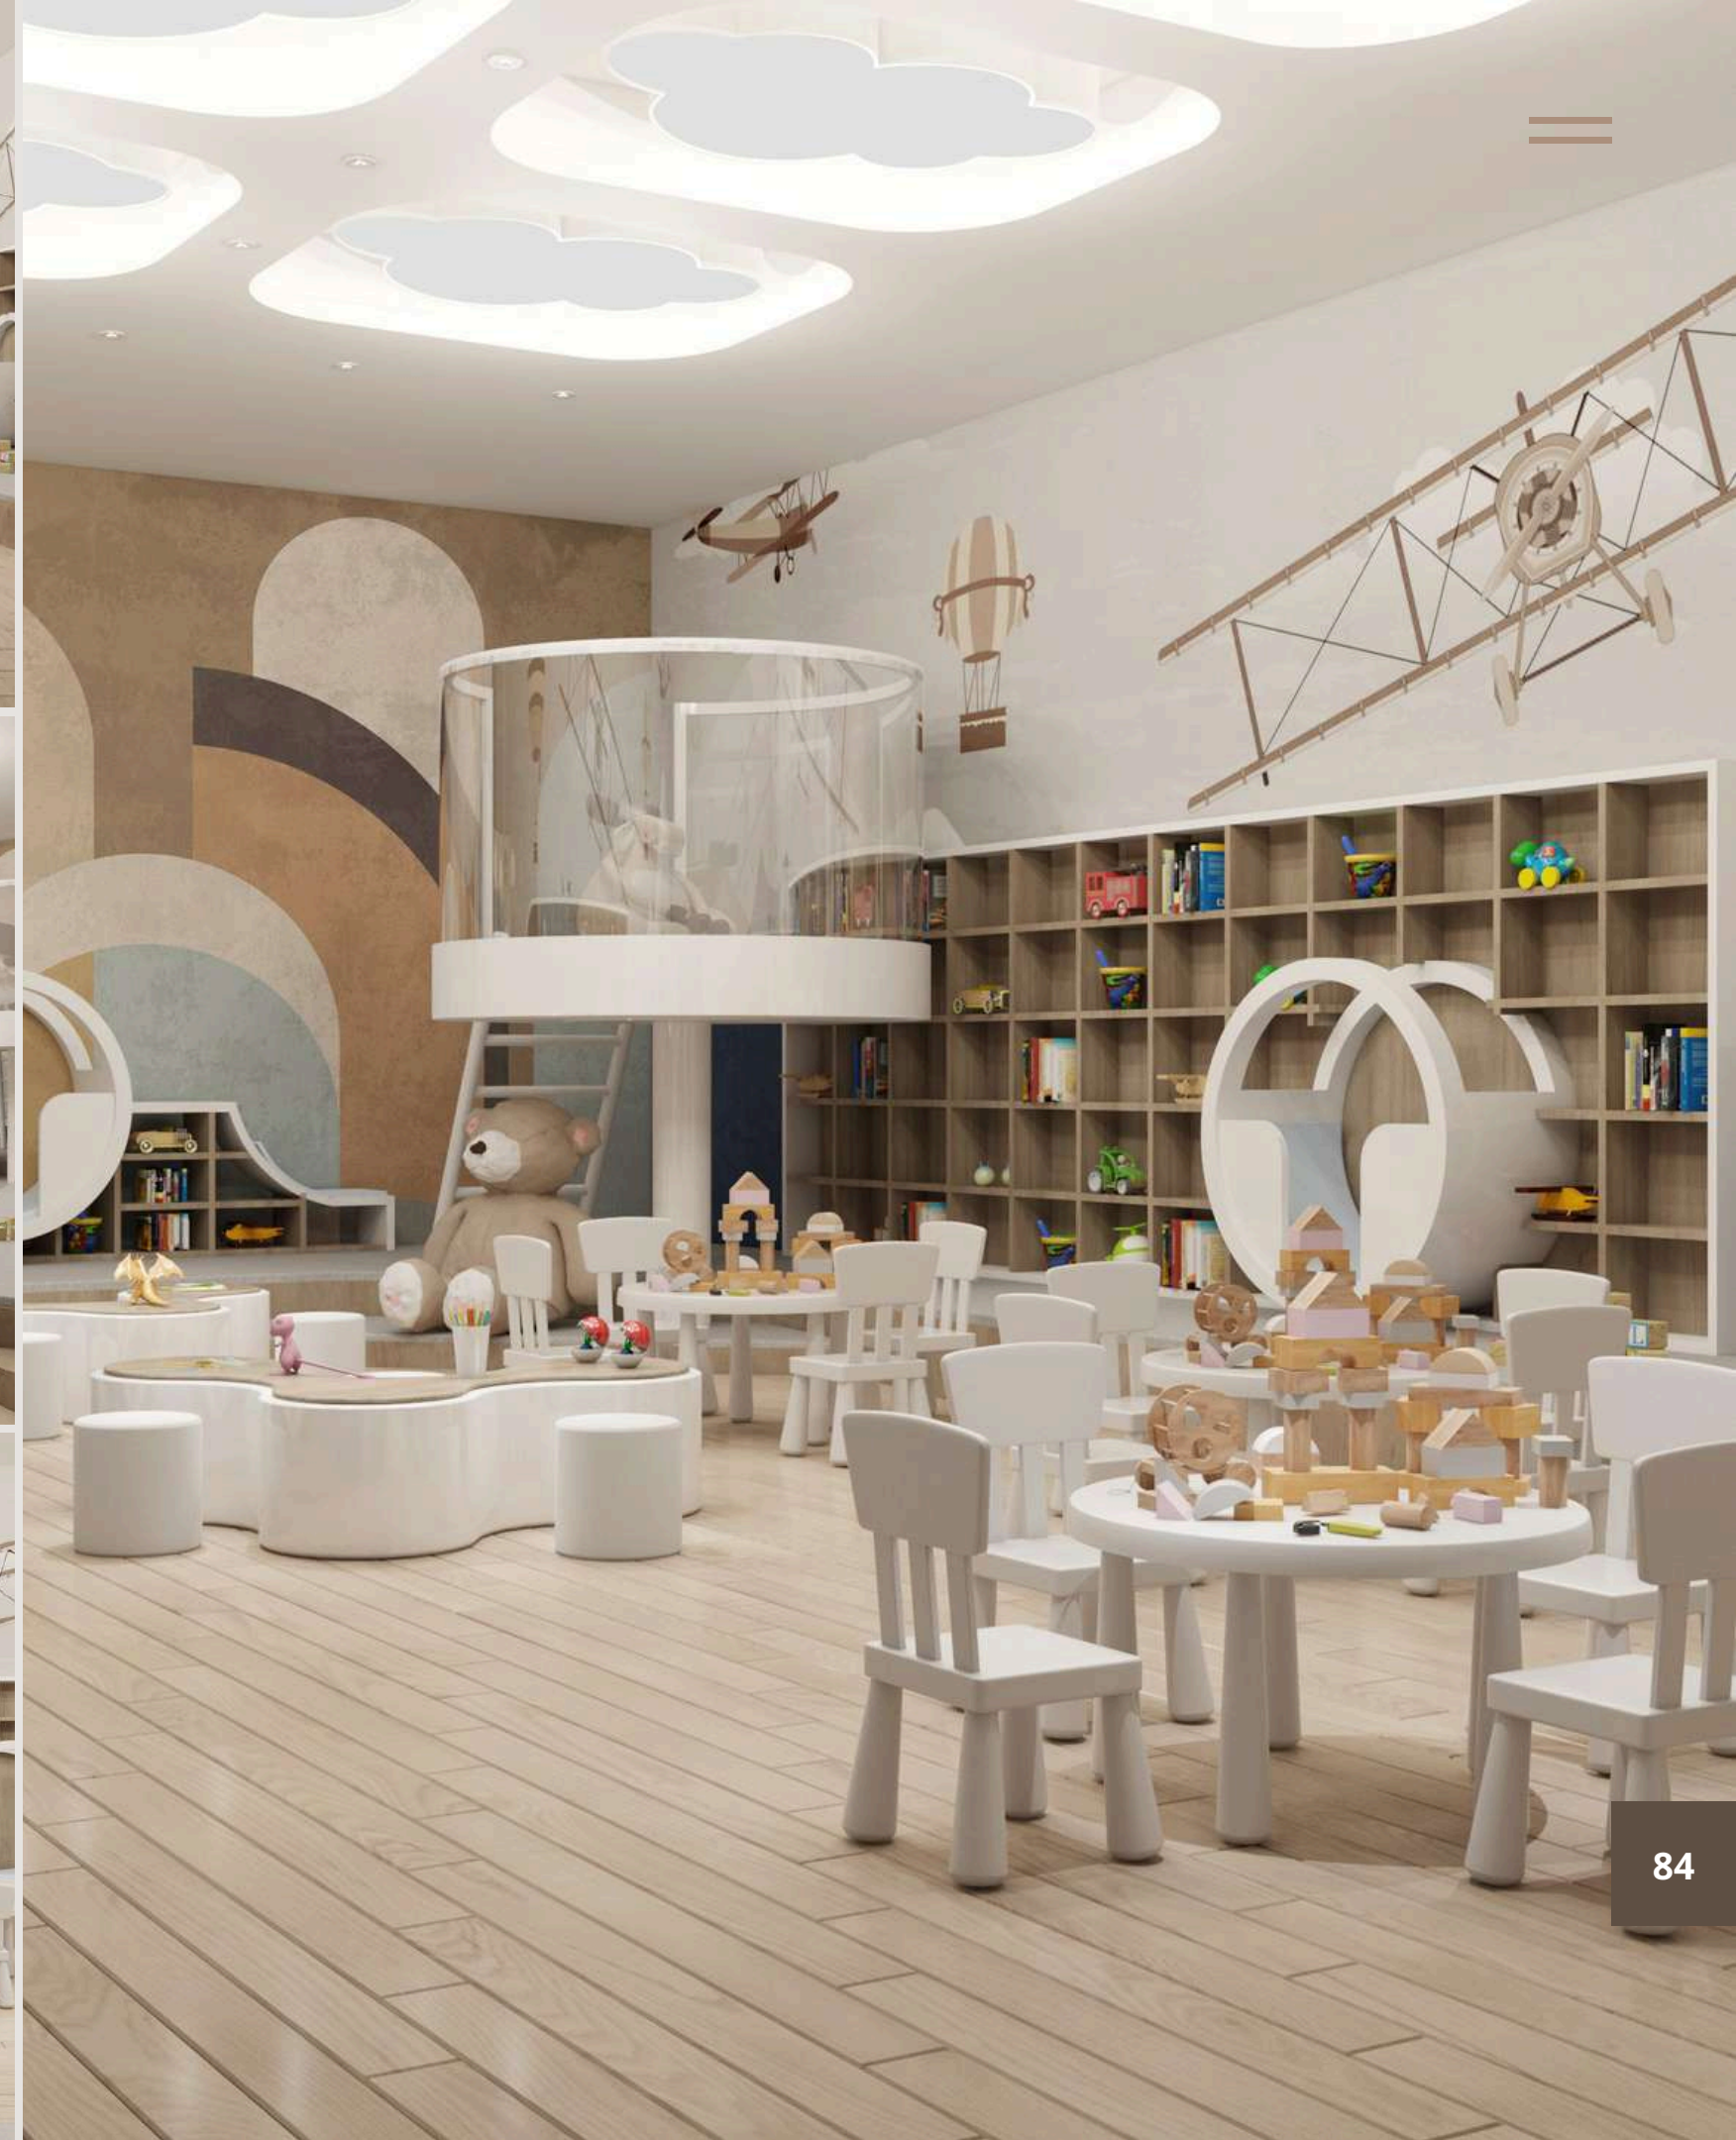

IBRADI PUBLIC LIBRARY

CHILDREN LIBRARY

The children's library is designed as a dynamic and stimulating environment that supports both independent exploration and guided learning. Low-height bookshelves integrated with seating elements line the walls, making books easily accessible and inviting children to interact with the space freely. These combined functions not only encourage reading but also help children develop a sense of autonomy and spatial awareness.

A variety of table designs are distributed throughout the space to accommodate different activities—from quiet reading to group workshops. This diversity allows children to choose how they engage with the space based on their interests and needs. Additionally, height-differentiated platforms are incorporated within the layout, creating playful levels and encouraging movement, discovery, and new perspectives within the library.

The interior aesthetic is enriched with child-friendly wallpaper featuring playful, educational patterns that spark imagination and visual engagement. Every element, from furniture scale to spatial organization, has been carefully considered to foster a sense of comfort, creativity, and belonging. The result is a vibrant, inclusive library setting that supports children's cognitive, social, and emotional development in a joyful and accessible atmosphere.

IBRADI PUBLIC LIBRARY

BABY LIBRARY

The baby library, located on the ground floor, is thoughtfully designed to support early childhood development through a calm, engaging, and safe environment. A custom-designed wall panel serves as a visual focal point while also contributing to the sensory experience of the space. Ergonomic seating areas are scaled specifically for infants and caregivers, creating cozy nooks for shared reading moments and interaction.

The color palette is dominated by soft greens and complementary tones, chosen for their calming and nature-inspired qualities. Semi-circular reading zones offer enclosed yet inviting spaces where babies can feel secure while exploring books. These curved forms not only support visual softness but also promote a sense of comfort and focus for early readers. Activity tables are placed throughout the space to accommodate developmental play and interactive group sessions.

The flooring features a light-colored epoxy finish, ensuring a hygienic, durable, and visually bright surface that enhances the overall spaciousness. Every design element—from the materials to the form and color—has been selected with the specific needs of infants in mind. The result is a nurturing, age-appropriate library setting that encourages curiosity, sensory engagement, and early literacy skills in a safe and inspiring atmosphere.

INNOVATIVE HAIR LABORATORY

This hair laboratory unit is designed to accommodate all types of hair-related procedures, offering a comprehensive and functional workspace for salon professionals. The layout includes dedicated zones for hair washing, coloring, and drying, all seamlessly integrated into the worktop. Built entirely from stainless steel, the structure ensures long-lasting durability, easy maintenance, and a hygienic environment—ideal for intensive daily use in a salon setting.

In addition to its technical features, the unit also provides both open and closed storage areas to support an organized workflow and quick access to tools and products. Thoughtfully integrated spot lighting enhances visibility and precision during treatments, ensuring optimal results for every client. The design combines practicality with a modern aesthetic, making it a high-performance centerpiece for contemporary hair salons.

INNOVATIVE HAIR LABORATORY

This custom-designed hair laboratory unit has been meticulously developed to support all professional hair care procedures within a single, highly functional workspace. From washing and coloring to drying, each operational area is thoughtfully integrated into the stainless steel countertop. The use of 100% stainless steel not only ensures durability and resistance to corrosion but also provides a hygienic and easy-to-clean surface—ideal for the demands of a modern hair salon. The clean, industrial aesthetic of the material is complemented by its long-lasting performance, making it both a practical and stylish centerpiece.

The unit is intelligently organized to maximize efficiency and workflow. The lower section features spacious drawers for storing tools, equipment, and materials that need to be accessed quickly and easily. On both upper sides of the unit, there are shelved cabinets that provide additional enclosed storage for bulkier items or products that require protection from dust and light. A standout feature is the rail-mounted compartment situated on the countertop, designed specifically for storing hair dye containers. This box-like mechanism can be extended smoothly, offering an expandable and ergonomic solution that enhances accessibility during color treatments.

Each section of the lab is designed with a distinct function in mind, ensuring that every aspect of the hairstyling process is supported in a seamless and organized manner. The integrated spot lighting system enhances visibility, allowing for precision work in both technical and creative processes. This hair lab is not a standard modular unit—it is a fully customized design that merges practical needs with aesthetic values. Every element, from storage to lighting, has been crafted to serve a specific purpose, offering salon professionals an elevated user experience and a refined, high-performance workspace tailored for contemporary hairstyling environments.

PD HOUSE

This two-story, 200 m² modern home design seamlessly blends functionality with understated elegance. The ground floor features a spacious living room, an open-plan kitchen, a guest restroom, and a children's bedroom. Large windows allow ample natural light to fill the interior, enhancing the sense of openness. Transitions between spaces are thoughtfully arranged to create a fluid, user-friendly living environment.

The upper floor, designed as a loft-style attic, prioritizes privacy and comfort. It includes a generous master bedroom, a walk-in closet, and a fully equipped contemporary bathroom. Throughout the home, a neutral color palette—featuring shades of white, gray, and beige—establishes a calm, refined ambiance. The interior design is enriched with minimalist details, reflecting a modern lifestyle through clean lines and timeless materials.

PD HOUSE

LIVING ROOM

The living room is thoughtfully divided into two distinct areas: a dining section and a seating area, both designed to offer comfort and visual harmony. The seating area centers around a custom-designed TV unit, which serves as a focal point of the space. Rich wooden accents are incorporated throughout, adding warmth and texture to the modern aesthetic. Built-in shelving units provide both functionality and visual interest, while wall-mounted sconces add layers of ambient lighting that enhance the overall atmosphere.

A large sofa is strategically placed facing the TV unit, creating a cozy and inviting environment for relaxation or gatherings. Near the expansive window, a single armchair is positioned to take advantage of natural light, offering a tranquil corner for reading or contemplation. The use of soft, neutral tones in the upholstery and finishes ensures a serene and cohesive look, while the contrast of wooden textures brings depth and character to the room.

The dining area features a six-person dining table, ideal for both everyday meals and entertaining guests. The surrounding walls are adorned with decorative paneling, adding architectural interest and refinement. Elegant moulding details frame curated wall sconces and a carefully selected piece of artwork, reinforcing the room’s balanced blend of minimalism and sophistication. The flooring is finished in walnut wood, offering a rich, timeless foundation that ties together the different elements of the space.

PD HOUSE

BEDROOM

The master bedroom is located in the attic, offering a private and serene retreat within the home. The sloped ceilings and unique architectural lines of the space add character, while the carefully planned layout maximizes both functionality and comfort. A cozy sitting area and a wall-mounted television have been integrated into the room, allowing the bedroom to serve not only as a place for rest but also as a space for quiet relaxation.

A defining feature of the room is its direct access to a private terrace, which enhances the sense of openness and connection to the outdoors. Natural light fills the space throughout the day, accentuating the calm and inviting ambiance created by the neutral color palette. Shades of gray and beige dominate the room's design, creating a soft, sophisticated atmosphere that promotes tranquility and restfulness.

The seating area includes a custom-designed sofa, tailored to fit the spatial characteristics of the attic without compromising on style or comfort. Positioned directly across from the main sleeping area is a walk-in closet, providing ample storage while maintaining a clean and uncluttered aesthetic. The overall design of the bedroom reflects a modern, understated elegance, making it a refined and restful sanctuary within the home.

THE VALLEY

The Valley Hotel is a wellness-focused hospitality project nestled in the unique natural landscape of Bodrum. The primary aim of the project is to offer guests a serene and tranquil experience immersed in nature. All architectural elements and functions have been integrated into the site with minimal environmental intervention, preserving the natural topography and adapting seamlessly to the terrain levels.

The hotel offers diverse accommodation options, including nine different room types, suites, and tiny houses—providing flexible solutions tailored to various guest needs. Complementing these are a spa center, a health-oriented restaurant, boutique retail spaces, tennis courts, a basketball court, and a scenic pond. All these functions are strategically placed within the natural elevation changes of the site, ensuring smooth pedestrian circulation and visual continuity throughout the complex.

Designed with a sustainable architectural approach, The Valley Hotel harmoniously blends built form with its surrounding landscape. Through both its spatial organization and design philosophy, the project offers guests a holistic environment for physical and mental rejuvenation—delivering a calm, immersive, and inspiring experience in harmony with nature.

THE VALLEY

PLAN

The site plan was developed with a sensitive approach to the natural topography, organizing the land according to its existing elevation levels. A stream running through the center of the site serves as a defining natural element, dividing the terrain into three distinct zones. The first zone includes the main entry area and houses the primary functions such as guest rooms, the restaurant, clubhouse, and swimming pool—forming the project's central social core. The second zone focuses on wellness and nature, featuring a cultivated garden area, a spa center, and a cluster of tiny houses nestled within the landscape. The third and more private section contains three standalone villas, accompanied by recreational amenities such as tennis courts and a basketball court. These three zones are interconnected through a carefully designed circulation system that follows the natural contours of the land, ensuring seamless transitions and spatial continuity. The planning strategy allows each zone to maintain its own functional identity while contributing to the project's overall coherence and experiential richness.

THE VALLEY

RESTAURANT

The restaurant within The Valley Hotel offers a unique design that seamlessly blends natural materials with a contemporary interior approach, establishing a strong connection to its surroundings. Constructed entirely with load-bearing stone masonry, the structure harmonizes with the natural environment while conveying a timeless and solid character. The flooring features micro-concrete, providing a minimalist aesthetic that complements the texture of the stone. A high wooden pitched roof adds warmth and spatial openness to the atmosphere. Expansive glass façades bring the surrounding landscape indoors, enhancing the sense of visual continuity with nature.

The material palette is curated with refinement and consistency throughout the interior. The bar area combines dark-toned stone, wood, and concrete, creating a sophisticated yet welcoming atmosphere. Overhead wine racks lining the walls serve both a functional and decorative purpose. Tables, crafted in both round and rectangular forms from natural wood, are paired with elegant wooden chairs upholstered in leather—offering a balance of comfort and style. Contemporary light fixtures suspended from the ceiling add depth and drama to the space, reinforcing the interior’s harmonious aesthetic.

The layout of the furniture is thoughtfully organized to prioritize user comfort and spatial fluidity. Generous circulation between tables and a variety of seating arrangements accommodate both large gatherings and more intimate dining experiences. Lush indoor plants placed strategically throughout the space reinforce the organic atmosphere, working in tandem with the natural stone and wood finishes. Through this holistic design approach, the restaurant transcends its function as a dining area and becomes a lifestyle space where nature, comfort, and visual elegance converge into a unified, sensory-rich experience.

THE VALLEY

CLUBHOUSE

The clubhouse is a multifunctional communal space designed to promote relaxation and personal time, complementing The Valley Hotel's wellness-focused philosophy. At the heart of the space are two suspended fireplaces positioned opposite each other, creating a warm and inviting focal point. Comfortable seating areas are arranged around the fireplaces, encouraging social interaction or quiet contemplation. A centrally placed double-sided bookshelf serves as both a visual divider and a key architectural element that defines the character of the space. On one side of the bookshelf, custom-designed desks and chairs offer guests the opportunity to read, study, or work in a calm and focused environment. Through its thoughtful spatial organization, use of natural materials, and soft lighting, the clubhouse provides a balanced experience—supporting both communal gathering and individual retreat, and ultimately serving as a versatile, high-quality living space throughout the day.

THE VALLEY

RECEPTION

The reception area serves as one of the first points of contact for guests upon arrival and sets the tone for the overall experience at The Valley Hotel. As a gateway to the project's nature-integrated and wellness-focused concept, this space is thoughtfully designed to reflect the architectural language of the entire site. A harmonious blend of natural materials—wood, stone masonry, and exposed concrete—creates a welcoming yet refined atmosphere. The tactile quality of these materials, combined with the soft, filtered daylight, establishes an immediate sense of comfort and authenticity.

The reception desk and the backdrop wall behind it are crafted entirely from natural wood, emphasizing warmth and craftsmanship. This wooden volume becomes a central focal point of the space, drawing guests in with its simplicity and elegance. The use of wooden shutters and screens enhances the cozy character of the area, diffusing light in a way that softens the environment and adds a subtle rhythm to the space. These architectural details not only provide texture and depth but also reinforce the connection to the surrounding landscape.

An intimate seating area is incorporated into the space to accommodate guests during check-in and waiting periods, further emphasizing comfort and hospitality. Above the reception desk, a distinctive pendant lighting element descends from the ceiling—an iconic feature that anchors the space and adds sculptural value. This lighting fixture not only serves a functional purpose but also contributes to the overall ambiance, enhancing the sense of place and making the reception area both memorable and inviting.
